Safety precautions

▲ WARNING

To prevent injury or fire, take the following precautions:

- Mounting and wiring this product requires skills and experience. For safety's sake, leave the mounting and wiring work to professionals.
- When extending the ignition, battery, or ground wires, make sure to use automotive-grade wires or other wires with the range of 14 mm² (AWG 6) to 21 mm² (AWG 4) to prevent wire deterioration and damage to the wire coating.
- To prevent a short circuit, never put or leave any metallic objects (such as coins or metal tools) inside the unit.
- If the unit starts to emit smoke or strange smells, turn off the power immediately and consult your Kenwood dealer.
- Do not touch the unit during use because the surface of the unit becomes hot and may cause burns if touched.

▲ CAUTION

To prevent damage to the machine, take the following precautions:

- Be sure the unit is connected to a 12V DC power supply with a negative ground connection.
- Do not open the top or bottom covers of the unit.
- Do not install the unit in a spot exposed to direct sunlight or excessive heat or humidity. Also avoid places with too much dust or the possibility of water splashing.
- When replacing a fuse, only use a new one with the prescribed rating. Using a fuse with the wrong rating may cause your unit to malfunction.
- To prevent a short circuit when replacing a fuse, first disconnect the wiring harness.

NOTE

- If you experience problems during installation, consult your Kenwood dealer.
- If the unit does not seem to be working right, consult your Kenwood dealer.

Cleaning the unit

If the front panel gets dirty, turn off the power and wipe the panel with a dry silicon cloth or soft cloth.

▲ CAUTION

Do not wipe the panel with a hard cloth or a cloth dampened by volatile solvents such as paint thinner and alcohol. They can scratch the surface of the panel and/or cause the indicator letters to peel off.

To prevent battery rise

When the unit is used in the ACC ON position without turning the engine ON, it depletes the battery. Use it after starting the engine.

Protection function

The protection function is activated in the following situations:

This unit is equipped with a protection function for protecting this unit and your speakers from various accidents or problems that can occur.

When the protection function is triggered, the power indicator goes off and the amplifier stops operating.

- When a speaker wire may be short-circuited.
- When a speaker output contacts ground.
- When the unit malfunctions and a DC signal is sent to the speaker output.
- When the internal temperature is high and unit won't operate.

■ Wiring

- Take the battery wire for this unit directly from the battery. If it's connected to the vehicle's wiring harness, it can cause blown fuses etc.
- If a buzzing noise is heard from the speakers when the engine is running, connect a line noise filter (optional) to each of the battery wire.
- Do not allow the wire to directly contact the edge of the iron plate by using Grommets.
- Connect the ground wire to a metal part of the car chassis that acts as an electrical ground passing electricity to the battery's negative \ominus terminal. Do not turn the power on if the ground wire is not connected.
- Be sure to install a protective fuse in the power cord near the battery. The protective fuse should be the same capacity as the unit's fuse capacity or somewhat larger.
- For the power cord and ground, use a vehicle type (fireproof) power wiring cord. (Use a power wiring cord with the range of 14 mm² (AWG 6) to 21 mm² (AWG 4).
- When more than one power amplifier are going to be used, use a power supply wiring wire and protective fuse of greater current-handling capacity than the total maximum current drawn by each amplifier.

■ Speaker selection

- Using speakers with smaller input ratings than the amplifier's output power would result in smoke generation or equipment failure.
- The impedance of the speakers that are going to be connected should be 2 Ω or greater (for stereo connections, amplifier SUB), or 4 Ω or greater (for bridged connections). When more than one set of speakers are going to be used, calculate the combined impedance of the speakers and then connect suitable speakers to the amplifier.

Connection / 连接

▲ WARNING

Particular attention must be given to making good electrical contact at the amplifier-output and speaker terminals.
Poor or loose connections can cause sparking or burning at the terminals because of the very high power that the amplifier can deliver.

▲ CAUTION

- If sound is not output normally, immediately turn power off and check connections.
- Be sure to turn the power off before changing the setting of any switch.
- If the fuse blows, check wires for shorts, then replace the fuse with one of the same rating.
- Check that no unconnected wires or connectors are touching the car body. Do not remove caps from unconnected wires or connectors to prevent short circuits.
- Connect the speaker wires to appropriate speaker connectors separately. Sharing the negative wire of the speaker or grounding speaker wires to the metal body of the car can cause this unit to fail.
- After installation, check that the brake lamps, turn signal lamps and windshield wipers work properly.

▲ 警告

要特别注意放大器的输出口和扬声器端子有良好的电气接触。
因为放大器要发出非常高的功率，松弛或不良的连接可能在端子处产生火花甚至燃烧。

▲ 注意

- 如果声音输出不正常，应立即关断电源并检查连接是否正确。
- 在变更开关的设定时，必须首先切断电源。
- 当保险丝熔断后，要检查线缆是否有短路，并更换上相同规格的保险丝。
- 检查是否有尚未连接的线缆或与车体相接触的端头。未连接线缆及其端部的保护帽不可拆掉，以防短路。
- 扬声器的线缆要分别连接到各自的端子。共用扬声器的负极线缆或将扬声器端子接地到汽车的金属部分，都会导致本机停止工作。
- 安装之后，请检查汽车的刹车灯、方向指示灯、雨刷等是否正常工作。

- 在本装置安装之后，应该确认电气设备，比如刹车灯、转向信号灯以及雨刷等操作正常。

■ 接线

- 请将本机的蓄电池连接线直接与蓄电池连接。如果与汽车的配线束连接，将产生烧毁保险丝等故障。
- 如果发动机运转时从扬声器中发出噪音，可以在蓄电池的每根连线上加一个线路噪音滤波器（选配件）。
- 使用保护套，以防线缆直接接触铁板的边缘。
- 将接地线连接到车架的金属部位，车架起到车辆电气接地的作用。将电流传递到蓄电池的负极 \ominus 。如果接地线没有连接就不要打开电源开关。
- 务必必在蓄电池附近的电源连接线上设置保险丝。保险丝的规格应该与本机的保险丝容量相同或者略大。
- 对于电源连接线和接地线，请使用电流容量大于本机保险丝容量的汽车用（防火）电源连接线。（请使用截面积为14mm² (AWG 6) ~21mm² (AWG 4) 之间的电源连接线。）
- 当使用多个功率放大器时，电源导线的电流容量及保险丝的容量要大于各个放大器的使用电流之和的最大值。

■ 扬声器选择

- 使用输入额定值比放大器输出功率小的扬声器会导致冒烟或设备故障。
- 所连接的扬声器的阻抗必须为 2 欧姆或更高（立体声连接时，SUB放大器）；或者 4 欧姆或更高（桥接连接）。当使用一组扬声器时，必须在计算扬声器的总阻抗之后，再连接合适的扬声器。
