Precautions

⚠️ WARNINGS

To prevent injury or fire, take the following precautions:

- To prevent a short circuit, never put or leave any metallic objects (such as coins or metal tools) inside the unit.
- Do not watch or fix your eyes on the unit’s display when you are driving for any extended period.
- If you experience problems during installation, consult your KENWOOD dealer.

Precautions on using this unit

- When you purchase optional accessories, check with your KENWOOD dealer to make sure that they work with your model and in your area.
- You can select language to display menus, audio file tags, etc. See User Interface Setup (P.72).
- The Radio Data System or Radio Broadcast Data System feature won’t work where the service is not supported by any broadcasting station.
- The unit may not function properly if the connectors between the unit and front panel are dirty. Detach the front panel and clean the connector with a cotton swab gently, being careful not to damage the connector.

Protecting the monitor

- To protect the monitor from damage, do not operate the monitor using a ball point pen or similar tool with the sharp tip.

Cleaning the unit

- If the faceplate of this unit is stained, wipe it with a dry soft cloth such as a silicon cloth. If the faceplate is stained badly, wipe the stain off with a cloth moistened with neutral cleaner, then wipe it again with a clean soft dry cloth.

NOTE

- Applying spray cleaner directly to the unit may affect its mechanical parts. Wiping the faceplate with a hard cloth or using a volatile liquid such as thinner or alcohol may scratch the surface or erase screened print.

Lens fogging

When you turn on the car heater in cold weather, dew or condensation may form on the lens in the disc player of the unit. Called lens fogging, this condensation on the lens may not allow discs to play. In such a situation, remove the disc and wait for the condensation to evaporate. If the unit still does not operate normally after a while, consult your KENWOOD dealer.

Precautions on handling discs

- Do not touch the recording surface of the disc.
- Do not stick tape etc. on the disc, or use a disc with tape stuck on it.
- Do not use disc type accessories.
- Clean from the center of the disc and move outward.
- When removing discs from this unit, pull them out horizontally.
- If the disc center hole or outside rim has burrs, use the disc only after removing the burrs with a ballpoint pen etc.
- Discs that are not round cannot be used.
- 8-cm (3 inch) discs cannot be used.
- Discs with coloring on the recording surface or discs that are dirty cannot be used.
- This unit can only play the CDs with the mark.
- This unit may not correctly play discs which do not have the mark.
- You cannot play a disc that has not been finalized. (For the finalization process see your

Acquiring GPS signal
The first time you turn on this unit, you must wait while the system acquires satellite signals for the first time. This process could take up to several minutes. Make sure your vehicle is outdoors in an open area away from tall buildings and trees for fastest acquisition. After the system acquires satellites for the first time, it will acquire satellites quickly each time thereafter.

Caution for Smartphone Users
Simultaneously running multiple applications on your smartphone while screen sharing places heavy demand on the microprocessor of the phone, potentially affecting communication and performance.
For best results while pairing with your Kenwood receiver, please be sure to close any unused applications by performing the following steps:
Android operating system example:
• Turn off WiFi in phone settings menu.
• Close all open applications before connecting for in-car use. Hold the <Home> key and select <Close all> to close all open applications.
• Clear RAM Memory of the Android phone before connecting for in-car use. Hold the <Home> key and select <Task Manager> then select <RAM> then select <Clear memory> to clear current memory processes.

Safety Precautions and Important Information
Read this information carefully before starting to operate the KENWOOD Car Navigation System and follow the instructions in this manual. Neither KENWOOD nor Garmin shall be liable for problems or accidents resulting from failure to observe the instructions in this manual.

WARNING
Failure to avoid the following potentially hazardous situations could result in an accident or collision resulting in death or serious injury.
When navigating, carefully compare information displayed on the navigation system to all available navigation sources, including information from street signs, visual sightings, and maps. For safety, always resolve any discrepancies or questions before continuing navigation.
Always operate the vehicle in a safe manner. Do not become distracted by the navigation system while driving, and always be fully aware of all driving conditions. Minimize the amount of time spent viewing the screen of the navigation system while driving, and use voice prompts when possible.
Do not enter destinations, change settings, or access any functions requiring prolonged use of the navigation system controls while driving. Stop your vehicle in a safe and legal manner before attempting such operations.
Keep the system volume at a low enough level to be able to hear outside noises while driving. If you can no longer hear outside noises, you may be unable to react adequately to the traffic situation. This may cause accidents.
The navigation system will not display the correct current position of the vehicle the first time it is used after purchase, or if the vehicle battery is disconnected. GPS satellite signals will soon be received, however, and the correct position will be displayed.
Be careful of the ambient temperature. Using the navigation system at extreme temperatures can lead to malfunction or damage. Also note that the unit can be damaged by strong vibration, by metal objects, or by water getting inside the unit.
Before Use

⚠️ CAUTION

Failure to avoid the following potentially hazardous situations may result in injury or property damage.

The navigation system is designed to provide you with route suggestions. It does not reflect road closures or road conditions, weather conditions, or other factors that may affect safety or timing while driving.

Use the navigation system only as a navigational aid. Do not attempt to use the navigation system for any purpose requiring precise measurement of direction, distance, location, or topography.

The Global Positioning System (GPS) is operated by the United States government, which is solely responsible for its accuracy and maintenance. The government system is subject to changes that could affect the accuracy and performance of all GPS equipment, including the navigation system.

Although the navigation system is a precision navigation device, any navigation device can be misused or misinterpreted and, therefore, become unsafe.

重要内容

Vehicle Battery Preservation

This navigation system can be used when the ignition key is turned to ON or ACC. To preserve the battery, however, it should be used with the engine running whenever possible. Using the navigation system for a long time with the engine switched off can cause the battery to run down.

Map Data Information

One of the goals of Garmin is to provide customers with the most complete and accurate cartography that is available to us at a reasonable cost. We use a combination of governmental and private data sources, which we identify in product literature and copyright messages displayed to the consumer. Virtually all data sources contain some inaccurate or incomplete data. In some countries, complete and accurate map information is either not available or is prohibitively expensive.

How to read this manual

- The screens and panels shown in this manual are examples used to provide clear explanations of the operations. For this reason, they may be different from the actual screens or panels used, or some display patterns may be different.

- Indication language: English indications are used for the purpose of explanation. You can select the indication language from the SETUP menu. See User Interface Setup (P.72).

Information for using Bluetooth® devices

Bluetooth is a short-range wireless radio communication technology for mobile devices such as mobile phones, portable PCs, and other devices. Bluetooth devices can be connected without cables and communicate with each other.

**NOTE**

- While driving, do not perform complicated operations such as dialing numbers, using the phone book, etc. When you perform these operations, stop your car in a safe place.
- Some Bluetooth devices may not connect to this unit depending on the Bluetooth version of the device.
- This unit may not work for some Bluetooth devices.
- Connecting conditions may vary depending on your environment.
- For some Bluetooth devices, the device is disconnected when the unit is turned off.

About the cell-phone and Bluetooth audio player

This unit conforms to the following Bluetooth specifications:

**Version**
- Bluetooth Ver. 3.0

**Profile**
- **Cell-phone:**
  - HFP (V1.6) (Hands Free Profile)
  - SPP (Serial Port Profile)
  - PBAP (Phonebook Access Profile)
- **Audio player:**
  - A2DP (Advanced Audio Distribution Profile)

5. Touch ◀ or ▶ to adjust the sound level of the selected speaker.

**NOTE**
- To return to the initial setting of Delay and Level, touch **Initialize** and **YES** in the confirmation screen.
Remote control

This unit can be operated using the remote control KNA-RCDV331 (optional accessory).

⚠️ CAUTION

- Put the remote control in a place where it will not move during braking or other operations. A dangerous situation could result, if the remote control falls down and gets wedged under the pedals while driving.
- Do not leave the battery near fire or under direct sunlight. A fire, explosion or excessive heat generation may result.
- Do not recharge, short, break up or heat the battery or place it in an open fire. Such actions may cause the battery to leak fluid. If spilled fluid comes in contact with your eyes or on clothing, immediately rinse with water and consult a physician.
- Place the battery out of reach of children. In the unlikely event that a child swallows the battery, immediately consult a physician.

Battery Installation

If the remote control operates only over shorter distances or does not operate at all, it is possible that the batteries are depleted. In such instances, replace the both batteries with new ones.

1. Insert two “AAA”/“R03”-size batteries with the positive and negative poles aligned properly, following the illustration inside the case.
Functions of the Remote control Buttons

Switch the operation mode
The functions operated from the remote control differ depending on the position of the mode switch.

- **AUD mode**
  Switch to this mode when controlling a selected source or tuner source, etc.

- **DVD mode**
  Switch to this mode when playing a disc media including DVD, VCD, and CD.

- **NAV mode**
  Switch to this mode when controlling navigation function.

- **TV mode**
  Not used.

NOTE
- When controlling a player that is not integrated in the unit, select “AUD” mode.

Direct search mode
Using the remote control, you can jump directly to the desired file, track chapter, etc. with entering the number corresponding to the content.

NOTE
- This operation cannot be performed for USB device and iPod.

1. Press the #BS button several times until the desired content appears.
   The available contents are different depending on the source.
   - **DVD**
     Title number/Chapter number
   - **VCD 1.X and 2.X (PBC OFF)**
     Track number
   - **VCD 2.X (PBC ON)**
     Scene number/Track number
   - **Music CD**
     Track number
   - **HD Radio tuner**
     Frequency value/Channel number
   - **SiriusXM**
     Channel number

2. Enter the number of the content you want to play using the numeric keypad.

3. For DVD or VCD, music CD, press the ENTER button.
   For radio, press the ◀ or ▶ button.
   The content you entered is played.

Before Installation

Before installation of this unit, please note the following precautions.

⚠️ WARNINGS

• If you connect the ignition wire (red) and the battery wire (yellow) to the car chassis (ground), you may cause a short circuit, that in turn may start a fire. Always connect those wires to the power source running through the fuse box.

• Do not cut out the fuse from the ignition wire (red) and the battery wire (yellow). The power supply must be connected to the wires via the fuse.

⚠️ CAUTION

• Install this unit in the console of your vehicle. Do not touch the metal part of this unit during and shortly after the use of the unit. Metal part such as the heat sink and enclosure become hot.

NOTE

• Mounting and wiring this product requires skills and experience. For best safety, leave the mounting and wiring work to professionals.

• Make sure to ground the unit to a negative 12V DC power supply.

• Do not install the unit in a spot exposed to direct sunlight or excessive heat or humidity. Also avoid places with too much dust or the possibility of water splashing.

• Do not use your own screws. Use only the screws provided. If you use the wrong screws, you could damage the unit.

• If the power is not turned ON (“There is an error in the speaker wiring. Please check the connections.” is displayed), the speaker wire may have a short-circuit or touched the chassis of the vehicle and the protection function may have been activated. Therefore, the speaker wire should be checked.

• If your car’s ignition does not have an ACC position, connect the ignition wires to a power source that can be turned on and off with the ignition key. If you connect the ignition wire to a power source with a constant voltage supply, such as with battery wires, the battery may be drained.

• If the console has a lid, make sure to install the unit so that the front panel will not hit the lid when closing and opening.

• If the fuse blows, first make sure the wires aren’t touching to cause a short circuit, then replace the old fuse with one with the same rating.

• Insulate unconnected wires with vinyl tape or other similar material. To prevent a short circuit, do not remove the caps on the ends of the unconnected wires or the terminals.

• Connect the speaker wires correctly to the terminals to which they correspond. The unit may be damaged or fail to work if you share the ✦ wires or ground them to any metal part in the car.

• When only two speakers are being connected to the system, connect the connectors either to both the front output terminals or to both the rear output terminals (do not mix front and rear). For example, if you connect the ✦ connector of the left speaker to a front output terminal, do not connect the ✦ connector to a rear output terminal.

• After the unit is installed, check whether the brake lamps, blinkers, wipers, etc. on the car are working properly.

• Mount the unit so that the mounting angle is 30° or less.

• This unit has the cooling fan to decrease the internal temperature. Do not mount the unit in a place where the cooling fan of the unit is blocked. Blocking these openings will inhibit the cooling of the internal temperature and result in malfunction.
• Do not press hard on the panel surface when installing the unit to the vehicle. Otherwise scars, damage, or failure may result.
• Reception may drop if there are metal objects near the Bluetooth antenna.

Installation procedure

1) To prevent a short circuit, remove the key from the ignition and disconnect the terminal of the battery.
2) Make the proper input and output wire connections for each unit.
3) Connect the speaker wires of the wiring harness.
4) Connect the wiring harness wires in the following order; ground, battery, ignition.
5) Connect the wiring harness connector to the unit.
6) Install the unit in your car.
7) Reconnect the terminal of the battery.
8) Perform the Initial Setup. See Initial setup (P.9).

Installing the unit

Non-Japanese cars (DNX694S)

Bend the tabs of the mounting sleeve with a screwdriver or similar utensil and attach it in place.

Japanese cars

NOTE
- Make sure that the unit is installed securely in place. If the unit is unstable, it may malfunction (eg, the sound may skip).

Trim plate (DNX694S)

1) Attach accessory 8 to the unit.
GPS antenna

GPS antenna is installed inside of the car. It should be installed as horizontally as possible to allow easy reception of the GPS satellite signals.

To mount the GPS antenna inside your vehicle:
1) Clean your dashboard or other surface.
2) Remove the separator of the metal plate (accessory 10).
3) Press the metal plate (accessory 10) down firmly on your dashboard or other mounting surface. You can bend the metal plate (accessory 10) to conform to a curved surface, if necessary.
4) Remove the separator of the GPS antenna (accessory 9), and stick the antenna to the metal plate (accessory 10).

NOTE
• Depending on the type of car, reception of the GPS satellite signals might not be possible with an inside installation.
• Please install this GPS antenna in an area away from any antennas that are used with CB radios or satellite televisions.
• The GPS antenna should be installed at a position that is spaced at least 12 inch (30 cm) from cellular phone or other transmitting antennas. Signals from the GPS satellite may be interfered with by these types of communication.
• Painting the GPS antenna with (metallic) paint may cause a drop in performance.

Microphone unit

1) Check the installation position of the microphone (accessory 4).
2) Clean the installation surface.
3) Remove the separator of the microphone (accessory 4), and stick the microphone to the place shown below.
4) Wire the microphone cable up to the unit with it secured at several positions using tape or other desired method.
5) Adjust the direction of the microphone (accessory 4) to the driver.
### Removing the trim plate (DNX694S)

1) Engage the catch pins on the extraction key (accessory 5) and remove the two locks on the lower level. Lower the trim plate (accessory 8) and pull it forward as shown in the figure.

![Diagram of trim plate removal](image)

**NOTE**
- The trim plate can be removed from the top side in the same manner.

2) When the lower level is removed, remove the upper two locations.

![Diagram of upper trim plate removal](image)

### Removing the unit (DNX694S)

1) Remove the trim plate by referring to step 1 in “Removing the trim plate”.

2) Insert the two extraction key (accessory 5) deeply into the slots on each side, as shown.

![Diagram of extraction key insertion](image)

3) Lower the extraction key toward the bottom, and pull out the unit halfway while pressing towards the inside.

![Diagram of unit removal](image)

**NOTE**
- Be careful to avoid injury from the catch pins on the extraction key.

4) Pull the unit all the way out with your hands, being careful not to drop it.

Connecting wires to terminals

When using the optional power amplifier, connect to its power control terminal. (Max. 200mA, 12V)

Depending on what antenna you are using, connect either to the control terminal of the motor antenna, or to the power terminal for the booster amplifier of the film-type antenna. (Max. 300mA, 12V)

For best safety, be sure to connect the parking sensor.

If no connections are made, do not let the cable come out from the tab.

To use the steering wheel remote control feature, you need an exclusive remote adapter (not supplied) matched to your car.

Connect to vehicle's reverse lamp harness when using the optional rear view camera.

Connect to the vehicle's parking brake detection switch harness.

For best safety, be sure to connect the parking sensor.

Troubleshooting

Problems and Solutions

If any trouble occurs, first check the following table for possible problems.

NOTE

• Some functions of this unit may be disabled by some settings made on this unit.
• What might seem to be a malfunction in your unit may just be the result of slight misoperation or miswiring.

About settings

• Cannot set up the subwoofer.
• Cannot set up subwoofer phase.
• No output from the subwoofer.
• Cannot set up the low pass filter.
• Cannot set up the high pass filter.
Subwoofer is not set to on.
  ▶ Set the subwoofer to on. See Speaker/ X’over setup (P.77).
  The dual zone function is enabled.
  ▶ Set the dual zone function to off. See Zone Control (P.80).

• Cannot select the output destination of the subsource in the dual zone.
• Cannot adjust the volume of the rear speakers.
  The dual zone function is disabled.
  ▶ Set the dual zone function to on. See Zone Control (P.80).

• Cannot set up the equalizer.
• Cannot set up the crossover network.
  The dual zone function is enabled.
  ▶ Set the dual zone function to off. See Zone Control (P.80).

About audio operations

Radio reception is poor.
The car antenna is not extended.
  ▶ Pull out the antenna all the way.
The antenna control wire is not connected.
  ▶ Connect the wire correctly. See Connecting the system and external components (P.94).

Cannot select a folder.
The random play function is enabled.
  ▶ Turn off the random function.

Cannot perform repeat play during VCD playback.
The PBC function is enabled.
  ▶ Turn off the PBC function.

The specified disc does not play, but another one plays instead.
The disc is quite dirty.
  ▶ Clean the disc. See Precautions on handling discs (P.4).
The disc is severely scratched.
  ▶ Try another disc instead.

The sound skips when an audio file is being played.
The disc is scratched or dirty.
  ▶ Clean the disc. See Precautions on handling discs (P.4).
The recording condition is bad.
  ▶ Record the file again or use another disc.

Other

The Touch Sensor Tone doesn’t sound.
The preout jack is being used.
  ▶ The Touch Sensor Tone cannot be output from the preout jack.

Android smartphone operation is slow.
This occurs when multiple applications are started on the Android smartphone.
  ▶ For details, see Caution for Smartphone Users (P.5).

Error Messages

When you fail to operate the unit correctly, the cause of the failure appears as the message on the screen.

here is an error in the speaker wiring. Please check the connections.
Protective circuit has been activated because a speaker cord has shorted or it has come in contact with the car chassis.
  ▶ Wire or insulate the speaker cord as appropriate and turn the power off and on again.

Hot Error
When the internal temperature of this unit rises to 60°C or more, the protection circuit is activated and you may not be able to operate the unit.
  ▶ Use the unit again after reducing the temperature of the unit.

Mecha Error
The disc player is malfunctioning.
  ▶ Eject the disc and try inserting it again. Contact the KENWOOD dealer if this indicator continues blinking or the disc cannot be ejected.
Troubleshooting

Disc Error
An unplayable disc is inserted.
▷ Change the disc. See Playable Media and Files (P.98).

Read Error
The disc is quite dirty.
▷ Clean the disc. See Precautions on handling discs (P.4).
Disc is upside down.
▷ Load the disc with the labeled side up.

Region Code Error
The disc you wanted to play has a region code that cannot be played with this unit.
▷ See Region Codes in the World (P.100) or try another disc.

Error 07−67
The unit is not operating correctly due to some reason or other.
▷ Turn the power off and on again. If the “Error 07−67” message does not disappear, see your nearest KENWOOD dealer.

No Device (USB device)
The USB device is selected as a source although no USB device is connected.
▷ Change the source to any source other than USB/iPod. Connect a USB device, and change the source to USB again.

Disconnected (iPod, Bluetooth audio player)
The iPod/Bluetooth audio player is selected as a source although no iPod/Bluetooth audio player is connected.
▷ Change the source to any source other than iPod/Bluetooth. Connect an iPod/Bluetooth audio player, and change the source to iPod/Bluetooth again.

No Media file
The connected USB device contains no playable audio file. Media was played that doesn’t have data recorded that the unit can play.
▷ See Playable Media and Files (P.98) and try another USB device.

USB device over current status detected.
The connected USB device is rated a current capacity higher than the allowable limit.
▷ Check the USB device. Some trouble may have occurred to the connected USB device.
▷ Change the source to any source other than USB. Remove the USB device.

Navigation Error. Please turn on power again later.
The communication error has occurred due to severely cold temperature.
▷ Turn on power again after warming your car interior.

SiriusXM

Check Tuner
A SiriusXM tuner is not connected to this unit.
▷ Verify that the SiriusXM Connect Vehicle Tuner cable is securely connected to the radio.

Subscription Updated - Press Return To Continue
The SiriusXM subscription has been renewed.
▷ Pressing the Control knob will clear the message.

SXM Chan Unavailable
The currently selected channel is unavailable.
▷ —

SXM Ch Unsubscribed
The currently selected channel is not subscribed to.
▷ —

SXM Check Antenna
No antenna is connected to the SiriusXM tuner.
▷ Check that an antenna is connected to the SiriusXM tuner. Check antenna for damages.

SXM No Signal
No SiriusXM radio signal is received.
▷ Verify that your vehicle is outdoors with a clear view of the sky.

Channel Locked
The selected channel has been locked by the parental controls.
▷ Enter the unlock code when you are asked. See Parental Control (P.54).

Incorrect Pass Code entered
The selected channel is a mature or parental lock channel, and locked by the parental lock or user lock code.
▷ Enter the correct lock code.

### Use of DualDisc

When playing a “DualDisc” on this unit, the surface of the disc that is not played may be scratched while the disc is inserted or ejected. Since the music CD surface does not conform to the CD standard, playback may be impossible.

(A “DualDisc” is a disc with one surface containing DVD standard signals and the other surface containing music CD signals.)

### About disc format

The disc format should be the one of the following.

- ISO 9660 Level 1/2  
- Joliet  
- Romeo  
- Long file name
### About files

The following audio and video files are supported.

- If music of normal CD and other playback systems are recorded in the same disc, only the playback system recorded at the first setout is played.
- WMA and AAC of which is covered with DRM cannot be played.
- DSD sound is converted to PCM sound before playback.
- The EmChinks tag of DSDIFF is not supported.
- Although the audio files are complied with the standards listed above, the play may be impossible depending on the types or conditions of media or device.
- This unit supports playback of High-Resolution Audio files.
  It is recommended that a car audio system should be configured with all High-Resolution Audio compatible products from player to speaker to enjoy its high quality sound.

Region Codes in the World

The DVD players are given a region code according to the country or area it is marketed, as shown in the following map.

DVD disc marks

ALL

Indicates a region number. The discs with this mark can be played with any DVD player.

8

Indicates the number of audio languages recorded. Up to 8 languages can be recorded in a movie. You can select a favorite language.

32

Indicates the number of subtitled languages recorded. Up to 32 languages can be recorded.

If a DVD disc has scenes shot from multiple angles, you can select a favorite angle.

16:9 LB

Indicates the type of screen for the image. The left mark indicates that a wide image picture (16:9) is displayed on a standard TV set screen (4:3) with a black band at both the top and bottom of the screen (letter box).

Operation regulatory marks

With this DVD, some functions of this unit such as the play function may be restricted depending on the location where the DVD is playing. In this case, the following marks will appear on the screen. For more information, refer to the disc manual.

Prohibition Mark

Discs with limited period of use

Do not leave discs with a limited period of use in this unit. If you load an already expired disc, you may not be able to remove it from this unit.

■ FCC WARNING
This equipment may generate or use radio frequency energy. Changes or modifications to this equipment may cause harmful interference unless the modifications are expressly approved in the instruction manual. The user could lose the authority to operate this equipment if an unauthorized change or modification is made.

NOTE
• This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.
• This equipment may cause harmful interference to radio communications, if it is not installed and used in accordance with the instructions. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
  – Reorient or relocate the receiving antenna.
  – Increase the separation between the equipment and receiver.
  – Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
  – Consult the dealer or an experienced radio/TV technician for help.

■ CAUTION
Use of controls or adjustments or performance of procedures other than those specified herein may result in hazardous radiation exposure.
In compliance with Federal Regulations, following are reproductions of labels on, or inside the product relating to laser product safety.

JVC KENWOOD Corporation
2967-3, ISHIKAWA-MACHI,
HACHIOJI-SHI, TOKYO, JAPAN

THIS PRODUCT COMPLIES WITH DHHS RULES 21 CFR SUBCHAPTER J IN EFFECT AT DATE OF MANUFACTURE.

Location: Top plate

This transmitter must not be co-located or operated in conjunction with any other antenna or transmitter.

■ IC (Industry Canada) Notice
This device complies with Industry Canada licence-exempt RSS standard(s).
Operation is subject to the following two conditions:
(1) This device may not cause interference, and
(2) this device must accept any interference, including interference that may cause undesired operation of the device.

▲ CAUTION
This equipment complies with FCC/IC radiation exposure limits set forth for an uncontrolled environment and meets the FCC radio frequency (RF) Exposure Guidelines and RSS-102 of the IC radio frequency (RF) Exposure rules. This equipment has very low levels of RF energy that is deemed to comply without maximum permissive exposure evaluation (MPE). But it is desirable that it should be installed and operated keeping the radiator at least 20 cm or more away from person’s body.

Información acerca de la eliminación de equipos eléctricos y electrónicos al final de la vida útil (aplicable a los países que hayan adoptado sistemas independientes de recogida de residuos)

Los productos con el símbolo de un contenedor con ruedas tachado no podrán ser desechados como residuos domésticos.

Los equipos eléctricos y electrónicos al final de la vida útil, deberán ser reciclados en instalaciones que puedan dar el tratamiento adecuado a estos productos y a sus subproductos residuales correspondientes. Póngase en contacto con su administración local para obtener información sobre el punto de recogida más cercano.

Un tratamiento correcto del reciclaje y la eliminación de residuos ayuda a conservar los recursos y evita al mismo tiempo efectos perjudiciales en la salud y el medio ambiente.

Informação sobre a eliminação de pilhas

Este produto não deve ser eliminado como lixo doméstico geral. Devolva a pilha usada ao revendedor ou entidade autorizada para que a mesma seja devolvida ao fabricante ou importador.

A reciclagem e a eliminação de lixo de maneira apropriada ajudarão a conservar os recursos naturais ao mesmo tempo que prevenirão os efeitos prejudiciais à nossa saúde e ao meio ambiente.

Para cumplimiento de la IFT:
“La operación de este equipo está sujeta a las siguientes dos condiciones:
(1) es posible que este equipo o dispositivo no cause interferencia perjudicial y
(2) este equipo o dispositivo debe aceptar cualquier interferencia, incluyendo la que pueda causar su operación no deseada.”
