Precautions

⚠️ WARNINGS

- To prevent injury or fire, take the following precautions:
  - To prevent a short circuit, never put or leave any metallic objects (such as coins or metallic tools) inside the unit.
  - Do not watch or fix your eyes on the unit’s display when you are driving for any extended period.
  - If you experience problems during installation, consult your KENWOOD dealer.

- Precautions on using this unit
  - When you purchase optional accessories, check with your KENWOOD dealer to make sure that they work with your model and in your area.
  - You can select a language to display menus, audio file tags, etc. See User Interface Setup (P.84).
  - The Radio Data System or Radio Broadcast Data System feature won’t work in areas where the service is not supported by any broadcasting station.

- Protecting the monitor
  - To protect the monitor from damage, do not operate the monitor using a ball point pen or similar tool with a sharp tip.

- Cleaning the unit
  - If the faceplate of this unit is stained, wipe it with a dry soft cloth such as a silicon cloth. If the faceplate is stained badly, wipe it with a cloth moistened with neutral cleaner, then wipe it again with a clean soft dry cloth.

**NOTE**

- Applying spray cleaner directly to the unit may damage its mechanical parts. Wiping the faceplate with a hard cloth or using a volatile liquid such as thinner or alcohol may scratch the surface or erase the screened print.

- Lens fogging
  - When you turn on the car heater in cold weather, dew may form on the lens in the disc player of the unit due to condensation. This condensation on the lens (also called lens fogging) may not allow discs to play. In such a situation, remove the disc and wait for the dew to evaporate. If the unit still does not operate normally after a while, consult your KENWOOD dealer.

- Precautions on handling discs
  - Do not touch the recording surface of the disc.
  - Do not stick tape etc. on the disc, or use a disc with tape stuck on it.
  - Do not use disc type accessories.
  - Clean the disc from the center toward the outside rim.
  - When removing a disc from this unit, pull it out horizontally.
  - If the disc center hole or outside rim has burrs, use the disc only after removing the burrs with a ballpoint pen etc.
  - Discs that are not round cannot be used.

- 8-cm (3 inch) discs cannot be used.
- Discs with coloring on the recording surface or discs that are dirty cannot be used.
- This unit can only play the following types of CDs.

- This unit may not correctly play discs which do not have the mark.
- You cannot play a disc that has not been finalized. (For the finalization process, see your writing software and your recorder’s instruction manual.)
■ Acquiring GPS signal
The first time you turn on this unit, you must wait while the system acquires satellite signals for the first time. This process could take up to several minutes. Make sure your vehicle is outdoors in an open area away from tall buildings and trees for fastest acquisition. After the system acquires satellites for the first time, it will acquire satellites quickly each time thereafter.

■ About GLONASS
This unit uses Global Navigation Satellite System (GLONASS) in addition to GPS. Combining GPS and GLONASS can refine positioning accuracy than using GPS only.

■ Caution for Smartphone Users
Simultaneously running multiple applications on your smartphone while screen sharing places heavy demand on the microprocessor of the phone, potentially affecting communication and performance. For best results while pairing with your Kenwood receiver, please be sure to close any unused applications.

When tuning in a SmartFavorites channel, songs will be played from the beginning of each track (TuneStart™). You can enable/disable TuneStart. (see TuneStart™ (P.65))

NOTE
• Compatible with SXV200 or later tuner models.

TuneScan™

TuneScan™ is a feature that plays samples from the starts of multiple buffered songs from each of the SmartFavorites channels that predominantly play music selections. You have easy access to a large sampling of music content and can enjoy hearing a full song by stopping the scan on a song of interest.

1 Touch ▶ on the left side of the screen.
2 Touch TuneScan to begin scanning your SmartFavorites channels.
3 While your favorite song is being played, touch TuneScan again to start listening to that song.

Scan finishes and the song is played continuously.

NOTE
• To cancel TuneScan™, touch the left side of the screen. Touch TuneScan.
• Touch and hold TuneScan to cancel TuneScan, and the music/content which was present on the channel before starting TuneScan will be played.
• Compatible with SXV200 or later tuner models.

Information for using Bluetooth® devices

Bluetooth®

Bluetooth is a short-range wireless radio communication technology for mobile devices such as cell-phones, portable PCs, and other devices. Bluetooth devices can be connected without cables and communication with each other.

NOTE

- While driving, do not perform complicated operations such as dialing numbers, using the phone book, etc. When you perform these operations, stop your car in a safe place.
- Some Bluetooth devices may not be connected to this unit depending on the Bluetooth version of the device.
- This unit may not work for some Bluetooth devices.
- Connecting conditions may vary depending on your environment.
- Some Bluetooth devices are disconnected when this unit is turned off.
- The Bluetooth devices cannot be used while using Apple CarPlay.
- The Bluetooth currently connected with other device is disconnected when an iPhone compatible with Apple CarPlay is connected.

About the cell-phone and Bluetooth audio player

This unit conforms to the following Bluetooth specifications:

Version

Bluetooth Ver. 5.0

Profiles

Cell-phone:
HFP (V1.7) (Hands Free Profile)
SPP (Serial Port Profile)
PBAP (Phonebook Access Profile)

Audio player:
A2DP (Advanced Audio Distribution Profile)
AVRCP (V1.6) (Audio/Video Remote Control Profile)

Sound codec
SBC, AAC

NOTE

- The units supporting the Bluetooth function have been certified for conformity with the Bluetooth Standard according to the procedure prescribed by Bluetooth SIG.
- However, it may be impossible for such units to communicate with your cell-phone depending on its type.
Register the Bluetooth device

It is necessary to register the Bluetooth audio player or cell-phone in this unit before using the Bluetooth function.

You can register up to 10 Bluetooth devices.

**NOTE**
- Up to 10 Bluetooth devices can be registered. If an attempt is made to register the 11th Bluetooth device, the Bluetooth device connected on the earliest date will be deleted to register the 11th one.
- This unit is compatible with the Apple Easy Pairing function. When an iPod touch or iPhone connected via USB terminal previously is connected again, an authentication dialog appears. Performing operation for authentication on this unit or iOS smartphone registers the smartphone as a Bluetooth device.

3. Touch Position / DTA.
   - Set up Listening Position (P.97)
   - Set up Front Focus (P.97)

Listening Position

Adjust the sound delay time so that the sounds from different speakers arrive at the listener sitting on the selected seat at the same time.

1. Touch Listening Position on the Position / DTA screen.
2. Select a listening position from Front R (Right front), Front L (Left front), Front All (All front), and All.

Position DTA control

You can fine-adjust your listening position.

1. Touch Adjust.
2. Touch Delay.

3. Touch ◀ or ▶ to adjust the delay time of the selected speaker.

4. Touch Level.
5. Touch ◀ or ▶ to adjust the sound level of the selected speaker.

NOTE

- To initialize the Delay and Level settings, touch Initialize and YES on the confirmation screen.

Front Focus

You can focus the imaginary sound image on the front of the selected seat.

1. Touch Front Focus in the Position / DTA screen.
2. Select a front focus position.
   For Front All and All, select Priority L or R depending on which side you want to put the imaginary sound image.
### Controlling Audio

#### Front Focus fine adjustment

1. Touch **Adjust**.
2. Touch **Delay**.
3. Set each parameter as follows.
   - **Sound Image LR (Front)**: Focus the sound image on the front of front seats.
   - **Sound Image LR (Rear)**: Focus the sound image on the front of rear seats.
   - **Size of the Virtual Sound Field**: Adjust the size of sound image to meet your taste. If the sound image is shifted from the front, move it back by **Sound Image LR (Front)** or **Sound Image LR (Rear)**.
   - **Subwoofer Delay**: Adjust the delay time of subwoofer sound.

4. Touch **Level**.
5. Touch ◀ or ▶ to adjust the sound level of the selected speaker.

#### Audio Setup memory

Audio Control settings can be memorized. The memorized settings can be recalled at any time.

1. Press the **MENU** button. ➔ Popup menu appears.
2. Touch **Audio**. ➔ Audio screen appears.
3. Touch **Audio Memory**.

- **SETUP Memory**: Lock or unlock the Audio SETUP Memory/Recall/Clear.
- **Audio SETUP Memory**: Memorize the current audio settings.
  - Fader / Balance, Speaker / X’over, Equalizer (User Preset, SW Level), Position / DTA, Sound Effect (*P.90*)
- **Audio SETUP Recall**: Recall the memorized audio setting.
- **Audio SETUP Clear**: Clear the Audio SETUP Memory and the currently memorized audio settings.

---

**NOTE**

- To initialize the Delay and Level settings, touch **Initialize** and **YES** on the confirmation screen.
Remote control

This unit can be operated using the remote control.
For DDX819WBTL, the remote control is supplied with the unit.
For DDX9906XR, DDX8906S, DDX8706S, DMX906S and DMX9706S, the remote control is the optional accessory (KNA-RCDV331).

⚠️ CAUTION

• Put the remote control in a place where it will not move during braking or other operations. A dangerous situation could result, if the remote control falls down and gets wedged under the pedals while driving.
• Do not leave the battery near fire or under direct sunlight. A fire, explosion or excessive heat generation may result.
• Do not recharge, short, break up or heat the battery or place it in an open fire. Such actions may cause the battery to leak fluid. If spilled fluid comes in contact with your eyes or on clothing, immediately rinse with water and consult a physician.
• Place the battery out of reach of children. In the unlikely event that a child swallows the battery, immediately consult a physician.

Battery Installation

If the remote control operates only over shorter distances or does not operate at all, it is possible that the batteries are depleted. In such instances, replace the both batteries with new ones.

1 Insert two “AAA”/“R03”-size batteries with the + and – poles aligned properly, following the illustration inside the case.

Functions of the Remote control Buttons

Switch the operation mode

The functions operated from the remote control differ depending on the position of the mode switch.

AUD mode
Switch to this mode when controlling a selected source or tuner source, etc.

DVD mode
Switch to this mode when playing a disc media including DVD, VCD, and CD.

NAV mode/TV mode
Not used.

NOTE

• When controlling a player that is not integrated in the unit, select “AUD” mode.

Direct search mode

Using the remote control, you can jump directly to the desired file, track chapter, etc. by entering the number corresponding to the content.

NOTE

• This operation cannot be performed for the USB device and iPod.

1 Press the #BS/DIRECT button several times until the desired content appears. The available contents are different depending on the source type.

Connection/Installation

Before Installation

Before installation of this unit, please note the following precautions.

⚠️ WARNINGS
- If you connect the ignition wire (red) and the battery wire (yellow) to the car chassis (ground), you may cause a short circuit, that in turn may start a fire. Always connect those wires to the power source running through the fuse box.
- Do not cut out the fuse from the ignition wire (red) and the battery wire (yellow). The power supply must be connected to the wires via the fuse.

⚠️ CAUTION
- Install this unit in the console of your vehicle. Do not touch the metal part of this unit during and shortly after the use of the unit. Metal part such as the heat sink and enclosure become hot.

NOTE
- Mounting and wiring this product requires skills and experience. For best safety, leave the mounting and wiring work to professionals.
- Make sure to ground the unit to a negative 12V DC power supply.
- Do not install the unit in a spot exposed to direct sunlight or excessive heat or humidity. Also avoid places with too much dust or the possibility of water splashing.
- Do not use your own screws. Use only the screws provided. If you use the wrong screws, you could damage the unit.
- If the power is not turned ON (“There is an error in the speaker wiring. Please check the connections.” is displayed), the speaker wire may have a short-circuit or touched the chassis of the vehicle and the protection function may have been activated. Therefore, the speaker wire should be checked.
- If your car’s ignition does not have an ACC position, connect the ignition wires to a power source that can be turned on and off with the ignition key. If you connect the ignition wire to a power source with a constant voltage supply, such as with battery wires, the battery may be drained.
- If the console has a lid, make sure to install the unit so that the front panel will not hit the lid when closing and opening.
- If the fuse blows, first make sure the wires aren’t touching to cause a short circuit, then replace the old fuse with one with the same rating.
- Insulate unconnected wires with vinyl tape or other similar material. To prevent a short circuit, do not remove the caps on the ends of the unconnected wires or the terminals.
- Connect the speaker wires correctly to the terminals to which they correspond. The unit may be damaged or fail to work if you share the ✆️ wires or ground them to any metal part in the car.
- When only two speakers are being connected to the system, connect the connectors either to both the front output terminals or to both the rear output terminals (do not mix front and rear). For example, if you connect the ✆️ connector of the left speaker to a front output terminal, do not connect the ✈️ connector to a rear output terminal.
- After the unit is installed, check whether the brake lamps, blinkers, wipers, etc. on the car are working properly.
- Mount the unit so that the mounting angle is 30° or less.
- This unit has the cooling fan to decrease the internal temperature. Do not mount the unit in a place where the cooling fan of the unit is blocked. Blocking these openings will inhibit the cooling of the internal temperature and result in malfunction.
In case of DDX9906XR

- Do not press hard on the panel surface when installing the unit to the vehicle. Otherwise scars, damage, or failure may result.
- Reception may drop if there are metal objects near the Bluetooth antenna.

**Installation procedure**

1. To prevent a short circuit, remove the key from the ignition and disconnect the terminal of the battery.
2. Make the proper input and output wire connections for each unit.
3) Connect the speaker wires of the wiring harness.

4) Connect the wiring harness wires in the following order; ground, battery, ignition.

5) Connect the wiring harness connector to the unit.

6) Install the unit in your car.

7) Reconnect the ground terminal of the battery.

8) Perform the Initial Setup.

   See Initial setup (P.8).

---

**Installing the unit**

### Non-Japanese cars

(Except DDX819WBTL)

- Bend the tabs of the mounting sleeve with a screwdriver or similar utensil and attach it in place.

### Japanese cars

- Bend the tabs of the mounting sleeve with a screwdriver or similar utensil and attach it in place.

### Trim plate

(Except DDX819WBTL)

1) Attach accessory ⑧ to the unit.

---

**NOTE**

- Make sure that the unit is installed securely in place. If the unit is unstable, it may malfunction (e.g., the sound may skip).
GPS antenna
(Except DDX819WBTL)

GPS antenna is installed inside of the car. It should be installed as horizontally as possible to allow easy reception of the GPS satellite signals.

To mount the GPS antenna inside your vehicle:
1) Clean your dashboard or other surface.
2) Remove the separator of the metal plate (accessory 10).
3) Press the metal plate (accessory 10) down firmly on your dashboard or other mounting surface. You can bend the metal plate (accessory 10) to conform to a curved surface, if necessary.
4) Remove the separator of the GPS antenna (accessory 9), and stick the antenna to the metal plate (accessory 10).

NOTE
• Use the supplied GPS antenna. Using the GPS antenna other than the supplied one may cause a drop in positioning accuracy.
• Depending on the type of car, reception of the GPS satellite signals might not be possible with an inside installation.
• Please install this GPS antenna in an area away from any antennas that are used with CB radios or satellite televisions.
• The GPS antenna should be installed at a position that is spaced at least 12 inch (30 cm) from cellular phone or other transmitting antennas. Signals from the GPS satellite may be interfered with by these types of communication.
• Painting the GPS antenna with (metallic) paint may cause a drop in performance.

Microphone unit

1) Check the installation position of the microphone (accessory 4).
2) Clean the installation surface.
3) Remove the separator of the microphone (accessory 4), and stick the microphone to the place shown below.
4) Wire the microphone cable up to the unit with it secured at several positions using tape or other desired method.
5) Adjust the direction of the microphone (accessory 4) to the driver.

Fix a cable with a commercial item of tape.
Removing the trim plate (Except DDX819WBTL)

1) Engage the catch pins on the extraction key (accessory 5) and remove the two locks on the lower level. Lower the trim plate (accessory 8) and pull it forward as shown in the figure.

2) When the lower level is removed, remove the upper two locations.

NOTE
• The trim plate can be removed from the top side in the same manner.

Removing the unit (Except DDX819WBTL)

1) Remove the trim plate by referring to step 1 in "Removing the trim plate".

2) Insert the two extraction key (accessory 5) deeply into the slots on each side, as shown.

3) Lower the extraction key toward the bottom, and pull out the unit halfway while pressing towards the inside.

NOTE
• Be careful to avoid injury from the catch pins on the extraction key.

4) Pull the unit all the way out with your hands, being careful not to drop it.

Troubleshooting

Problems and Solutions

If any trouble occurs, first check the following table for possible problems.

NOTE

• Some functions of this unit may be disabled by some settings made on this unit.
• What might seem to be a malfunction in your unit may just be the result of slight misoperation or miswiring.

About settings

• Cannot set up the subwoofer.
• Cannot set up subwoofer phase.
• No output from the subwoofer.
• Cannot set up the low pass filter.
• Cannot set up the high pass filter.
Subwoofer is not set to on.
➤ Set the subwoofer to on. See Speaker / X’over setup (P.91).
The dual zone function is enabled.
➤ Set the dual zone function to off. See Zone Control (P.95).

• Cannot select the output destination of the subsource in the dual zone.
• Cannot adjust the volume of the rear speakers.
The dual zone function is disabled.
➤ Set the dual zone function to on. See Zone Control (P.95).

• Cannot set up the equalizer.
• Cannot set up the crossover network.
The dual zone function is enabled.
➤ Set the dual zone function to off. See Zone Control (P.95).

About audio operations

Radio reception is poor.
The car antenna is not extended.
➤ Pull out the antenna all the way.
The antenna control wire is not connected.
➤ Connect the wire correctly. See Connecting the system and external components (P.109).

Cannot select a folder.
The random play function is enabled.
➤ Turn off the random function.

Cannot perform repeat play during VCD playback.
The PBC function is enabled.
➤ Turn off the PBC function.

The specified disc does not play, but another one plays instead.
The disc is quite dirty.
➤ Clean the disc. See Precautions on handling discs (P.4).
The disc is severely scratched.
➤ Try another disc instead.

The sound skips when an audio file is being played.
The disc is scratched or dirty.
➤ Clean the disc. See Precautions on handling discs (P.4).
The recording condition is bad.
➤ Record the file again or use another disc.

Others

The Touch Sensor Tone doesn’t sound.
The preout jack is being used.
➤ The Touch Sensor Tone cannot be output from the preout jack.

Error Messages

When you fail to operate the unit correctly, the cause of the failure appears as the message on the screen.

There is an error in the speaker wiring. Please check the connections.
Protective circuit has been activated because a speaker cord has shorted or it has come in contact with the car chassis.
➤ Wire or insulate the speaker cord as appropriate and turn the power off and on again.

Hot Error
When the internal temperature of this unit rises to 60°C or more, the protection circuit is activated and you may not be able to operate the unit.
➤ Use the unit again after reducing the temperature of the unit.

Mecha Error
The disc player is malfunctioning.
➤ Eject the disc and try inserting it again. Contact the KENWOOD dealer if this indicator continues blinking or the disc cannot be ejected.

Disc Error
An unplayable disc is inserted.
➤ Change the disc. See Playable Media and Files (P.117).

#### Use of DualDisc

When playing a “DualDisc” on this unit, the surface of the disc that is not played may be scratched while the disc is inserted or ejected. Since the music CD surface does not conform to the CD standard, playback may be impossible.  
(A “DualDisc” is a disc with one surface containing DVD standard signals and the other surface containing music CD signals.)

#### About disc format

The disc format should be the one of the following.  
• ISO 9660 Level 1, 2  
• Joliet  
• Romeo  
• Long file name

- If music of normal CD and other playback systems are recorded in the same disc, only the playback system recorded at the first setout is played.
- WMA and AAC files with DRM cannot be played.
- Although the audio files complies with the standards listed above, they may not be played depending on the types or conditions of media or device.
- This unit supports playback of High-Resolution Audio files.
  It is recommended that a car audio system should be configured with all High-Resolution Audio compatible products from player to speaker to enjoy its high quality sound.

- You can enter a folder name and file name with 254 (for Disc)/255 (for USB) or fewer single-byte characters.
- Files in the folder whose folder name begins with a dot (.) cannot be played.
Region Codes in the World

The DVD players are given a region code according to the country or area it is marketed, as shown in the following map.

- **DVD disc marks**
  - **ALL**
    - Indicates a region number. The discs with this mark can be played with any DVD player.
  - **8**
    - Indicates the number of audio languages recorded. Up to 8 languages can be recorded in a movie. You can select a favorite language.
  - **32**
    - Indicates the number of subtitled languages recorded. Up to 32 languages can be recorded.
  - **9**
    - If a DVD disc has scenes shot from multiple angles, you can select a favorite angle.
  - **16:9 LB**
    - Indicates the type of screen for the image. The left mark indicates that a wide image picture (16:9) is displayed on a standard TV set screen (4:3) with a black band at both the top and bottom of the screen (letter box).

- **Operation regulatory marks**
  - With this DVD, some functions of this unit such as the play function may be restricted depending on the location where the DVD is playing. In this case, the following marks will appear on the screen. For more information, refer to the disc manual.

- **Prohibition Mark**

- **Discs with limited period of use**
  - Do not leave discs with a limited period of use in this unit. If you load an already expired disc, you may not be able to remove it from this unit.

FCC WARNING
This equipment may generate or use radio frequency energy. Changes or modifications to this equipment may cause harmful interference unless the modifications are expressly approved in the instruction manual. The user could lose the authority to operate this equipment if an unauthorized change or modification is made.

NOTE
- This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.
- This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
  - Reorient or relocate the接收 antenna.
  - Increase the separation between the equipment and receiver.
  - Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
  - Consult the dealer or an experienced radio/TV technician for help.

CAUTION
Use of controls or adjustments or performance of procedures other than those specified herein may result in hazardous radiation exposure.
In compliance with Federal Regulations, following are reproductions of labels on, or inside the product relating to laser product safety.

Información acerca de la eliminación de equipos eléctricos y electrónicos al final de la vida útil (aplicable a los países que hayan adoptado sistemas independientes de recogida de residuos)

Los productos con el símbolo de un contenedor con ruedas tachado no podrán ser desechados como residuos domésticos.

Los equipos eléctricos y electrónicos al final de la vida útil, deberán ser reciclados en instalaciones que puedan dar el tratamiento adecuado a estos productos y a sus subproductos residuales correspondientes. Póngase en contacto con su administración local para obtener información sobre el punto de recogida más cercano.

Un tratamiento correcto del reciclaje y la eliminación de residuos ayuda a conservar los recursos y evita al mismo tiempo efectos perjudiciales en la salud y el medio ambiente.

Informação sobre a eliminação de pilhas

Este produto não deve ser eliminado como lixo doméstico geral. Devolva a pilha usada ao revendedor ou entidade autorizada para que a mesma seja devolvida ao fabricante ou importador.

A reciclagem e a eliminação de lixo de maneira apropriada ajudarão a conservar os recursos naturais ao mesmo tempo que prevenirão os efeitos prejudiciais à nossa saúde e ao meio ambiente.

Para cumplimiento de la IFT:

“La operación de este equipo esta sujeta a las siguientes dos condiciones:
(1) es posible que este equipo o dispositivo no cause interferencia perjudicial y
(2) este equipo o dispositivo debe aceptar cualquier interferencia, incluyendo la que pueda causar su operación no deseada.”
