About the supplied remote control

Compared to standard remote controls, the remote control supplied with this receiver has several operation modes. These modes enable the remote control to control other audio/video components. In order to effectively use the remote control it is important to read the operating instructions and obtain a proper understanding of the remote control and how to switch its operation modes (etc.). Using the remote control without completely understanding its design and how to switch the operation modes may result in incorrect operations.
Before applying the power

Units are designed for operation as follows.

U.S.A. and Canada ........................................... AC 120 V only
Australia ........................................................... AC 240 V only
Europe and U.K. ............................................... AC 230 V only
China and Russia ............................................ AC 220 V only
*Other countries ........... AC 110-120 / 220-240 V switchable

Note:
Our warranty does not cover damage caused by excessive line voltage due to improper setting of the AC voltage selector switch.

* AC voltage selection

The AC voltage selector switch on the rear panel is set to the voltage that prevails in the area to which the unit is shipped. Before connecting the power cord to your AC outlet, make sure that the setting position of this switch matches your line voltage. If not, it must be set to your voltage in accordance with the following direction.

WARNING:
TO PREVENT FIRE OR ELECTRIC SHOCK, DO NOT EXPOSE THIS APPLIANCE TO RAIN OR MOISTURE.

Unpacking

Unpack the unit carefully and make sure that all accessories are put aside so they will not be lost.

Examine the unit for any possibility of shipping damage. If your unit is damaged or fails to operate, notify your dealer immediately. If your unit was shipped to you directly, notify the shipping company without delay. Only the consignee (the person or company receiving the unit) can file a claim against the carrier for shipping damage.

We recommend that you retain the original carton and packing materials for use should you transport or ship the unit in the future.

Keep this manual handy for future reference.

Accessories

FM indoor antenna (1)  AM loop antenna (1)

For VR-506 and KRF-V5050D
Remote control unit (1)  Batteries (R6/AA) (2)

For VR-505 and KRF-V5050D
Remote control unit (1)  Batteries (R6/AA) (2)

For VR-517 and KRF-V5550D
Remote control unit (1)  Batteries (R6/AA) (2)

*AC plug adaptor (1)

Use to adapt the plug on the power cord to the shape of the wall outlet. (Accessory only for regions where use is necessary.)

Microcomputer malfunction

If operation is not possible or an erroneous display appears, even though all connections have been made properly, reset the microcomputer referring to “In case of difficulty.”

Maintenance of the unit

When the front panel or case becomes dirty, wipe with a soft, dry cloth. Do not use thinner, benzine, alcohol, etc. for these agents may cause discoloration.

In regard to contact cleaner

Do not use contact cleaners because it could cause a malfunction. Be specially careful not to use contact cleaners containing oil, for they may deform the plastic component.
Caution: Read the pages marked ▲ carefully to ensure safe operation.

For the U.S.A.

FCC WARNING

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment may cause harmful interference to radio communications, if it is not installed and used in accordance with the instructions. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio communications, if it is not installed and used in accordance with the instructions. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

– Reorient or relocate the receiving antenna.
– Increase the separation between the equipment and receiver.
– Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
– Consult the dealer or an experienced radio / TV technician for help.

Note to CATV system installer:

This reminder is provided to call the CATV system installer’s attention to Article 820-40 of the NEC that provides guidelines for proper grounding and, in particular, specifies that the cable ground shall be connected to the grounding system of the building, as close to the point of cable entry as practical.

As an ENERGY STAR® Partner, Kenwood Corporation has determined that this product meets the ENERGY STAR® guidelines for energy efficiency. This product can save energy. Saving energy reduces air pollution and lowers utility bills.
Preparations

This receiver incorporates a wide variety of surround modes to bring you maximum enjoyment from your video software. Select a surround mode according to your equipment or the software you are going to play and enjoy!

Dolby Pro Logic & Dolby 3 Stereo
This surround system reproduces theater-like surround sound from video software marked [Dolby surround]. The PRO LOGIC mode uses the built-in adaptive matrix circuit to steer the Left, Center, Right and Surround channel audio signals. The 3 STEREO mode will redirect the Surround signal to the front left and right speakers when only the front and center speakers are used.

Dolby Digital
The DOLBY DIGITAL mode lets you enjoy full digital surround from software processed in the Dolby Digital format. Dolby Digital provides up to 5.1 channels of independent digital audio for better sound quality and more powerful presence than conventional Dolby Surround.

DTS
DTS (Digital Theater System) is a 5.1 channel digital audio format that provides five full-spectrum channels and one low-frequency (subwoofer) channel for unprecedented clarity, optimum channel separation and a (wide) dynamic range.

In the DTS mode, the 5.1 channel digital input from a DTS CD, LD or DVD disc (carrying the “DTS” marking) can be played in Digital Surround.

Important:
When a DTS disc is played on a CD, LD or DVD player, noise may be output from the analog output. It is recommended that you connect the digital output of the player to the digital input of this unit.

DSP surround modes
The DSP (Digital Signal Processor) used for this receiver incorporates a variety of high quality adjustable sound fields, like “ARENA”, “JAZZ CLUB”, “THEATER”, “STADIUM” and “DISCO”. It is compatible with almost any kind of program source.

DVD 6-channel input
(For VR-506/517/KRF-V6050D/V5550D only)
If you own a DVD player equipped with 6-channel output, this receiver allows you to obtain the full surround sound impact of DVD source material featuring multi-channel encoding. Since the source signals are digital and each channel is input independently, the resulting ambience is far superior to what can be achieved with conventional surround sound systems.

Universal IR (InfraRed) remote control
(Except for VR-505/KRF-V5050D)
In addition to the basic IR commands, the remote control supplied with this receiver can also operate almost all of your remote controllable audio and video components. Just follow the simple setup procedure to register the components you have connected.
Names and functions of parts

1. POWER key
   (For KRF-V6050D/V5050D/V5550D)
   Use to turn the main power ON/OFF.

2. ON/STANDBY (1/0) key
   (For VR-506/505/517)
   Use to switch the power ON/STANDBY when the POWER is turned ON.

STANDBY indicator

3. MULTI CONTROL keys
   Use to control a variety of settings.

4. SET UP key
   Use to select the speakers’ settings etc.

5. Surround indicators
   DTS indicator
   Lights when the receiver is in the DTS mode.

   DOLBY DIGITAL indicator
   Lights when the receiver is in the Dolby Digital mode.

   DSP MODE indicator
   Lights up when the receiver is in DSP mode.

6. INPUT MODE key
   Use to switch between the digital and analog inputs.

7. DIMMER key
   Use to adjust the brightness of the display.
   Use to select the REC MODE.

8. MONITOR key
   Use to monitor the source that is connected to the MONITOR jack.

9. VOLUME CONTROL knob
   Use for headphone listening.

10. SPEAKERS A/B keys
    (For VR-506/KRF-V6050D)
    Use to turn the A/B speakers ON/OFF.

11. SPEAKER key
    (For VR-505/517/KRF-V5050D/V5550D)
    Use to turn the speaker ON/OFF.

12. MUTE key
    (For VR-505/517/KRF-V5050D/V5550D)
    Use to temporarily mute the sound.

13. SOUND key
    Use to adjust the sound quality and ambience effects.

14. BAND key
    Use to select the broadcast band.

15. AUTO/CINEMA EQ. key
    Use to select the auto tuning mode.
    Use to switch the status of CINEMA EQ.

16. LISTEN MODE key
    Use to select the listening mode.

17. MEMORY key
    Use to store radio stations in the preset memory.

18. SOURCE DIRECT key
    Use to pass the source material direct to the amplifier.

19. INPUT SELECTOR knob
    (For VR-506/517/KRF-V6050D)
    Use to select the input sources.

20. AV AUX (S VIDEO, V, AUDIO L/R) jacks
    (For VR-506/517/KRF-V6050D)

Standby mode

When standby indicator is lit, this receiver is in standby mode and consumes a small amount of current for back-up. This system can be switched on using remote controls.
Remote control unit (RC-R0615) (VR-506/KRF-V6050D)  

This remote control unit can be used not only for Kenwood products but also for other non-Kenwood products by setting the appropriate maker setup codes.

Names and functions of parts

1. Numeric keys
   - Provide functions identical to those of the original remote control supplied with the component you are controlling.

2. LSTN M. key
   - Use to operate other components.

3. SET UP key
   - Use to select the listening mode.

4. RETURN key
   - Use to return to the operation of the receiver.

5. MENU key
   - Use to operate other components.

6. A/B key
   - If TAPE is selected as the input source, this key functions as the play key for side B of the cassette (the side facing away from the front of the deck).

7. +100 key
   - Use to select the disc number with the multi-CD player.

8. TITLE key
   - Use to operate other components.

9. TV SEL. key
   - Use to operate other components.

10. INPUT SELECTOR keys (DVD, PHONO, CD/DVD, TUNER, MD/TAPE, VIDEO1, VIDEO2, AV AUX)
    - Use to select the input sources.

11. BAND key
    - Use to select the broadcast band.

12. AUTO key
    - Use to select the auto tuning mode.

13. OSD key
    - Use to operate other components.

14. P.CALL 4/¢ keys
    - If tuner is selected as the input source, these keys function as the play/pause key.

15. TUNING 1/¡ keys
    - Use to operate the tuner.

16. DISC SKIP key
    - If CD is selected as the input source, this key functions as the multi-CD player disc skip key.

17. ENTER key
    - Use to select the input sources.

18. RETURN key
    - Use to return to the operation of the receiver.

19. RECEIVER key
    - Use to return to the operation of the receiver.

20. DISC SKIP key
    - If CD is selected as the input source, this key functions as the multi-CD player disc skip key.

21. MENU key
    - Use to operate other components.

22. POWER 1/0 key
    - Use to turn the receiver on and off.

23. OSD key
    - Use to select the disc number with the multi-CD player.

24. B.BOOST key
    - Use to select the maximum adjustment setting for the low frequency range.

25. MUTE key
    - Use to temporarily mute the sound.

26. MULTI CONTROL keys
    - Use to control a variety of settings.

27. MULTI CONTROL keys
    - Use to operate other components.

28. DVD keys
    - In DVD player operations, these keys function as skip keys.

29. ENTER key
    - Use to select the input sources.

30. RECEIVER key
    - Use to return to the operation of the receiver.

31. DISC SKIP key
    - If CD is selected as the input source, this key functions as the multi-CD player disc skip key.

32. OSD key
    - Use to operate other components.

33. VOLUME keys
    - Use to adjust the receiver volume.

34. CHANNEL 4/¢ key
    - Use to select the channel.

35. CINE.EQ key
    - Use to switch the status of CINEMA EQ.

36. DISC SEL. key
    - Use to operate other components.

37. TV SEL. key
    - Use to operate other components.

38. INPUT SEL. key
    - Use to operate other components.

39. TITLE key
    - Use to operate other components.

40. TV SEL. key
    - Use to operate other components.

41. MUTE key
    - Use to temporarily mute the sound.

42. POWER 1/0 key
    - Use to turn the receiver on and off.

43. ENTER key
    - Use to select the input sources.

44. RECEIVER key
    - Use to return to the operation of the receiver.

45. DISC SKIP key
    - If CD is selected as the input source, this key functions as the multi-CD player disc skip key.

46. OSD key
    - Use to operate other components.

47. VOLUME keys
    - Use to adjust the receiver volume.

48. CHANNEL 4/¢ key
    - Use to select the channel.

49. CINE.EQ key
    - Use to switch the status of CINEMA EQ.

50. DISC SEL. key
    - Use to operate other components.

51. TV SEL. key
    - Use to operate other components.

52. INPUT SEL. key
    - Use to operate other components.

53. TITLE key
    - Use to operate other components.

54. TV SEL. key
    - Use to operate other components.

55. MUTE key
    - Use to temporarily mute the sound.

56. POWER 1/0 key
    - Use to turn the receiver on and off.

57. ENTER key
    - Use to select the input sources.

58. RECEIVER key
    - Use to return to the operation of the receiver.

59. DISC SKIP key
    - If CD is selected as the input source, this key functions as the multi-CD player disc skip key.

60. OSD key
    - Use to operate other components.

61. VOLUME keys
    - Use to adjust the receiver volume.

62. CHANNEL 4/¢ key
    - Use to select the channel.

63. CINE.EQ key
    - Use to switch the status of CINEMA EQ.

64. DISC SEL. key
    - Use to operate other components.

65. TV SEL. key
    - Use to operate other components.

66. INPUT SEL. key
    - Use to operate other components.

67. TITLE key
    - Use to operate other components.

68. TV SEL. key
    - Use to operate other components.

69. MUTE key
    - Use to temporarily mute the sound.

70. POWER 1/0 key
    - Use to turn the receiver on and off.

71. ENTER key
    - Use to select the input sources.

72. RECEIVER key
    - Use to return to the operation of the receiver.

73. DISC SKIP key
    - If CD is selected as the input source, this key functions as the multi-CD player disc skip key.

74. OSD key
    - Use to operate other components.

75. VOLUME keys
    - Use to adjust the receiver volume.

76. CHANNEL 4/¢ key
    - Use to select the channel.
Remote control unit (RC-R0511) (VR-505/KRF-V5050D)

Names and functions of parts

1. Numeric keys
   - If CD or MD is selected as the input source, these keys function as numeric keys. If tuner is selected as the input source, these keys are used to call up station presets.
   - SET UP key
     - Use to select the speakers’ settings etc.
   - MENU key
     - Use to operate other components.
   - SOUND key
     - Use to adjust the sound quality and ambiance effects.
   - OSD key
     - Use to operate other components.
   - MULTI CONTROL keys
     - Use to control a variety of settings.
   - P.CALL keys
     - If tuner is selected as the input source, these keys function as P.CALL keys.
   - MENU key
     - Use to operate other components.
   - TUNING keys
     - If CD or MD is selected as the input source, these keys function as skip keys.
   - A/B+100 key
     - Use to select the disc number with the multi-CD player.
   - INPUT SELECTOR keys (DVD, PHONO/AUX, CD/DVD, TUNER, MD/TAPE, VIDEO1, VIDEO2)
     - Use to select the input sources.
   - DVD keys
     - When in DVD player operations, these keys function as skip keys.
   - MUTE key
     - Use to temporarily mute the sound.
   - POWER () key
     - Use to turn the receiver on and off.
   - DVD POWER key
     - Use to operate DVD player. For details, refer to the instruction manual of your DVD player. (Press the DVD POWER key for more than 2 seconds.)
   - RECEIVER key
     - Use to return to the operation of the receiver.
   - TITLE key
     - Use to operate other components.
   - LISTEN MODE key
     - Use to select the listening mode.
   - RETURN key
     - Use to operate other components.
   - ENTER key
     - Use to operate other components.
   - Band key
     - Use to select the broadcast band.
   - P.CALL keys
     - If tuner is selected as the input source, these keys function as the play key for side B of the cassette (the side facing away from the front of the deck).
   - SOUND key
     - Use to adjust the sound quality and ambiance effects.
   - OSD key
     - Use to operate other components.
   - ENTER key
     - Use to operate other components.
   - 2 key
     - If tape is selected as the input source, this key functions as the play key for side B of the cassette (the side facing away from the front of the deck).
   - BAND key
     - Use to select the broadcast band.
   - 8 key
     - If CD is selected as the input source, this key functions as the play/pause key.
   - 7 key
     - If CD, MD, or TAPE is selected as the input source, this key functions as the stop key.
   - CINE.EQ key
     - Use to switch the status of CINEMA EQ.
   - DISC SEL. key
     - Use to operate other components.
   - VOLUME keys
     - Use to adjust the receiver volume.

2. DISC SKIP key
   - If CD is selected as the input source, this key functions as the multi-CD player disc skip key.
   - A/B key
     - If TAPE is selected as the input source, this key functions as the multi-cassette deck.
   - +100 key
     - Use to select the disc number with the multi-CD player.

3. INPUT SELECTOR keys (DVD, PHONO/AUX, CD/DVD, TUNER, MD/TAPE, VIDEO1, VIDEO2)
   - Use to select the input sources.
   - DVD keys
     - When in DVD player operations, these keys function as skip keys.

4. MUTE key
   - Use to temporarily mute the sound.

5. POWER () key
   - Use to turn the receiver on and off.

6. DVD POWER key
   - Use to operate DVD player. For details, refer to the instruction manual of your DVD player. (Press the DVD POWER key for more than 2 seconds.)

7. RECEIVER key
   - Use to return to the operation of the receiver.

8. TITLE key
   - Use to operate other components.

9. DISC SKIP key
   - If CD is selected as the input source, this key functions as the multi-CD player disc skip key.
   - A/B key
     - If TAPE is selected as the input source, this key functions as the multi-cassette deck.
   - +100 key
     - Use to select the disc number with the multi-CD player.

10. INPUT SELECTOR keys (DVD, PHONO/AUX, CD/DVD, TUNER, MD/TAPE, VIDEO1, VIDEO2)
    - Use to select the input sources.
    - DVD keys
      - When in DVD player operations, these keys function as skip keys.

11. MUTE key
    - Use to temporarily mute the sound.

12. POWER () key
    - Use to turn the receiver on and off.

13. DVD POWER key
    - Use to operate DVD player. For details, refer to the instruction manual of your DVD player. (Press the DVD POWER key for more than 2 seconds.)

14. RECEIVER key
    - Use to return to the operation of the receiver.

15. TITLE key
    - Use to operate other components.
This remote control unit can be used not only for Kenwood products but also for other non-Kenwood products by setting the appropriate maker setup codes.

Names and functions of parts

1. **Numeric keys**
   - Provide functions identical to those of the original remote control supplied with the component you are controlling.

2. **LSTN M. key**
   - Use to select the listening mode.
   - RETURN key
   - Use to operate other components.

3. **SET UP key**
   - Use to select the speakers’ settings etc.
   - MENU key
   - Use to operate other components.

4. **SOUND key**
   - Use to adjust the sound quality and ambience effects.

5. **OSD key**
   - Use to operate other components.

6. **MULTI CONTROL keys**
   - Use to control a variety of settings.
   - Use to operate other components.

7. **P.CALL keys**
   - Use to select the maximum adjustment setting for the low frequency range.

8. **DISC SKIP key**
   - If CD is selected as the input source, this key functions as the multi-CD player disc skip key.

9. **A/B key**
   - If TAPE is selected as the input source, this key functions as the multi-CD player disc skip key.

10. **+100 key**
    - Use to select the disc number with the multi-CD player.

11. **TITLE key**
    - Use to operate other components.

12. **TUNING keys**
    - Use to operate the tuner or selected component.

13. **POWER (L-O) key**
    - Use to turn the receiver on and off.

14. **VOLUME keys**
    - Use to adjust the receiver volume.

15. **ENTER key**
    - Use to operate other components.

16. **AUTO key**
    - Use to select the auto tuning mode.

17. **INPUT SELECTOR keys**
    - If tuner is selected as the input source, these keys function as the P.CALL keys.

18. **INPUT SELECTOR keys**
    - If CD or MD is selected as the input source, these keys function as skip keys.

19. **RETURN key**
    - Use to operate other components.

20. **CINE.EQ key**
    - Use to switch the status of CINEMA EQ.

21. **DISC SEL. key**
    - Use to operate other components.

22. **TV SEL. key**
    - Use to operate other components.

23. **POWER (L-O) key**
    - Use to turn the receiver on and off.

24. **INPUT SEL. key**
    - Use to operate other components.

25. **CHANNEL +/- key**
    - Use to select the channel.

26. **MENU key**
    - Use to operate other components.

27. **RECEIVER key**
    - Use to return to the operation of the receiver.

28. **B.BOOST key**
    - Use to turn the receiver on and off.

29. **SET UP key**
    - Use to operate the tuner or selected component.

30. **P.CALL keys**
    - If CD or TAPE is selected as the input source, these keys function as search keys.

If the name of a function is different on the receiver and on the remote control, the name of the remote control key in this manual is indicated in parentheses.
Setting up the system

Make connections as shown in the following pages. When connecting the related system components, be sure to also refer to the instruction manuals supplied with the components you are connecting. Do not connect the power cord to a wall outlet until all connections are completed.

DTS disclaimer clause

DTS Digital Surround™ is a discrete 5.1 channel digital audio format available on CD, LD, and DVD software which consequently cannot be decoded and played back inside most CD, LD, or DVD players. For this reason, when DTS-encoded software is played back through the analog outputs of the CD, LD, or DVD player, excessive noise will be exhibited. To avoid possible damage to the audio system, proper precautions should be taken by the consumer if the analog outputs are connected directly to an amplification system. To enjoy DTS Digital Surround™ playback, an external 5.1 channel DTS Digital Surround™ decoder system must be connected to the digital output (S/P DIF, AES/EBU, or TosLink) of the CD, LD or DVD player.

VIDEO 2/MONITOR jacks

The receiver’s VIDEO 2/MONITOR jacks can be used in two different ways. Make the appropriate setting for the component connected to the jack when the receiver is turned on.

Use as a VIDEO 2 jack

You can connect a video deck or the like to these jacks and perform video playback and recording. The initial factory setting is “VIDEO 2”.

Use as a MONITOR jack

You can connect a cassette deck or the like to these jacks and make use of the deck’s monitoring function during recording. Alternately, you can connect a graphic equalizer to these jacks to apply compensation to the music signal.

To use the VIDEO 2/MONITOR jacks as a MONITOR jack, hold down the MONITOR key of the main unit for more than two seconds so that the display below appears.

Notes

1. Be sure to insert all connection cords securely. If their connections are imperfect, the sound may not be produced or noise may interfere.
2. Be sure to remove the power cord from the AC outlet before plugging or unplugging any connection cords. Plugging/unplugging connection cords while the unit is turned on may cause malfunctions and may damage the unit.
3. Do not connect power cords from components whose power consumption is larger than what is indicated on the AC outlet at the rear of this unit.

Analog connections

Audio connections are made using RCA pin cords. These cables transfer stereo audio signal in an “analog” form. This means the audio signal corresponds to the actual audio of two channels. These cables usually have 2 plugs each end, one red for the right channel and one white for the left channel. These cables are usually packed together with the source unit, or are available at your local electronics retailer.

Input mode settings

CD/DVD, VIDEO2 and DVD/6ch or DVD (VR-505/KRF-V5550D only) inputs each include jacks for digital audio input and analog audio input. You must select beforehand which type of input is to be used for each connected component.

The initial factory settings for audio signal playback (CD/DVD,DVD/6ch or DVD (VR-505/KRF-V5550D only)) and (VIDEO2) are digital and analog respectively.

To use the analog audio input for playback instead (if, for example, you have connected a VCR to the VIDEO2 input), you must set the input mode for the corresponding input to the analog mode. After completing connections and turning on the receiver, follow the steps below.

Notes

1. Use the INPUT SELECTOR knob to select CD/DVD, VIDEO2, DVD/6ch or DVD (VR-505/KRF-V5550D only).
2. Press the INPUT MODE key.

Each press switches the setting as follows:

In DTS play mode

1. D-AUTO (digital input, auto sound)
2. D-MANUAL (digital input, manual sound)

In DVD/6ch or DVD play mode

1. D-AUTO (digital input, auto sound)
2. D-MANUAL (digital input, manual sound)
3. 6ch INPT (DVD/6ch input)(except for VR-505/KRF-V5550D)
4. ANALOG (analog input, manual sound)

In modes other than DTS or DVD play mode

1. D-AUTO (digital input, auto sound)
2. D-MANUAL (digital input, manual sound)
3. ANALOG (analog input, manual sound)

Digital input:
Select this setting to play digital signals from a DVD, CD, or LD player.

Analog input:
Select this setting to play analog signals from a cassette deck, VCR, or record player.

Auto sound:
In the auto sound mode (AUTO SOUND indicator lights), the receiver selects the listening mode automatically during playback to match the type of input signal (Dolby Digital, PCM, DTS) and the speaker setting. The initial factory setting is auto sound on.

To keep the receiver set to the currently selected listening mode, use the INPUT MODE key to select “D-MANUAL” (manual sound). However, even when this setting is selected, there may be cases in which the listening mode is selected automatically to match a Dolby Digital source signal depending on the combination of listening mode and source signal.

If the INPUT MODE key is pressed quickly, sound may not be produced.
Connecting audio components

When you connect the audio cord of the video component to the VIDEO 2/MONITOR jacks, connect the video cord (yellow RCA pin cords) of the connected component to the VIDEO 2 IN jack.
Connecting video components

About the S VIDEO jacks

Use the S VIDEO jacks to make connections to video components with S VIDEO IN/OUT jacks.

- If you use the S VIDEO jacks to connect your video playback components, be sure to use the S VIDEO jacks when connecting your monitor and video recording components.

A video component with digital audio outputs should be connected to the VIDEO2 jacks.
Connecting a DVD player (6-channel input)

If you have connected a DVD player to the receiver with digital connection, be sure to read the “Input mode settings” section carefully.

To switch the speakers off, press the MUTE key.

CAUTION (Except for U.S.A. and Canada)

Be sure to adhere to the following. Proper ventilation will be blocked causing damage or fire hazard.
- Do not place any objects impairing heat radiation onto the top of unit.
- Leave a space around the unit (from the largest outside dimension including projection) equal or greater than, shown below.

CAUTION (For U.S.A. and Canada)

Be sure to adhere to the following. Proper ventilation will be blocked causing damage or fire hazard.
- Do not place any objects impairing heat radiation onto the top of unit.
**Digital connections**

The digital in jacks can accept DTS, Dolby Digital, or PCM signals. Connect components capable of outputting DTS, Dolby Digital, or standard PCM (CD) format digital signals. If you have connected any digital components to the receiver, be sure to read the “Input mode settings” section carefully.

---

To connect an LD player with a DIGITAL RF OUT, connect the LD player to the KENWOOD RF digital demodulator (DEM-9991D). Next, connect the DIGITAL OUT jacks of the demodulator to the DIGITAL IN jacks of the receiver. Connect the video signal and analog audio signals to the VIDEO 2/MONITOR jacks. (See “Connecting video components”.)
Connecting to the AV AUX jacks
(VR-506/517/KRF-V6050D only)

The AV AUX jacks are convenient for connection of video components such as a camcorder or a video game.

Connecting the antennas

AM loop antenna
The supplied loop antenna is for use indoors. Place it as far as possible from the receiver, TV set, speaker cords and power cord, and adjust the direction for best reception.

FM indoor antenna
The supplied indoor antenna is for temporary use only. For stable signal reception we recommend using an outdoor antenna. Disconnect the indoor antenna when you connect one outdoors.

FM outdoor antenna
Lead the 75Ω coaxial cable connected to the FM outdoor antenna into the room and connect it to the FM 75Ω terminal.

- To select the source connected to the AV AUX jacks, select AV AUX by using the INPUT SELECTOR knob.
- When you connect the audio source such as the MD player, you do not need to connect the video cable.
- When you connect the unit and the component with the S VIDEO cord, you can get better picture quality.
Connecting the system control

Connecting system control cords after connecting a KENWOOD audio component system lets you take advantage of convenient system control operations.

This unit is compatible only with the [SL-16] mode. The system control operation is not available if the unit is connected in the [XS8], [XS], or [XR] connection mode.

If your component has the mode select switch, set the connected components to the [SL-16] mode.

- You may connect the system control cord to either the left or right jack.

**EXAMPLE: [SL16] mode connections**
The underlined portion represents the setting of the system control mode.

- [SL16]
- [SL16] [XS] [XS8] [XR]
- [SL16] [XS] [XS8]
- [XS]

- In order to take advantage of the system control operations, the components must be connected to the correct jacks. To use a CD player it must be connected to the CD jacks. To use a cassette deck (or MD recorder) it must be connected to the MD/TAPE jacks. When using more than one CD player (etc.) only the one connected to the specified jacks may be connected for system control.
- Some CD players and cassette decks are not compatible with the [SL16] system control mode. Do not make system connections with equipment that is not [SL16] compatible.
- Some MD players are not system control compatible. You cannot make system control connections to this kind of equipment.

**Notes**
1. [SL16] equipment cannot be combined with [XR], [XS], and [XS8] equipment for system operations. If your equipment consists of this kind of combination, please do not connect any system control cords. Even without system control cords, normal operations can be carried out without effecting performance.
2. Do not connect system control cords to any components other than those specified by KENWOOD. It may cause a malfunction and damage your equipment.
3. Be sure the system control plugs are inserted all the way in to the system control terminals.

Do not connect a system control cord to a cassette deck connected to the VIDEO2/MONITOR jacks.

**SYSTEM CONTROL OPERATIONS**

**Remote Control**
Lets you operate this unit with the system remote supplied with the receiver.

**Automatic Operation**
When you start playback from a source component, the input selector on this unit switches to that component automatically.

**Synchronized Recording**
Lets you synchronize recording with the start of playback when recording from CD, MD or analog discs.

**Registering setup codes for KENWOOD audio components (VR-506/517/KRF-V6050D/V5550D)**
- If you own remote controllable KENWOOD audio components that are not compatible with system control, registering the setup code enables you to control those components using the remote control supplied with this unit (without connecting system control cords). To register setup codes for your remote controllable KENWOOD audio components, see “Registering setup codes for other components”.

**Registering setup codes for other components**
- Do not connect a system control cord to a cassette deck connected to the VIDEO2/MONITOR jacks.
### Connecting the speakers

1. Strip coating.
2. Loosen.
3. Insert.
4. Secure.

### Connection of banana plugs (For U.S.A. and Canada)

1. Secure.
2. Insert.

- Never short circuit the + and – speaker cords.
- If the left and right speakers are connected inversely or the speaker cords are connected with reversed polarity, the sound will be unnatural with ambiguous acoustic imaging. Be sure to connect the speakers correctly.

### Speaker impedance

After confirming the speaker impedance indications printed on the rear panel of the receiver, connect speakers with matching impedance ratings. Using speakers with a rated impedance other than that indicated on the rear panel of the receiver could result in malfunctions or damage to the speakers or receiver.
Connecting the speakers

Setting up the system

- Preparations

The VR-505/517/KRF-V5050D/V5550D are equipped with one-touch speaker terminals. They are arranged in the same manner as the speaker terminals of the VR-506/KRF-V5060D. Refer to the instructions on making connections to the VR-506/KRF-V5060D when making connections to the VR-505/517/KRF-V5050D/V5550D.

VR-506/KRF-V6050D

VR-517/KRF-V5550D

VR-505/KRF-V5050D

VR-506/KRF-V6050D

VR-505/KRF-V5050D

- Front Speakers A
  - Right
  - Left
- Center Speaker
- Powered subwoofer
  (Except VR-517/KRF-V5550D)

Connecting the speakers

The VR-505/517/KRF-V5050D/V5550D are equipped with one-touch speaker terminals. They are arranged in the same manner as the speaker terminals of the VR-506/KRF-V5060D. Refer to the instructions on making connections to the VR-506/KRF-V5060D when making connections to the VR-505/517/KRF-V5050D/V5550D.

VR-506/KRF-V6050D

VR-517/KRF-V5550D

VR-505/KRF-V5050D

Use the FRONT SPEAKERS B terminals if you want to connect a second front speaker system (for VR-506/KRF-V6050D).
Preparations

Speaker placement

Front speakers: Place to the front left and right of the listening position. Front speakers are required for all surround modes.

Center speaker: Place front and center. This speaker stabilizes the sound image and helps recreate sound motion. Be sure to connect a center speaker when using the Dolby 3 Stereo mode.

Surround speakers: Place to the direct left and right, or slightly behind, the listening position at even heights, approximately 1 meter above the ears of the listeners. These speakers recreate sound motion and atmosphere. Required for surround playback.

Subwoofer: Reproduces powerful deep bass sounds.

- Although the ideal surround system consists of all the speakers listed above, if you don’t have a center speaker or a subwoofer, you can divide those signals between the available speakers in the speaker settings steps to obtain the best possible surround reproduction from the speakers you have available.

Channel space switching
(Except for the USA, Canada, UK, Europe, and Australia)

The space between radio channels has been set to the one that prevails in the area to which the system is shipped. However, if the current channel space setting does not match the setting in the area where the system is to be used, for instance when you move from area 1 or area 2 shown in the following table or vice versa, proper reception of AM/FM broadcasts cannot be expected. In this case, change the channel space setting in accordance with your area by referring to the following table.

<table>
<thead>
<tr>
<th>Area</th>
<th>CHANNEL Space Frequency</th>
</tr>
</thead>
<tbody>
<tr>
<td>USA, Canada and South American countries</td>
<td>FM: 100 kHz  AM: 10 kHz</td>
</tr>
<tr>
<td>Other countries</td>
<td>FM: 50 kHz  AM: 9 kHz</td>
</tr>
</tbody>
</table>

Move switch lever to match your area with a small screwdriver or other pointed tool.

Preparing the remote control

Loading the batteries

1. Remove the cover.
2. Insert the batteries.
3. Close the cover.

- Insert two AA-size (R6) batteries as indicated by the polarity markings.

Operation

When the STANDBY indicator is lit, the power turns ON when you press the POWER key on the remote control. When the power comes ON, press the key you want to operate.

Notes
1. The supplied batteries may have shorter lives than ordinary batteries due to use during operation checks.
2. When the remote-controllable distance gets shorter than before, replace both batteries with new ones.
3. Placing the remote sensor in direct sunlight, or in direct light from a high frequency fluorescent lamp may cause a malfunction. In such a case, change the location of the system installation to prevent malfunction.
Preparing for surround sound

Speaker settings

To enable you to obtain optimum enjoyment from the receiver’s listening modes, make sure to complete the speaker settings (subwoofer, front, center, and surround speakers) as described below.

1 Turn on the power to this receiver by pressing POWER or ON/STANDBY key(s).

2 Select a speaker system.

1 Press the SET UP key such that the subwoofer setting indication (SUBW ON) appears.

2 Use the MULTI CONTROL keys to select the appropriate subwoofer setting.

   1 SUBW ON: Subwoofer setting mode to the receiver is ON.
   2 SUBW OFF: Subwoofer setting mode to the receiver is OFF.

   • The initial setting is “SUBW ON”.
   • When the setting “SUBW OFF” is selected, the front speakers are automatically set to “FRNT LRG” and the procedure skips to step 3.
   • When subwoofer output sound is required, select “FRNT NML”.

3 Press the SET UP key to accept the setting.

   • The front speakers setting indication (FRNT) appears.

4 Use the MULTI CONTROL keys to select the appropriate front speakers setting.

   1 FRNT NML (normal): Average size front speakers are connected to the receiver.
   2 FRNT LRG (large): Large front speakers are connected to the receiver.

   • For “FRNT LRG” selection, no sound will be heard from SUBW even when it is set to ON. However, if you select CINEMA EQ. when subwoofer is selected, you will be able to hear sound from the subwoofer.
   • When in STEREO mode, the sound goes directly to front speaker.

5 Press the SET UP key to accept the setting.

   • The center speaker setting indication (CNTR) appears.

6 Use the MULTI CONTROL keys to select the appropriate center speaker setting.

   If you selected “LRG” as the front speakers setting,

   1 CNTR LRG (large): A large center speaker is connected to the receiver.
   2 CNTR NML (normal): An average size center speaker is connected to the receiver.
   3 CNTR OFF: Center speaker setting mode to the receiver is OFF.

   If you have selected “NML” as the front speakers setting,

   1 CNTR ON: Center speaker setting mode to the receiver is ON.
   2 CNTR OFF: Center speaker setting mode to the receiver is OFF.

7 Press the SET UP key again to accept the setting.

   • The surround speaker setting indication (SURR) appears.

8 Use the MULTI CONTROL keys to select the appropriate surround speaker setting.

   If you selected “LRG” as the center speaker setting,

   1 SURR LRG (large): Large surround speakers are connected to the receiver.
   2 SURR NML (normal): Average size surround speakers are connected to the receiver.
   3 SURR OFF: Surround speaker setting mode to the receiver is OFF.

   If you have selected other than “LRG” as the center speaker setting,

   1 SURR ON: Surround speaker setting mode to the receiver is ON.
   2 SURR OFF: Surround speaker setting mode to the receiver is OFF.

9 Press the SET UP key again to accept the setting.

   • The receiver enters the speaker volume level adjustment mode.
   • In steps 3 through 8, indications appear only for the selected channels of the speakers that require adjusting.

Adjust the speaker volume.

From your usual listening position, adjust the volume levels. The volume levels from each speaker should be the same.

10 Use the MULTI CONTROL keys to adjust the volume of the test tone output from the speaker channel to be adjusted.

The test tone is heard from the speakers in the following sequence for 2 seconds each:

   L → C → R → SR → SL → SW

   • If you change the volume level settings for the speakers while listening to music, the settings referred to on this page are also changed.
   • If the speaker setting selects are changed, the speaker level settings are reset.

11 Press the SET UP key.

   • The test tone is turned off. The receiver enters the mode for inputting the distance to the speakers.

Continued to next page
Preparing for surround sound

4 Input the distance to the speakers.

1 Measure the distance from the listening position to each of the speakers.

Jot down the distance to each of the speakers.

- Distance to front speakers: ____ feet ____ meters
- Distance to center speaker: ____ feet ____ meters
- Distance to surround speakers: ____ feet ____ meters

2 Use the MULTI CONTROL keys to select the distance to the front speakers.

The speaker indicator to be adjusted blinks.

• The allowable setting range is 1 to 30 feet (0.3 to 9.0 m), adjustable in 1 foot (0.3 m) increments.

3 Press the SET UP key to accept the settings.

4 Setup is complete when the input indication reappears.

Display when all speakers have been selected.

• The speakers you have selected should appear on the display. Confirm that all the speakers have been correctly selected.

Input level adjustment (analog sources only)

If the input level of an analog source signal is too high, adjust the input level. The CLIP indicator will blink to indicate the source signal.

1 Use the INPUT SELECTOR knob to select the source which input level you want to adjust.

• You can store a separate input level for each input source. If the MONITOR function is on, you can store an input level for when MONITOR is on independently of the input levels for the input sources.

2 Press the SOUND key repeatedly until the "INPUT" indication appears.

3 Use the MULTI CONTROL keys to adjust the input level.

• The adjustment mode is displayed for approximately eight seconds.

4 Press the SOUND key again to return to the input indication.

Preparing for playback

Some preparatory steps are needed before starting playback.

Normal playback

Selecting the input mode

If you have selected a component connected to the CD/DVD, DVD/6ch, DVD (VR-505/KRF-V5550D only) or VIDEO2/MONITOR jacks, make sure that the input mode setting is correct for the type of audio signal to be used.

Selecting MD/TAPE

Select the source name corresponding to the component connected to the MD/TAPE jacks. The initial factory setting is "TAPE". To change the source to "MD," follow the steps below:

1 Use the INPUT SELECTOR knob to select "TAPE".

2 Hold down the AUTO/CINEMA EQ. key for more than 2 seconds.
   • The source indication changes to "MD".
   • To return to the original indication, repeat procedure 1.

Selecting the speaker system (VR-506/KRF-V6050D only)

Press the SPEAKERS A or B key to select the speaker system to be used.

- A ON: Sound from the speakers connected to the SPEAKERS A terminals on the rear panel.
- B ON: Sound from the speakers connected to the SPEAKERS B terminals on the rear panel.
- A+B ON: Sound from both the speakers connected to the SPEAKERS A and B terminals on the rear panel.
- A+B OFF: No sound from the speakers. Use this setting when listening with headphones for stereo sound in all playback modes.

The indicator for the speakers you want to use should be lit.

Turning on the receiver

1 Turn on the power to the related components.

2 Turn on the power to this receiver by pressing POWER (and ON/STANDBY) key(s).
Listening to a source component

1. Use the INPUT SELECTOR knob to select the source you want to listen to.
   - The input sources change as shown below:

   **Selecting a source using the INPUT SELECTOR knob.**

Adjusting the tone

You can adjust the sound quality when the receiver is in the PCM stereo and analog stereo mode.

2. Press the SOUND key to select the tone mode to be adjusted.

   - **BASS**: Select this to adjust the low frequency range.
   - **TREB**: Select this to adjust the high frequency range.

3. Use the MULTI CONTROL keys to adjust the sound quality.

   - **BASS Boost**: Press the B. BOOST (BASS BOOST) key.
     - Press the key once to select the maximum (+10dB) low frequency emphasis setting.
     - This key does not function when the receiver is in the sound quality or ambience effects adjustment mode.

   - **Switching back to the previous setting**: Press the B. BOOST (BASS BOOST) key again.

Start playback from the selected source.

Use the VOLUME CONTROL knob (VOLUME keys) to adjust the volume.

Selecting VIDEO 2/MONITOR

Depending on the component connected to the VIDEO 2/MONITOR jacks, select either the "VIDEO 2" setting or the "MONITOR" setting, as appropriate.

Adjusting the sound

KRF-V5050D

- "PHONO"
- "TUNER"
- "CD/DVD"
- "TAPE" or "MD"
- "VIDEO1"
- "VIDEO2" if VIDEO2/MONITOR is VIDEO2
- "DVD/6ch"
- "AV AUX"
- "DVD/6ch" if VIDEO2/MONITOR is MONITOR
- "AV AUX"

VR-505

- "AUX"
- "TUNER"
- "CD/DVD"
- "TAPE" or "MD"
- "VIDEO1" if VIDEO2/MONITOR is VIDEO2
- "VIDEO2" if VIDEO2/MONITOR is MONITOR
- "DVD" if VIDEO2/MONITOR is MONITOR
- "DVD" if VIDEO2/MONITOR is MONITOR

VR-517/KRF-V5550D

- "AUX"
- "TUNER"
- "CD/DVD"
- "TAPE" or "MD"
- "VIDEO1" if VIDEO2/MONITOR is VIDEO2
- "VIDEO2" if VIDEO2/MONITOR is VIDEO2
- "AV AUX" (VR-517 only)
- "AV AUX" (VR-517 only)

Once-touch low frequency emphasis (bass boost) (remote control only)

You can adjust the sound quality when the receiver is in the PCM stereo and analog stereo modes.

- Press the B. BOOST (BASS BOOST) key.
  - Press the key once to select the maximum (+10dB) low frequency emphasis setting.
  - This key does not function when the receiver is in the sound quality or ambience effects adjustment mode.

Switching back to the previous setting

Press the B. BOOST (BASS BOOST) key again.
Muting the sound

The MUTE key lets you mute the sound of the speakers.

Press the MUTE key.

To cancel

Press the MUTE key again so that the “MUTE” indicator goes off.

SOURCE DIRECT playback (for analog input sources only)

Use this function to pass the source material direct to the amplifier, bypassing any audio processing.

Press the SOURCE DIRECT key.

- When you press the LISTEN MODE, SOUND, or SET UP keys, or switch to another input source, SOURCE DIRECT playback will be canceled.
- If CINEMA EQ. is switched ON, SOURCE DIRECT key will not be effective.

To cancel

Press the SOURCE DIRECT key again.

- If SOURCE DIRECT playback was activated while in surround mode, canceling SOURCE DIRECT playback will reactivate the previous surround mode.

Listening with headphones

1 (VR-506/KRF-V6050D)
Press the SPEAKERS A or B key so that the speaker indicator goes off.
(VR-505/517/V5050D/V5550D)
Press the SPEAKER key so that the speaker indicator goes off.

Make sure the SPEAKERS indicators are turned off.

VR-506/KRF-V6050D

VR-505/517/KRF-V6050D/ V5550D

- If you turn off all of the speakers when in surround mode, the surround mode will be canceled as well, resulting in stereo playback.

2 Connect headphones to the PHONES jack.

3 Use the VOLUME CONTROL knob (VOLUME keys) to adjust the volume.

Recording audio (analog sources)

Recording a music source

When recording a music source, switch the VIDEO2/MONITOR setting to “MONITOR”.

1 Use the INPUT SELECTOR knob to select the source (other than “TAPE”) you want to record.
2 Set the cassette deck or MD recorder to record.
3 Start playback, then start recording.

Recording tapes or MD (with MONITOR function)

When recording a music source, switch the VIDEO2/MONITOR setting to “MONITOR”.

MONITOR → MD/TAPE recording

1 Press the MONITOR key.

MD/TAPE → MONITOR recording

1 Use the INPUT SELECTOR knob to select “MD/TAPE.”
2 Start playback on the cassette deck connected to the MONITOR jacks and start recording on the cassette deck or MD recorder connected to the MD/TAPE jacks.

MONITOR function (analog sources only)

You can connect a cassette deck or graphic equalizer to the VIDEO2/MONITOR jacks of the receiver. If a graphic equalizer is connected, the MONITOR key should be left in the on position. Alternately, if a cassette deck equipped with a 3-head system is connected to the VIDEO2/MONITOR jacks, you will be able to monitor the just-recorded signal while making recordings on the cassette deck. By switching the MONITOR key on and off, you can compare the sound of the source signal and the just-recorded signal. For more information, refer to the instruction manual of the connected component.
Recording video

1. Use the INPUT SELECTOR to select the source (other than "VIDEO1") you want to record.
2. Set the video deck connected to VIDEO 1 to record.
3. Start playback, then start recording.

Recording audio (digital sources)

Switch on the REC mode to record a digital input source.
1. Rec mode off: The digital input record mode is switched off.
2. A-REC: The digital input signals (DTS, Dolby Digital, or PCM) are identified automatically and converted into stereo signals that are ready for recording.
3. M-REC: The input signal type at the moment this mode is selected is held throughout this mode.

Recording music in A-REC or M-REC mode

1. Use the INPUT SELECTOR to select the source (CD, DVD or VIDEO2) you want to record.
2. Set the cassette deck or MD recorder to record.
3. Press and hold the DIMMER key for more than 2 seconds to select the A-REC or M-REC mode.
   - The mode changes every 2 seconds as shown below.
   1. Rec mode off
   2. A-REC
   3. M-REC

   For A-REC mode:
   \[ \text{A-REC} \]
   
   For M-REC mode:
   \[ \text{M-REC} \]

4. Start playback, then start recording.
   - If the audio reproduction stops in the middle due to change in the input signals, etc., press the DIMMER key.

Listening to radio broadcasts

The receiver can store up to 40 stations in the memory and recall them by one-touch operation.

Tuning radio stations

1. Use the INPUT SELECTOR knob (TUNER key) to select the tuner.
2. Use the BAND key to select the desired broadcast band.
3. Use the AUTO/CINEMA EQ. key to select the desired tuning method.

For M-REC mode:

4. Use the MULTI CONTROL keys to select the station.
   - Frequency display: “ST.” lights when a broadcast is being received in stereo.
   - “TUNED” is displayed when a station is received.

Auto tuning: The next station is tuned automatically.
Manual tuning: Turn the knob (press the key) to select the desired station.
Presetting radio stations manually

1. Tune to the station you want to store.

2. Press the MEMORY key while receiving the station.
   - Blinks for 5 seconds
   - Lights for 5 seconds

   Proceed to step 3 within 5 seconds.
   (If more than 5 seconds elapse, press the MEMORY key again).

3. Use the MULTI CONTROL keys to select one of the station presets (1 – 40).

4. Press the MEMORY key again to confirm the setting.
   - Repeat steps 1, 2, and 3 to store as many stations as necessary.
   - If you store a station at a previously used preset, the old station will be replaced by the new one.

Receiving preset stations

1. Press TUNER to select the tuner as the source.

2. Enter the number of the preset station you want to receive (up to “40”).

   Press the numeric keys in the following order:
   - For “15”, press ....... +10 5
   - For “20”, press ....... +10, +10, 0

   • If you make a mistake entering a two digit number, press the +10 key repeatedly to return to the original display and start again.

Receiving preset stations in order (P.CALL)

1. Press TUNER key to select the tuner as the source.

2. Use the P.CALL key to select the desired station.
   - Each time you press the key, another preset station is received in order.

   Pressing the P.CALL key does the following:
   - 01 – 02 – 03 – ... – 38 – 39 – 40

   Pressing the P.CALL key does the following:
   - 01 – 02 – 03 – ... – 38 – 39 – 40

   Holding down the or key, lets you skip through the presets, receiving each preset station at 0.5 second intervals.
Ambience effects

This receiver is equipped with listening modes that allow you to enjoy an enhanced sonic ambience with a variety of video sources.

In order to obtain the optimum effect from the surround modes, make sure to input the proper speaker settings beforehand.

Surround modes

**DTS**

The DTS multi-channel audio format is available on CD, LD and DVD software. DTS is a strictly digital format and can not be decoded inside most CD, LD or DVD players. For this reason, if you attempt to listen to DTS encoded software through the analog output of your new CD, LD or DVD player, you will experience digital noise in most cases. This noise can be quite loud if the analog output is connected directly to a high power amplification system. Proper measures for playing the digital output as described below should be taken to avoid this situation. To enjoy DTS Digital Surround playback, an external 5.1 channel DTS Digital Surround decoder system or an amplifier with a built-in DTS Digital Surround decoder must be connected to the digital output (S/P DIF, AES/EBU or TosLink) of a CD, LD or DVD player. All models are incorporated with the DTS decoder.

Manufactured under license from Digital Theater Systems, Inc. US Pat. No. 5,451,942 and other worldwide patents issues and pending.

“DTS” and “DTS Digital Surround” are trademarks of Digital Theater Systems, Inc. © 1996 Digital Theater Systems, Inc. All rights reserved.

---

**Dolby Digital**

The Dolby Digital surround format lets you enjoy up to 5.1 channels of digital surround sound from Dolby Digital program sources (such as Laserdisc or DVD software marked “Dolby Digital”). Compared with previous Dolby surround, Dolby Digital provides even better sound quality, greater spatial accuracy, and improved dynamic range.

Note

Although a full set of speakers (front left, right, and center, surround left and right, and a subwoofer) is required for true 5.1 channel Dolby Digital surround sound, this receiver lets you enjoy Dolby Digital (and Dolby Surround) program sources, even if you connect only the front speakers.

*D dolby prologic is a specially encoded 2 channel surround format designed to provide theater-like surround sound from Dolby Surround encoded sources (such as video and Laserdisc software marked “Dolby Surround”). This receiver is equipped with a Dolby Pro Logic surround decoder to let you enjoy the wide variety of currently available Dolby Surround home video software. Surround signal is monaural.

Manufactured under license from Dolby Laboratories. Dolby, Pro Logic and the double-D symbol are trademarks of Dolby Laboratories. Confidential Unpublished Works. ©1992-1997 Dolby Laboratories. All rights reserved.

---

*LFE = Low Frequency Effects. This channel delivers separate non-directional bass signals to the subwoofer for more dynamic deep bass sound effects. Although only Dolby Digital soundtracks incorporate a separate low frequency channel, connecting a subwoofer will also improve deep bass performance in the other surround modes. The indication “LFE” appears in the display when a signal is being input for this channel.

Manufactured under license from Digital Theater Systems, Inc. US Pat. No. 5,451,942 and other worldwide patents issues and pending.

“DTS” and “DTS Digital Surround” are trademarks of Digital Theater Systems, Inc. © 1996 Digital Theater Systems, Inc. All rights reserved.
**Operations**

**DSP mode**

The DSP mode lets you add the atmosphere of a live concert or hall to almost any type of program source. These modes are particularly effective when used with stereo program sources, like CD, television, and FM radio.

You might enjoy trying the ARENA, JAZZ CLUB, THEATER, STADIUM or DISCO mode the next time you watch a concert or sporting event!

**What’s DSP?**

DSP stands for Digital Signal Processor. The way a sound is heard in an actual environment depends on a variety of different factors. One of the most important is reverberation (the act of decaying elements of sound echoing in various places). The DSP modes produce the feeling of presence by using the DSP to create reverberation, without spoiling the sound quality of the original signal.

**Dolby 3 Stereo**

Dolby 3 Stereo is available for systems that do not have surround speakers. When in the Dolby 3 Stereo mode, the surround information is redirected to the front left and right speakers. This mode is designed for use with Dolby Surround program sources, but can also improve sound field unity for programs that are not Dolby Surround encoded. Dialog positioning and sound image definition, however, may not be as accurate when used with programs that are not Dolby Surround encoded.

**DVD 6-channel mode (except VR-505/KRF-V5550D)**

Using a DVD player or the like equipped with six (5.1) output channels and the receiver, you can enjoy multi-channel encoded DVD source material in all its splendor. Since the source signals are digital and each channel is input independently, the resulting sound quality, sense of spaciousness, and dynamic range are superb.

*LFE = Low Frequency Effects. This channel delivers separate non-directional bass signals to the subwoofer for more dynamic deep bass sound effects.*
Surround play

The DTS compatible models can reproduce a CD, DVD, or LD carrying the DTS mark.

DOLBY DIGITAL can be used when playing DVD or LD software bearing the mark and DOLBY DIGITAL format digital broadcasts (etc.). DOLBY PRO LOGIC and DOLBY 3 STEREO can be used when playing video, DVD, or LD software bearing the mark.

Prepare the following components:

- Turn ON related components.
- Complete "Preparing for surround sound" (speaker settings).
- Use the INPUT SELECTOR to select the component you wish to play back with surround sound.
- Use the INPUT MODE key to select the input mode (analog or digital) for the source you wish to play back.
- Noise will be produced when a DTS source is played by selecting the analog input.

1 Start playing the video software.

2 Press the LISTEN MODE (LSTN M.) key to select the listening mode.

The listening mode settings are stored separately for each input. If the input mode is set to digital auto ("AUTO SOUND" lights), the receiver selects the optimal listening mode automatically based on the type of input signal and the speaker settings.

Each press of the LISTEN MODE (LSTN M.) key switches the setting as listed below. The listening mode settings are different depending on the type of input signal.

When the DTS signal is input:

(The DTS indicator lights up.)

1 DTS: DTS surround
2 STEREO: Normal stereo playback

When the analog signal or the digital signal (except for DOLBY DIGITAL or DTS signal) is input:

1 PRO LOGIC: PRO LOGIC surround (The PRO LOGIC indicator lights up.)
2 3 STEREO: 3-STEREO surround (The 3 STEREO indicator lights up.)
3 ARENA: DSP surround.
4 JAZZ CLUB: DSP surround.
5 THEATER: DSP surround.
6 STADIUM: DSP surround.
7 DISCO: DSP surround.
8 STEREO: Normal stereo playback. Sound is produced from the two front channels only.

- If a Dolby Digital signal having more channels than the maximum number of playback channels available using the receiver's current settings is input, the DOWNMIX indicator on the front panel lights up and downmixing is performed to match the number of available channels.

3 Adjust the volume.

Notes

- Depending on the type of the signal or speaker setting, some listening modes cannot be selected.
- When playback is started, the sound may be cut or interrupted before the input source is confirmed as Dolby Digital.
- To enjoy Dolby Digital surround (as well as all the other listening modes) from a single component, be sure to use a Dolby Digital compatible source component. Connect the Dolby Digital compatible source component’s Dolby Digital format digital audio signal to one of the DIGITAL INPUT jacks on the back of the receiver. Connect the normal audio signal correctly to the respective component’s AUDIO jacks.

Adjust the volume.

Notes
Convenient functions

Adjusting the sound

You can make further adjustments to the sound while listening to playback in the surround mode.

Press the SOUND key until the desired item appears in the display.

Each time you press the button, the menu changes as follows:

- **BASS** (low frequency range sound quality adjustment)
- **TREB** (high frequency range sound quality adjustment)
- **C** (center speaker level adjustment)
- **SR** (right surround speaker level adjustment)
- **SL** (left surround speaker level adjustment)
- **SW** (subwoofer level adjustment)
- **INPUT** (input level adjustment)
- **NIGHT** (midnight mode on/off)

Use the MULTI CONTROL keys to adjust the setting as desired.

- The adjustment item is displayed for approximately 8 seconds.
Midnight mode (Dolby Digital mode only)

When watching movies at night you might not be able to raise the volume as loud as normal. Midnight mode compresses the dynamic range of previously specified parts of the Dolby Digital sound track (like scenes with sudden increases in volume) to minimize the difference in volume between the specified and non-specified parts. This makes it easy to hear all of the sound track, even when listening at low volumes.

Press the SOUND key repeatedly until “NIGHT” appears on the display.
- This can be selected only if CD/DVD, DVD (VR-505/KRF-V5550D only) or VIDEO2 is selected as the source and the listen mode is set to “DOLBY DIGITAL.”

Use the MULTI CONTROL keys to select the ON or OFF setting.

Display dimmer adjustment

The dimmer function lets you select the brightness of the receiver’s display. You might find this useful if you darken your room to watch movies or listen to music.

Each time you press the DIMMER key, the display brightness changes among the three available settings. Select the brightness level you find most pleasing.

96kHz LPCM playback

The receiver is compatible with the 96kHz LPCM playback. To play a 96kHz DVD, set the listen mode to “STEREO”.
- When “96kHz” appears in the display, press the LISTEN MODE key (the listen mode changes to the STEREO mode).
Basic remote control operations for other components
(For VR-506/517/KRF-V6050D/V5550D)

The remote control supplied with this receiver (for VR-506/517/KRF-V6050D/V5550D only) is also capable of controlling components from a variety of manufacturers once you register the appropriate setup codes into the remote control unit.

Low battery warning
Replace all four batteries with new ones when you notice a shortening of the distance from which the remote control will operate. The remote control is designed to retain setup codes in memory while you change batteries.

Registering setup codes for other components

1. Find the setup code of the component to be registered.
   • Refer to the setup code lists to find the setup code for the component to be registered.
     Example: To register a DVD made by KENWOOD, you would enter "805".

2. Hold down the POWER key and press the numeric keys to enter the setup code.
   • Example: Press "805" to register a DVD player made by KENWOOD.
   • If you push an invalid key, the remote will exit the setup mode.

3. Press the source POWER (TV, VCR, DVD, CABLE, DSS) key for more than 2 seconds, and check to see that the component you want to control turns on.
   If the component does not react, and there is more than one setup code, enter another setup code and try again.
   • If the component is already on, pressing the source POWER key(s) can also be used instead of the POWER key.
   • If the component is already on, pressing the source POWER key(s) will turn it off.

4. Repeat steps 2 to 3 to register additional components until all components have been registered.

Note
Although each setup code is designed to work with a number of different models, certain codes may not work with some models. (Also, certain codes may only operate some of the functions available on a given model.)

Operating other components

This operation lets you operate the registered components. KENWOOD audio components with system control turn on and off automatically with the receiver via the system control connections.

1. Use the input selector keys to select the component you desire.
   • Pressing the input selector keys also changes the input selector on the receiver.
   • When you operate your registered TV, VCR, DVD player, Cable tuner, or DSS receiver, go to step 2.
   • When you operate the CD player, Cassette deck, MD player, or Tuner with system control connection, go to step 3.

2. Press the source POWER key.

3. Press the operation keys you desire.
   • To return to the receiver operation mode, press the RECEIVER key.

The remote control mode returns to the receiver operation mode when you do not operate for more than 15 seconds.

Note
Be sure to point the remote control at the remote sensor on the receiver when you want to operate KENWOOD components connected by system control cords. Otherwise, point the remote control at the component you want to operate.

**Remote Control**

**Group-1**: DV-4900, DV-4070B, DV-2070, DV-203, DVF-9010, DVF-K7010, DVF-5010, DVF-R9030, DVF-R7030, DVF-3530 and DV-402

**Group-2**: DV-4050, DV-303, DVF-R6030, DVF-K5020, DVF-5020, DVF-3020 and DVF-3030

Depending on your KENWOOD DVD model, you need to set up your receiver remote control as follows:

**To set for Group-1 DVD players:**
Press the numeric "1" key while pressing the "POWER" key (not the DVD Power key) on your remote control.

**To set for Group-2 DVD players:**
Press the numeric "2" key while pressing the "POWER" key (not the DVD Power key) on your remote control.

- If your DVD player is not listed in the list above, perform the set up for either Group-1 or Group-2. When the set up is successful, then your DVD player falls into that particular group.

**How to operate the DVD player with the remote control**

1. Pressing the DVD Power key for more than 2 seconds turns the DVD player on or off.
2. To carry out the functions of the DVD player, first press the DVD Power key, then press each key for each operation as explained in the DVD operation pages in the operating instructions. In this case, the DVD operation mode is retained for 15 seconds after pressing any of those DVD operation buttons.
   (To turn the receiver operation mode within 15 seconds, press the RECEIVER key.)

**DVD player operation keys**

You can perform these basic operations using the keys described below when connected to KENWOOD DVD player.
CASSETTE deck, CD player & MD recorder operations
(For VR-505/KRF-V5050D)

You can perform these basic operations using the keys described below when connected to KENWOOD cassette deck, MD recorder or CD player equipped with system control operations.

Cassette deck operation keys

CD player operation keys

MD recorder operation keys

Notes
1. Certain codes may only operate some of the function available on a given model.
2. The charts above show the typical functions available for each component. Some manufacturers use different key combinations to perform similar functions. For that reason, we have programmed extra functions on some of the unused number keys to help you control your equipment.
CASSETTE deck, CD player & MD recorder operations

Other components' operations (For VR-506/517/KRF-V6050D/V5550D)

Refer to the following for the type of remote control operations available for each component.

1. Select the input source.
2. Press the keys corresponding to the operations you desire. Refer to the following sections for details.

- When pressing keys in succession, press each key firmly and be sure to wait at least 1 second before pressing the next key.
- Numeric keys function the same as the numeric keys on the original remote.

These keys can be used to perform the basic operations of KENWOOD and other makers' components which the setup code for each component had been entered beforehand.

### Resetting the Microcomputer

The microcomputer may malfunction (unit cannot be operated, or shows an erroneous display) if the power cord is unplugged while the power is ON, or due to some other external factor. If this happens, execute the following procedure to reset the microcomputer and return the unit to its normal operating condition.

- Please note that resetting the microcomputer will clear the contents of the memory and returns the unit to the state it was in when it left the factory.

Additional Information

For U.S.A. and Canada

Unplug the power cord from the wall outlet, then plug it back in while holding down the POWER key.

For other countries

With the power cord plugged in, turn the POWER key OFF. Then, while holding down the ON/STANDBY key, press POWER.

AUDIO section (VR-505/517)

Rated power output during STEREO operation

100 watts per channel minimum RMS, both channels driven, at 8 Ω from 40Hz to 20 kHz with no more than 0.7% total harmonic distortion. (FTC)

Effective power output during SURROUND operation
FRONT (40-20kHz, 0.7% T.H.D. at 8 Ω one channel driven) ................................................................. 100 W
CENTER (40-20kHz, 0.7% T.H.D. at 8 Ω one channel driven) ................................................................. 100 W
SURROUND (40-20kHz, 0.7% T.H.D. at 8 Ω one channel driven) ............................................................ 100 W + 100 W
Total harmonic distortion ...................................................0.050% (1 kHz, 50W, 8 Ω)
Frequency response
CD ................................................................. 10 Hz ~ 60 kHz, +0 dB, –3.0 dB
Input sensitivity / impedance
PHONO (MM) ..................................................... 2.5 mV / 27 kΩ
CD ................................................................. 200 mV / 47 kΩ
MONITOR IN (VIDEO2/MONITOR) ...................... 200 mV / 47 kΩ
DVD/6ch INPUT .................................................. 200 mV / 47 kΩ
Output level / impedance
TAPE REC .......................................................... 200 mV / 1 kΩ
MONITOR OUT (VIDEO2/MONITOR) .................. 200 mV / 1 kΩ
PRE OUT (SUBWOOFER) ...................................... 1.5 V / 2.2 kΩ
Tone control
BASS ................................................................... ±10 dB (at 70 Hz)
TREBLE ................................................................±10 dB (at 10 kHz)

DIGITAL AUDIO section

Sampling frequency .......................................................... 32 kHz, 44.1 kHz, 48 kHz, 96kHz
Input level / impedance / wave length
Optical ..................................................................... (–15 dBm ~ –21 dBm), 660 nm ±30nm
Coaxial ...................................................................... 0.5 Vp-p / 75 Ω

VIDEO section

VIDEO inputs / outputs
VIDEO (composite) .................................................. 1 Vp-p / 75 Ω
S VIDEO inputs / outputs (VR-506/517)
S VIDEO (luminance signal) ...................................... 1 Vp-p / 75 Ω
S VIDEO (chrominance signal) ................................. 0.286 Vp-p / 75 Ω

FM tuner section

Tuning frequency range .................................................. 87.5 MHz ~ 108 MHz
Usable sensitivity (MONO) ......................................... 1.3 µV (75 Ω)/ 12.2 dB (75 kHz DEV., SINAD 30 dB)
50dB quieting sensitivity
STEREO ........................................................ 28 µV (75 Ω)/ 40.2 dBf
Total harmonic distortion (1 kHz)
MONO ........................................................................... 0.5% (71.2 dBf input)
STEREO ................................................................. 0.7% (71.2 dBf input)
Signal to noise ratio (1 kHz, 75 kHz DEV.)
MONO ........................................................................... 75 dB (71.2 dBf input)
STEREO ................................................................. 68 dB (71.2 dBf input)
Stereo separation (1 kHz) ............................................. 40 dB
Selectivity (±400 kHz) .................................................. 70 dB
Frequency response .................................................. (30 Hz ~ 15kHz), +0.5 dB, –3.0 dB

AM tuner section

Tuning frequency range .................................................. 10 kHz step ................................................. 530 kHz ~ 1,700 kHz
Usable sensitivity (30% mod., S/N 20 dB) .................. 16 µV (600 µV/m)
Signal to noise ratio (30% mod. 1 mV input) .................. 50 dB

GENERAL

Power consumption ...................................................... 2.6 A
AC outlet ............................................................... SWITCHED ....................................... (total 150 W, 1.25 A max.)
Dimensions .............................................................. W : 440 mm (17-5/16”)
H : 143 mm (5-11/16”)
D : 400 mm (15-3/8”)
Weight (Net) ............................................................ VR-506/517 ......................................................... 8.8 kg (18.89 lb)
VR-505 ................................................................. 8.7 kg (18.88 lb)

Notes
1. KENWOOD follows a policy of continuous advancements in development. For this reason specifications may be changed without notice.
2. The full performance may not be exhibited in an extremely cold location (under a water-freezing temperature).
Specifications

**For other countries**

**AUDI O section (KRF-V6050D)**

Effective power output during STEREO operation

- 1kHz, 10% T.H.D. at 8 Ω: 140 W + 140 W
- Rated power output during STEREO operation
  - 100 watts per channel minimum RMS, both channels driven, at 8 Ω from 40 Hz to 20 kHz with no more than 0.7% total harmonic distortion (FTC)

Effective power output during SURROUND operation

- FRONT (1kHz, 10% T.H.D. at 8 Ω, one channel driven): 140 W + 140 W
- CENTER (1kHz, 10% T.H.D. at 8 Ω, one channel driven): 140 W + 140 W
- SURROUND (1kHz, 10% T.H.D. at 8 Ω, one channel driven): 140 W + 140 W

Total harmonic distortion: 0.050% (1 kHz, 50W, 8 Ω)

Frequency response

- CD: 10 Hz – 60 kHz, +0 dB, –3.0 dB
- TAPE REC: 200 mV / 1 kΩ
- PHONO (MM): 74 dB
- PHONO (MM): 90 dB

Input sensitivity / impedance

- PHONO (MM): 2.5 mV / 27 kΩ
- CD: 200 mV / 47 kΩ
- VIDEO/MONITOR: 200 mV / 47 kΩ
- DVD/6ch INPUT: 200 mV / 47 kΩ

Output level / impedance

- TAPE REC: 200 mV / 1 kΩ
- VIDEO/MONITOR: 200 mV / 1 kΩ
- PRE OUT (SUBWOOFER): 1.5 V / 2.2 kΩ

Tone control

- BASS: ±10 dB (at 70 Hz)
- TREBLE: ±10 dB (at 10 kHz)

- S VIDEO inputs / outputs (KRF-V6505D): 0.286 Vp-p / 75 Ω

**FM tuner section**

Tuning frequency range: 87.5 MHz ~ 108 MHz

Usable sensitivity (MONO):

- 1.6 µV (75 Ω) / 15.2 dBf (75 kHz DEV., SINAD 30 dB)

Squelching sensitivity

- STEREO: 28 µV (75 Ω) / 40 dB
- Total harmonic distortion (1 kHz)

- MONO: 0.5% (71.2 dBf input)
- STEREO: 0.7% (71.2 dBf input)

Signal to noise ratio (1 kHz, 75 kHz DEV.)

- MONO: 75 dB (71.2 dBf input)
- STEREO: 68 dB (71.2 dBf input)

Selectivity (±400 kHz)

- 50 dB

Frequency response

- STEREO (30 Hz – 15 kHz), +0.5 dB, -3.0 dB

**AM tuner section**

Tuning frequency range: 531 kHz ~ 1,602 kHz

Usable sensitivity:

- 16 µV / (600 µV/m)
- Signal to noise ratio (30% mod. 1 mV input): 50 dB
