This instruction manual is for some models. Model availability and features (functions) may differ depending on the country and sales area.

About the supplied remote control
Compared to standard remote controls, the remote control supplied with this receiver has several operation modes. These modes enable the remote control to control other audio/video components. In order to effectively use the remote control it is important to read the operating instructions and obtain a proper understanding of the remote control and how to switch its operation modes (etc.). Using the remote control without completely understanding its design and how to switch the operation modes may result in incorrect operations.
Before applying the power

Units are designed for operation as follows.

- **U.S.A. and Canada**: AC 120 V only
- **Australia**: AC 240 V only
- **Europe and U.K.**: AC 230 V only
- **China and Russia**: AC 220 V only
- **Other countries**: AC 110-120 / 220-240 V switchable*

**Unpacking**

Unpack the unit carefully and make sure that all accessories are present.

- FM indoor antenna (1)
- AM loop antenna (1)
- Remote control unit (1)
- Batteries (R6/AA) (2)

If any accessories are missing, or if the unit is damaged or fails to operate, notify your dealer immediately. If your unit was shipped to you directly, notify your shipper immediately. Kenwood recommend that you retain the original carton and packing materials in case you need to move or ship the unit in the future.

Keep this manual handy for future reference.

**Units are designed for operation as follows.**

- **U.S.A. and Canada**: AC 120 V only
- **Australia**: AC 240 V only
- **Europe and U.K.**: AC 230 V only
- **China and Russia**: AC 220 V only
- **Other countries**: AC 110-120 / 220-240 V switchable*

**Before applying the power**

Caution: Read this page carefully to ensure safe operation.

**Safety precautions**

**WARNING**: TO PREVENT FIRE OR ELECTRIC SHOCK, DO NOT EXPOSE THIS APPLIANCE TO RAIN OR MOISTURE.

**Maintenance of the unit**

When the front panel or case becomes dirty, wipe with a soft, dry cloth. Do not use thinner, benzine, alcohol, etc. for these agents may cause discoloration.

**In regard to contact cleaner**

Do not use contact cleaners because it could cause a malfunction. Be specially careful not to use contact cleaners containing oil, for they may deform the plastic component.

### For the U.S.A.

**FCC WARNING**

This equipment may generate or use radio frequency energy. Changes or modifications to this equipment may cause harmful interference unless the modifications are expressly approved in the instruction manual. The user could lose the authority to operate this equipment if an unauthorized change or modification is made.

**NOTE:**

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment may cause harmful interference to radio communications, if it is not installed and used in accordance with the instructions. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

– Reorient or relocate the receiving antenna.
– Increase the separation between the equipment and receiver.
– Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
– Consult the dealer or an experienced radio/TV technician for help.

**Note to CATV system installer:**

This reminder is provided to call the CATV system installer's attention to Article 820-40 of the NEC that provides guidelines for proper grounding and, in particular, specifies that the cable ground shall be connected to the grounding system of the building, as close to the point of cable entry as practical.

As an ENERGY STAR® Partner, Kenwood Corporation has determined that this product meets the ENERGY STAR® guidelines for energy efficiency. This product can save energy. Saving energy reduces air pollution and lowers utility bills.
Special features

True home theater sound

This receiver incorporates a wide variety of surround modes to bring you maximum enjoyment from your video software. Select a surround mode according to your equipment or the software you are going to play and enjoy.

Dolby Digital

The DOLBY DIGITAL mode lets you enjoy full digital surround sound from software processed in the Dolby Digital format. Dolby Digital provides up to 5.1 channels of independent digital audio for better sound quality and more powerful presence than conventional Dolby Surround.

Dolby PRO LOGIC II

DOLBY PRO LOGIC II, whilst totally compatible with its predecessor PRO LOGIC, provides greater advantages in surround sound. It allows user to enjoy the conventional stereo or Dolby Surround with a convincing “5.1 like” presentation. PRO LOGIC II offers special features for controlling the overall spatial, dimensionality and frontal sound field imaging. PRO LOGIC II produces an impressive surround sound from video software marked and three-dimensional space from music CD.

When listening to music, you will be able to enjoy the experience of sheer STEREO surround sound.

DTS

DTS (Digital Theater System) is a 5.1 channel digital audio format that provides five full-spectrum channels and one low-frequency (subwoofer) channel for unprecedented clarity, optimum channel separation and a (wide) dynamic range.

In the DTS mode, the 5.1 channel digital input from a DTS CD, LD or DVD disc (carrying the “DTS” marking) can be played in Digital Surround.

Important:

When a DTS disc is played on a CD, LD or DVD player, noise may be output from the analog output. It is recommended that you connect the digital output of the player to the digital input of this unit.

DSP surround modes

The DSP (Digital Signal Processor) used for this receiver incorporates a variety of high quality adjustable sound fields, like “ARENA”, “JAZZ CLUB”, “THEATER”, “STADIUM” and “DISCO”. It is compatible with almost any kind of program source.

DVD 6-channel input

If you own a DVD player equipped with 6-channel output, this receiver allows you to obtain the full surround sound impact of DVD source material featuring multi-channel encoding. Since the source signals are digital and each channel is input independently, the resulting ambience is far superior to what can be achieved with conventional surround sound systems.

CINEMA EQ

Cinema EQ mode will produce a more dynamic sound quality in any conditions. You can enjoy a more impressive sound effect when you switch CINEMA EQ ON during Dolby Digital and DTS playback.

ACTIVE EQ

The ACTIVE EQ function provides an enhanced sound balance from the 5.1 channel speakers especially when small speakers are being used and it is available during the receiver’s operation. However, this feature is not available during front large speaker selection and DVD 6-channel playback.

Universal IR (InfraRed) remote control

In addition to the basic receiver, the remote control supplied with this receiver can also operate almost all of your remote controllable audio and video components. Just follow the simple setup procedure to register the components you have connected.

Memory back up function

Please note that the following items will be deleted from the unit’s memory if the power cord is disconnected from the AC outlet for approximately 1 day.

- Power mode.
- Input selector settings.
- Picture output.
- Speaker ON/OFF.
- Volume level.
- BASS, TREBLE, INPUT level.
- Dimmer level.
- MD/TAPE settings.
- Listen mode setting.
- Speaker settings.
- SW RE-MIX ON/OFF.
- Distance setting.
- Input mode setting.
- Midnight mode setting.
- PRO LOGIC II mode setting.
- Broadcast band.
- Frequency setting.
- Preset stations.
- Tuning mode.
- CINEMA EQ ON/OFF.
- LOUDNESS ON/OFF.
Names and functions of parts

Main Unit

1. **POWER ON/STANDBY key**
   - Use to turn the power ON/STANDBY.

2. **DIMMER key**
   - Use to select the REC MODE.
   - Use to adjust the brightness of the display.

3. **LISTEN MODE key**
   - Use to select the listening mode.

4. **Surround indicators**
   - DSP mode indicator: Lights when the receiver is in the DSP mode.
   - DTS mode indicator: Lights when the receiver is in the DTS mode.
   - DOLBY DIGITAL indicator: Lights when the receiver is in the Dolby Digital mode.

5. **SOUND key**
   - Use to adjust the sound quality and the ambience effects.

6. **MULTI CONTROL knob**
   - Use to select a variety of settings.

7. **INPUT SELECTOR knob**
   - Use to select the input sources.

8. **VOLUME CONTROL knob**

9. **PHONES jack**
   - Use for headphone listening.

10. **SPEAKERS ON/OFF keys**
    - Use to switch the status of CINEMA EQ.

11. **INPUT MODE key**
    - Use to switch between full auto, digital and analog inputs.

12. **BAND key**
    - Use to select the broadcast band.

13. **AUTO key**
    - Use to change "TAPE" indication to "MD".
    - Use to select the auto tuning mode.

14. **MEMORY key**
    - Use to store radio stations in the preset memory.

15. **SET UP key**
    - Use to select the speakers' settings etc.

16. **MUTE key**
    - Use to temporarily mute the sound.

**Standby mode**

While the standby indicator is lit, a small amount of power is supplied to the system to back-up the memory. This is called standby mode. Under the condition, the system can be turned ON by the remote control unit.
Remote control unit

This remote control unit can be used not only for Kenwood products but also for other non-Kenwood products by setting the appropriate manufacturer’s setup codes.

Names and functions of parts

- **SOURCE** key: Use to turn the other components ON/OFF.
- **REMOTE MODE** keys (DVD, CBL, DSS/SAT, VCR, TV, OTHERS): Use to select the components registered at the respective input.
- **Numeric keys**: Provide functions identical to those of the original remote control supplied with the component you are controlling.
- **TOP MENU** key: Use to operate the DVD component.
- **SET UP key**:
- **SOURCE** key: Use to operate the DVD component.
- **INPUT SEL key**:
- **RECEIVER key**:
- **POWER** key:
- **POWER** key: Use to turn the receiver on or off.
- **LISTEN MODE key**:
- **INPUT MODE key**:
- **INPUT SELECTOR keys (DVD/6CH, CD/DVD, AUX, TUNER, VIDEO 1, VIDEO 2, MD/TAPE)**: Use to select the input sources.
- **INPUT SELECTOR keys (DVD/6CH, CD/DVD, AUX, TUNER, VIDEO 1, VIDEO 2, MD/TAPE)**: Use to select the broadcast band.
- **BASS BOOST key**: Use to select the auto tuning mode.
- **INPUT SELECTOR keys (DVD/6CH, CD/DVD, AUX, TUNER, VIDEO 1, VIDEO 2, MD/TAPE)**: Use to select the input sources.
- **BASS BOOST key**: Use to select the maximum adjustment setting for the low frequency range.
- **MULTI CONTROL keys**: Use to control a variety of settings.
- **INPUT SELECTOR keys (DVD/6CH, CD/DVD, AUX, TUNER, VIDEO 1, VIDEO 2, MD/TAPE)**: Use as dimmer function to adjust the brightness of the display.
Setting up the system

Make connections as shown in the following pages. When connecting the related system components, be sure to refer to the instruction manuals supplied with the components you are connecting. Do not connect the power cord to a wall outlet until all connections are completed.

Notes
1. Be sure to insert all connection cords securely. If their connections are imperfect, the sound may not be produced or there will be noise interference.
2. Be sure to remove the power cord from the AC outlet before plugging or unplugging any connection cords. Plugging/unplugging connection cords without disconnecting the power cord can cause malfunctions and may damage the unit.
3. Do not connect power cords from components whose power consumption is larger than what is indicated on the AC outlet at the rear of this unit.

Analog connections
Audio connections are made using RCA pin cords. These cables transfer stereo audio signal in an “analog” form. This means the audio signal corresponds to the actual audio of two channels. These cables usually have 2 plugs each end, one red for the right channel and one white for the left channel. These cables are usually packed together with the source unit, or are available at your local electronics retailer.

Microcomputer malfunction
If operation is not possible or an erroneous display appears, even though all connections have been made properly, reset the microcomputer referring to “In case of difficulty”.

Input mode settings
CD/DVD, VIDEO 2 and DVD/6CH inputs each include jacks for digital audio input and analog audio input. You must select beforehand which type of input is to be used for each connected component. To use the analog audio input for playback instead (if, for example, you have connected a VCR to the VIDEO 2 input), you must set the input mode for the corresponding input to the analog mode. After completing connections and turning on the receiver, follow the steps below.

1. Use the INPUT SELECTOR knob to select CD/DVD, VIDEO 2, DVD/6CH.
2. Press the INPUT MODE key.

Each press switches the setting as follows:

In DTS play mode
- F-AUTO (digital input, analog input)
- D-MANUAL (digital input)

In CD/DVD, VIDEO 2, DVD/6CH play mode
- F-AUTO (digital input, analog input)
- D-MANUAL (digital input)
- 6CH INPT (DVD/6CH input)
- ANALOG (analog input)

Digital input:
Select this setting to play digital signals from a DVD, CD, or LD player.

Analog input:
Select this setting to play analog signals from a cassette deck, VCR, or record player.

Auto detect:
In “F-AUTO” (full auto) mode (“AUTO DETECT and DIGITAL indicators light up), the receiver detects the digital or analog input signals automatically. Priority is given to digital signal during input mode selection. The receiver will select the input mode and listening mode automatically during playback to match the type of input signal (Dolby Digital, PCM, DTS) and the speaker setting. The initial factory setting is full auto.

To keep the receiver set to the currently selected listening mode, use the INPUT MODE key to select “D-MANUAL” (digital manual). However, even when this setting is selected, there may be cases in which the listening mode is selected automatically to match a Dolby Digital source signal depending on the combination of listening mode and source digital.

If the INPUT MODE key is pressed quickly, sound may not be produced. Press the INPUT MODE key again.
Setting up the system

Connecting audio components

![Diagram of audio component connections]

- To AC wall outlet
- SYSTEM CONTROL jacks
- Video component
- Cassette deck or MD recorder
- CD or DVD player
- Other components

Audio components include:
- Cassette deck or MD recorder
-CD or DVD player
- Video component

Other components can be connected through the SYSTEM CONTROL jacks.
Connecting video components

A video component with digital audio outputs should be connected to the VIDEO 2 jacks.

About the S VIDEO jacks

Use the S VIDEO jacks to make connections to video components with S VIDEO IN/OUT jacks.

- If you use the S VIDEO jacks to connect your video playback components, be sure to use the S VIDEO jacks when connecting your monitor and video recording components.
Setting up the system

Digital connections

The digital in jacks can accept DTS, Dolby Digital, or PCM signals. Connect components capable of outputting DTS, Dolby Digital, or standard PCM (CD) format digital signals.

If you have connected any digital components to the receiver, be sure to read the “Input mode settings” section carefully.

To connect an LD player with a DIGITAL RF OUT, connect the LD player to the KENWOOD RF digital demodulator (DEM-9991D). Next, connect the DIGITAL OUT jacks of the demodulator to the DIGITAL IN jacks of the receiver. Connect the video signal and analog audio signals to the VIDEO 2 jacks. (See “Connecting video components”.)
Setting up the system

Connecting a DVD player (6-channel input)

If you have connected a DVD player to the receiver with digital connection, be sure to read the “Input mode settings” section carefully.

CAUTION
Be sure to adhere to the following, or proper ventilation will be blocked causing damage or fire hazard.

- Do not place any object impairing heat radiation onto the top of the unit.
- Leave a space around the unit (from the largest outside dimension including projection) equal or greater than, shown below.

Setting up the system

Connecting the speakers

Front Speakers
- Right
- Left

Center Speaker

Surround Speakers
- Right
- Left
- Powered subwoofer (For VR-606)

Subwoofer

Be sure to connect both surround speakers
Setting up the system

Connecting the terminals

1. Strip coating.
2. Push the lever.
3. Insert the cord.
4. Return the lever.

- Never short circuit the + and – speaker cords.
- If the left and right speakers are connected inversely or the speaker cords are connected with reversed polarity, the sound will be unnatural with ambiguous acoustic imaging. Be sure to connect the speakers correctly.

Speaker impedance

After confirming the speaker impedance indications printed on the rear panel of the receiver, connect speakers with matching impedance ratings. Using speakers with a rated impedance other than that indicated on the rear panel of the receiver could result in malfunctions or damage to the speakers or receiver.

Connecting the antennas

AM loop antenna

The supplied loop antenna is for use indoors. Place it as far as possible from the receiver, TV set, speaker cords and power cord, and adjust the direction for best reception.

FM indoor antenna

The supplied indoor antenna is for temporary use only. For stable signal reception we recommend using an outdoor antenna. Disconnect the indoor antenna when you connect one outdoors.

FM outdoor antenna

Lead the 75Ω coaxial cable connected to the FM outdoor antenna into the room and connect it to the FM 75Ω terminal.

Speaker placement

Front speakers: Place to the front left and right of the listening position. Front speakers are required for all surround modes.
Center speaker: Place front and center. This speaker stabilizes the sound image and helps recreate sound motion. Required for surround playback.
Surround speakers: Place to the direct left and right, or slightly behind, the listening position at even heights, approximately 1 meter above the ears of the listeners. These speakers recreate sound motion and atmosphere. Required for surround playback.
Subwoofer: Reproduces powerful deep bass sounds.

- Although the ideal surround system consists of all the speakers listed above, if you don’t have a center speaker or a subwoofer, you can divide those signals between the available speakers in the speaker settings steps to obtain the best possible surround reproduction from the speakers you have available.
Connecting system control cords after connecting a KENWOOD audio component system lets you take advantage of convenient system control operations.

This unit is compatible only with the [SL-16] mode. The system control operation is not available if the unit is connected in the [XS8], [XS], or [XR] connection mode.

If your component has the mode select switch, set the connected components to the [SL16] mode.

- You may connect the system control cord to either the up or down jack.

**EXAMPLE: [SL16] mode connections**
The underlined portion represents the setting of the system control mode.

### [SL16] mode connections

The underlined portion represents the setting of the system control mode.

- **[SL16]**
  - Receiver
  - Cassette deck or MD recorder
  - CD player
  - Record player

- In order to take advantage of the system control operations, the components must be connected to the correct jacks. To use a CD player it must be connected to the CD jacks. To use a cassette deck (or MD recorder) it must be connected to the MD/TAPE jacks. When using more than one CD player (etc.) only the one connected to the specified jacks may be connected for system control.
- Some CD players and cassette decks are not compatible with the [SL16] system control mode. Do not make system connections with equipment that is not [SL16] compatible.
- Some MD players are not system control compatible. You cannot make system control connections to this kind of equipment.

**Notes**
1. [SL16] equipment cannot be combined with [XR], [XS], and [XS8] equipment for system operations. If your equipment consists of this kind of combination, please do not connect any system control cords. Even without system control cords, normal operations can be carried out without affecting performance.
2. Do not connect system control cords to any components other than those specified by KENWOOD. It may cause a malfunction and damage your equipment.
3. Be sure the system control plugs are inserted all the way in to the system control terminals.

### System Control Operations

**Remote Control**
Lets you operate this unit with the system remote supplied with the receiver.

**Automatic Operation**
When you start playback from a source component, the input selector on this unit switches to that component automatically.

**Synchronized Recording**
Lets you synchronize recording with the start of playback when recording from CD, MD or analog discs.

---

**Preparing the remote control**

**Loading the batteries**

1. Remove the cover.
2. Insert the batteries.
3. Close the cover.

- Insert two AA-size (R6) batteries as indicated by the polarity markings.

**Operation**
When the STANDBY indicator is lit, the power turns ON when you press the POWER key on the remote control. When the power comes ON, press the key you want to operate.

**Notes**
1. The supplied batteries may have shorter lives than ordinary batteries due to use during operation checks.
2. When the remote-controllable distance gets shorter than before, replace both batteries with new ones.
3. Placing the remote sensor in direct sunlight, or in direct light from a high frequency fluorescent lamp may cause a malfunction. In such a case, change the location of the system installation to prevent malfunction.
Preparing for surround sound

Speaker settings

To enable you to obtain optimum enjoyment from the receiver's listening modes, make sure to complete the speaker settings (subwoofer, front, center, and surround speakers) as described below.

It is not advisable to select "LRG" (large) for front, center, and surround speakers as this will cause the speakers to malfunction.

1. Turn on the power to this receiver by pressing POWER ON/STANDBY or POWER key.

2. Press the SET UP key to enter the SET UP mode and use the MULTI CONTROL knob or Joystick for the following displays.

   1. SP SETUP
   2. TEST TONE
   3. DISTANCE
   4. EXIT

   The flow of the SET UP is as follows;

   SP SETUP → TEST TONE → DISTANCE → EXIT

3. Select a speaker system.

   1. Select SP SETUP and press the SET UP key again so that the subwoofer setting indication “SUBW ON” appears.

   2. Use the MULTI CONTROL knob or Joystick to select the appropriate subwoofer setting.

      1. SUBW ON : Subwoofer setting mode to the receiver is ON.
      2. SUBW OFF : Subwoofer setting mode to the receiver is OFF.

      • The initial setting is “SUBW ON”.
      • When the setting “SUBW OFF” is selected, the front speakers are automatically set to “FRNT LRG” and the procedure skips to step 6.

      Before step 6, press the SET UP key to accept the setting.
      • When subwoofer output sound is required, select “FRNT NML”.

   3. Press the SET UP key to accept the setting.

   • The front speakers setting indication “FRNT LRG” appears.

   4. Use the MULTI CONTROL knob or Joystick to select the appropriate front speakers setting.

      • It is not advisable to select “LRG” (large) for front speaker as this will cause the speaker to malfunction.

      1. FRNT NML (normal) : Average size front speakers are connected to the receiver.
      2. FRNT LRG (large) : Large front speakers are connected to the receiver.

      • For “FRNT LRG” selection, no sound will be heard from subwoofer speaker even when it is set to ON. However, if you select CINEMA EQ when subwoofer is selected, you will be able to hear sound from the subwoofer.

      When in STEREO mode, the sound goes directly to front speaker.

      • ACTIVE EQ will be available only during “FRNT NML” selection.

   5. Press the SET UP key to accept the setting.

   • The center speaker setting indication “CNTR” appears.

   6. Use the MULTI CONTROL knob or Joystick to select the appropriate center speaker setting.

      • It is not advisable to select “LRG” (large) for center speaker as this will cause the speaker to malfunction.

      If you selected “LRG” as the front speakers setting,

      1. CNTR NML (normal) : An average size center speaker is connected to the receiver.
      2. CNTR LRG (large) : A large center speaker is connected to the receiver.
      3. CNTR OFF : Center speaker setting mode to the receiver is OFF.

      If you selected “NML” as the front speakers setting,

      1. CNTR ON : Center speaker setting mode to the receiver is ON.
      2. CNTR OFF : Center speaker setting mode to the receiver is OFF.

   7. Press the SET UP key again to accept the setting.

   • The surround speaker setting indication “SURR” appears.

   8. Use the MULTI CONTROL knob or Joystick to select the appropriate surround speaker setting.

      • It is not advisable to select “LRG” (large) for surround speaker as this will cause the speaker to malfunction.

      If you selected “LRG” as the center speaker setting,

      1. SURR NML (normal) : Average size surround speakers are connected to the receiver.
      2. SURR LRG (large) : Large surround speakers are connected to the receiver.
      3. SURR OFF : Surround speaker setting mode to the receiver is OFF.

Continued to next page
Preparing for surround sound

If you have selected other than "LRG" as the center speaker setting,
1. **Surr ON**: Surround speaker setting mode to the receiver is ON.
2. **Surr OFF**: Surround speaker setting mode to the receiver is OFF.

Press the SET UP key again to accept the setting.
- The subwoofer re-mix setting indication “SW RE-MIX” scrolls across the display.

3. **Press the SET UP key to accept the setting**.
- “SW RE-MIX” scrolls across the display.
- If subwoofer is turned OFF, subwoofer re-mix setting is not visible.

Use the MULTI CONTROL knob or Joystick to select the appropriate subwoofer re-mix setting.
1. **RMX ON**: Subwoofer re-mix set mode to the receiver is ON.
2. **RMX OFF**: Subwoofer re-mix set mode to the receiver is OFF.

Adjust the speaker volume level.
From your usual listening position, adjust the volume levels. The volume levels from each speaker should be the same.

Press the SET UP key to begin TEST TONE.
- The selection of AUTO/MANUAL TEST TONE is done by the MULTI CONTROL knob or Joystick.

Press the SET UP key again to select either AUTO or MANUAL.

Use the MULTI CONTROL knob or Joystick to adjust the volume level of the test tone output from the speaker channel to be adjusted.

For AUTO selection, the test tone is heard from the speakers in the following sequence for 2 seconds each:
- L → C → R1 → R2 → L2 → SW

The channel indication blinks while the test tone is being output.

Input the distance to the speakers.

Select the DISTANCE from the set up displays and press the SET UP key again.

Measure the distance from the listening position to each of the speakers.

Jot down the distance to each of the speakers.
- Distance to front speakers: ____ feet (meters)
- Distance to center speaker: ____ feet (meters)
- Distance to surround speakers: ____ feet (meters)

Use the MULTI CONTROL knob or Joystick to select the distance to the front speakers.

The speaker indicator to be adjusted blinks.

Press the SET UP key to accept the settings.

Repeat steps 3 and 5 to input the distance for each of the speakers.

Setup is complete when the input indication appears.

Input level adjustment (analog sources only)
If the input level of an analog source signal is too high, the CLIP indicator will blink to indicate the source signal. Adjust the input level.

Use the INPUT SELECTOR knob to select the source of which the input level you want to adjust.

You can store a separate input level for each input source.

Press the SOUND key repeatedly until the "INPUT" indication appears.

Use the MULTI CONTROL knob or Joystick to adjust the input level.

- The adjustment mode is displayed for approximately eight seconds.
- The input level may be adjusted to any one of three settings: 0dB, -3dB, and -6dB. (The initial setting is 0dB.)

Press the SOUND key again to return to the input indication.
Normal playback

Preparing for playback
Some preparatory steps are needed before starting playback.

Turning on the receiver
1. Turn on the power to the related components.
2. Turn on the power to this receiver by pressing POWER ON/STANDBY key.

Selecting the input mode
If you have selected a component connected to the CD/DVD, VIDEO 2 or DVD/6CH jacks, make sure that the input mode setting is correct for the type of audio signal to be used.

Selecting MD/TAPE
Select the source name corresponding to the component connected to the MD/TAPE jacks. The initial factory setting is “TAPE”. To change the source to “MD”, follow the steps below:
1. Use the INPUT SELECTOR knob to select “TAPE”.
2. Hold down the AUTO key for more than 2 seconds.
   • The source indication changes to “MD”.
   • To return to the original indication, repeat procedure 2.

Setting the speaker status
The speaker indicator lights up.

Press the SPEAKERS ON/OFF key to switch the speakers ON or OFF.

Listening to a source component

Use the INPUT SELECTOR knob or keys to select the source you want to listen to.

The input sources change as shown below:

1. AUX
2. TUNER
3. CD/DVD
4. TAPE or MD
5. VIDEO 1
6. VIDEO 2
7. DVD/6CH

Start playback from the selected source.

Use the VOLUME CONTROL knob or VOLUME +/- keys to adjust the volume.
Normal playback

Adjusting the sound

Adjusting the TONE (remote control only)
You can adjust the sound quality when the receiver is in the PCM stereo and analog stereo mode.

1. Press the TONE key to select the TONE mode.
2. Use the MULTI CONTROL knob or Joystick to select TONE ON/OFF.
3. Press the TONE key for the following displays.
   - TONE: Tone setting mode is ON.
   - BASS: Select this to adjust the low frequency range.
   - TREB: Select this to adjust the high frequency range.
4. Use the MULTI CONTROL knob or Joystick to adjust the sound quality.
   - The bass and treble levels are adjustable from -10 to +10 in 2 steps increment.
   - The adjustment item is displayed for approximately 8 seconds.
   - If CINEMA EQ is turned ON, TONE function will not be available.

Once-touch low frequency emphasis (BASS BOOST) (remote control only)
You can adjust the sound quality when the receiver is in the PCM stereo and analog stereo modes.

Press the BASS BOOST key.
- Press the key once to select the maximum [+10] low frequency emphasis setting.
- TONE will automatically be turned ON.
- This key does not function when the receiver is in the sound quality or ambience effects adjustment mode.

Switching back the previous setting
Press the BASS BOOST key again.

Adjusting the LOUDNESS mode (remote control only)
You can adjust the Loudness function which controls the low volume settings to maintain the music’s richness. The adjustment can be made when the receiver is in the PCM stereo and analog stereo mode.

Press the LOUDNESS key to turn the LOUDNESS setting ON.

To cancel
Press the LOUDNESS key again so that the “LOUDNESS” indicator goes off.

Muting the sound
The MUTE key lets you mute the sound of the speakers.

Press the MUTE key.

To cancel
Press the MUTE key again so that the “MUTE” indicator goes off.
- MUTE ON can also be deactivated by turning the volume control knob.

CINEMA EQ mode
You can enjoy a more impressive sound effect when you switch CINEMA EQ ON during Dolby Digital and DTS playback.

Press the CINEMA EQ key.
- “CINEMA EQ” will scroll across the display.
- When CINEMA EQ is turned ON, subwoofer re-mix’s function will also be effective.
- If REC MODE is ON or TREBLE’s level is -6 or below, CINEMA EQ function will not be available.

To cancel
Press the CINEMA EQ key again so that the “CINEMA EQ” indicator goes off and displays “OFF”.
- When CINEMA EQ is turned OFF, the setting will remain until the next selection is made.

Listening with headphones

Press the SPEAKERS ON/OFF key so that the speaker indicator goes off.
- Make sure the SP indicator is turned OFF.

If you turn off all of the speakers when in surround mode, the surround mode will be canceled as well, resulting in stereo playback.

Connect headphones to the PHONES jack.

Use the VOLUME CONTROL knob or VOLUME keys to adjust the volume.
Recording

Recording audio (analog sources)

1. Use the INPUT SELECTOR knob to select the source (other than "MD/TAPE") you want to record.
2. Set the MD or TAPE recorder to record.
3. Start playback, then start recording.

Recording video

1. Use the INPUT SELECTOR to select the video source (other than "VIDEO 1") you want to record.
2. Set the video deck connected to VIDEO 1 to record.
   • Select the REC MODE to record a digital input source.
3. Start playback, then start recording.
   • Recording may not be normal for some video software. This is due to the copy guard condition.

Recording audio (digital sources)

Switch on the REC MODE to record a digital input source.
Usually use the A-REC (Auto-Record) MODE to record audio input sources. When the digital mode changes during recording in the A-REC MODE, the audio input source may be interrupted momentarily.

Recording music in A-REC or M-REC mode

1. Use the INPUT SELECTOR knob to select the source (CD/DVD, DVD/6CH or VIDEO 2) you want to record.
2. Set the MD or TAPE recorder to record.
3. Press and hold the DIMMER key for more than 2 seconds to select the A-REC or M-REC mode.
   • The mode changes every 2 seconds as shown below.
   ① Rec mode off : The digital input record mode is switched off.
   ② A-REC : The digital input signals (DTS, Dolby Digital, or PCM) are identified automatically and converted into stereo signals that are ready for recording.
   ③ M-REC : The input signal type at the moment this mode is selected is held throughout this mode.
   For A-REC mode:
   -
   For M-REC mode:
   -

Recording audio (analog sources)
Listening to radio broadcasts

The receiver can store up to 40 stations in the memory and recall them by one-touch operation.

Tuning radio stations

1. Use the INPUT SELECTOR knob or TUNER key to select the tuner.
2. Use the BAND key to select the desired broadcast band.
   - Each press switches the band as follows:
     - FM
     - AM
3. Use the AUTO key to select the desired tuning method.
   - Each press switches the tuning method as follows:
     - AUTO lit (auto tuning)
     - AUTO not lit (manual tuning)
   - Normally, set to “AUTO” (auto tuning). If the radio waves are weak and there is a lot of interference, switch to manual tuning. (With manual tuning, stereo broadcasts will be received in monaural.)
4. Use the MULTI CONTROL knob or Joystick, or TUNING keys to select the station.
   - Auto tuning : The next station is tuned automatically.
   - Manual tuning : Turn the knob (press the key) to select the desired station.

Presetting radio stations manually

1. Tune the station you want to store.
2. Press the MEMORY key while receiving the station.
   - Blinks for 5 seconds
   - Lights for 5 seconds
   - Proceed to step 3 within 5 seconds.
     (If more than 5 seconds elapse, press the MEMORY key again).
3. Use the MULTI CONTROL knob to select one of the station presets (1 – 40).
4. Press the MEMORY key again to confirm the setting.
   - Repeat steps 1, 2, 3, and 4 to store as many stations as necessary.
   - If you store a station at a previously used preset, the previous station will be replaced by the new one.
Listening to radio broadcasts

Receiving preset stations

1. Press the TUNER key to select tuner as the source.

2. Enter the number of the preset station you want to receive (up to "40").

Press the numeric keys in the following order:

For "15", press ........................................... [0], [5]
For "20", press ........................................... [0], [0], [0]

• If you make a mistake entering a two digit number, press the +10 key repeatedly to return to the original display and start again.

Receiving preset stations in order (P.CALL)

1. Press the TUNER key to select tuner as the source.

2. Use the Joystick to adjust the P.CALL direction to select the desired station.

• Each time you push the Joystick, another preset station is received in order.

Pushing the Joystick to P.CALL does the following:

Pushing the Joystick to P.CALL does the following:

Holding the Joystick on or direction, lets you skip through the presets, receiving each preset station at 0.5 second intervals.
**Ambience effects**

This receiver is equipped with listening modes that allow you to enjoy an enhanced sonic ambience with a variety of video sources. In order to obtain the optimum effect from the surround modes, make sure to input the proper speaker settings beforehand.

**Surround modes**

**DTS**

The DTS multi-channel audio format is available on CD, LD and DVD software. DTS is a strictly digital format and cannot be decoded inside most CD, LD or DVD players. For this reason, if you attempt to listen to DTS encoded software through the analog output of your new CD, LD or DVD player, you will experience digital noise in most cases. This noise can be quite loud if the analog output is connected directly to a high power amplification system. Proper measures for playing the digital output as described below should be taken to avoid this situation. To enjoy DTS Digital Surround playback, an external 5.1 channel DTS Digital Surround decoder system or an amplifier with a built-in DTS Digital Surround decoder must be connected to the digital output (S/P DIF, AES/EBU or TosLink) of a CD, LD or DVD player. All models are incorporated with the DTS decoder.

*LFE = Low Frequency Effects. This channel delivers separate non-directional bass signals to the subwoofer for more dynamic deep bass sound effects.

**Dolby Digital**

The Dolby Digital surround format lets you enjoy up to 5.1 channels of digital surround sound from Dolby Digital program sources (such as Laserdisc or DVD software marked Dolby Digital). Compared with previous Dolby surround, Dolby Digital provides even better sound quality, greater spatial accuracy, and improved dynamic range.

**Note**

Although a full set of speakers (front left, right, and center, surround left and right, and a subwoofer) is required for true 5.1 channel Dolby Digital surround sound, this receiver lets you enjoy Dolby Digital (and Dolby Surround) program sources, even if you connect only the front speakers.

**Manufactured under license from Dolby Laboratories. “Dolby”, “Pro Logic” and the double-D symbol are trademarks of Dolby Laboratories.**

![Diagram of DTS Surround Sound System](image-url)

![Diagram of Dolby Digital Surround Sound System](image-url)
Ambience effects

**Ambience effects**

**DVD 6-channel mode**

Using a DVD player or the like equipped with six (5.1) output channels and the receiver, you can enjoy multi-channel encoded DVD source material in all its splendor. Since the source signals are digital and each channel is input independently, the resulting sound quality, sense of spaciousness, and dynamic range are superb.

**What’s DSP?**

DSP stands for Digital Signal Processor. The way a sound is heard in an actual environment depends on a variety of different factors. One of the most important is reverberation (the act of decaying elements of sound echoing in various places). The DSP modes produce the feeling of presence by using the DSP to create reverberation, without spoiling the sound quality of the original signal.

**DSP mode**

The DSP mode lets you add the atmosphere of a live concert or hall to almost any type of program source. These modes are particularly effective when used with stereo program sources, like CD, television, and FM radio. You might enjoy trying the ARENA, JAZZ CLUB, THEATER, STADIUM or DISCO mode the next time you watch a concert or sporting event!

*LFE = Low Frequency Effects. This channel delivers separate non-directional bass signals to the subwoofer for more dynamic deep bass sound effects.*

*5028/22-24/EN 14/06/2002, 12:03 PM*
**Ambience effects**

**Surround play**

The DTS compatible models can reproduce a CD, DVD, or LD carrying the DTS mark. DOLBY DIGITAL can be used when playing DVD or LD software bearing the DOLBY DIGITAL format digital broadcast mark. DOLBY PRO LOGIC can be used when playing video, DVD, or LD software bearing the DOLBY PRO LOGIC mark.

![Input selector and listen mode diagram]

**INPUT SELECTOR**

**INPUT MODE**

**LISTEN MODE**

**Preparations**

- Turn ON related components.
- Complete “Preparing for surround sound” (speaker settings).
- Use the INPUT SELECTOR to select the component you wish to play back with surround sound.
- Use the INPUT MODE key to select the input mode (analog or digital) for the source you wish to play back.
- Noise will be produced when a DTS source is played by selecting the analog input.

1. **Start playing the video software.**

2. **Press the LISTEN MODE key to select the listening mode.**

   The listening mode settings are stored separately for each input. If the input mode is set to full auto ("AUTO DETECT" lights), the receiver selects the optimal listening mode automatically based on the type of input signal and the speaker settings.

   Each press of the LISTEN MODE key switches the setting as listed below. The listening mode settings are different depending on the type of input signal.

   **When the DOLBY DIGITAL signal is input:**

   (The DOLBY DIGITAL, PRO LOGIC, or STEREO indicator lights up.)

   | 1. DOLBY DIGITAL | DOLBY DIGITAL surround. |
   | 2. PL II MOVIE   | PRO LOGIC II surround MOVIE mode. |
   | 3. PL II MUSIC   | PRO LOGIC II surround MUSIC mode. |
   | 4. PRO LOGIC     | PRO LOGIC II surround PRO LOGIC mode. |
   | 5. STEREO        | Normal stereo playback. |

   **When you select DOLBY DIGITAL**

   “DOLBY DIGITAL” will scroll from right to left.

   ![Dolby digital select mode]

   **When the DTS signal is input:**

   (The DTS indicator lights up.)

   | 1. DTS | DTS surround |
   | 2. STEREO | Normal stereo playback |

   **When the analog signal or the digital signal (except for DOLBY DIGITAL or DTS signal) is input:**

   | 1. PL II MOVIE | PRO LOGIC II surround MOVIE mode. |
   | 2. PL II MUSIC | PRO LOGIC II surround MUSIC mode. |
   | 3. PRO LOGIC   | PRO LOGIC II surround PRO LOGIC mode. |
   | 4. ARENA       | DSP Surround ARENA mode. |
   | 5. JAZZ CLUB   | DSP Surround JAZZ CLUB mode. |
   | 6. THEATER     | DSP Surround THEATER mode. |
   | 7. STADIUM     | DSP Surround STADIUM mode. |
   | 8. DISCO       | DSP Surround DISCO mode. |
   | 9. STEREO      | Normal stereo playback. Sound is produced from the two front channels only. |

- Dolby Digital or DTS signal having more channels than the maximum number of playback channels available using the receiver’s current settings is input, downmixing is performed to match the number of available channels.

3. **Adjust the volume.**

**Notes**

- Depending on the type of the signal or speaker setting, some listening modes cannot be selected.
- When playback is started, the sound may be cut or interrupted before the input source is confirmed as Dolby Digital.
- To enjoy Dolby Digital surround (as well as all the other listening modes) from a single component, be sure to use a Dolby Digital compatible source component.
Ambience effects

DVD 6-channel playback

Using a DVD player or the like equipped with six (5.1) output channels and the receiver, you can enjoy surround sound playback. When you try to play a disc other than Dolby Digital such as DTS CD, no sound is produced or, noise may be heard. To avoid this situation, make sure that you connect the component to the receiver’s DVD/6CH INPUT jacks through a surround processor which can decode the surround signal you want to listen to. Connecting a DVD player which can decode the surround signal itself is also acceptable.

Preparations

- Connect your DVD player to the DVD/6CH jacks of the receiver.
- Turn on all other components that will be used.
- Complete “Preparing for surround sound”.

1. Select “DVD/6CH” as the input source.
2. Select “6CH INPT” by pressing the INPUT MODE key.
3. Start playback of the DVD software.
4. Adjust the volume.

- It is not possible to adjust the volume level or sound quality (SET UP, SOUND) of the channels separately when the receiver is in the DVD/6CH mode. Adjust the volume with the controls of the DVD player.
- For the powered subwoofer, you can adjust the volume of the subwoofer using the subwoofer’s own volume control.
- ACTIVE EQ will not be available during DVD/6CH mode.

Convenient functions

Adjusting the sound

You can make further adjustments to the sound while listening to playback in the surround mode.

1. Press the SOUND key until the desired item appears in the display.

Each time you press the button, the menu changes as follows: Note that some items are not displayed in certain modes.

1. C (center speaker level adjustment)*
2. SR (right surround speaker level adjustment)*
3. SL (left surround speaker level adjustment)*
4. SW (subwoofer level adjustment)*
5. INPUT (input level adjustment - analog mode only)
6. NIGHT (midnight mode ON/OFF - Dolby Digital mode only)
7. PANORAMA (Panorama mode ON/OFF)**
8. DIMENSION (Dimension adjustment)**
9. CENTER WIDTH (Center Width adjustment)**

* The adjustment is only temporary for the current input selection. The value will return automatically to the original setup value when the power is turned on/off or when the input selection is changed.
** Pro Logic II Music mode only.

2. Use the MULTI CONTROL knob or Joystick to adjust the setting as desired.

- The adjustment item is displayed for approximately 8 seconds.

Ambience effects

DVD 6-channel playback

Using a DVD player or the like equipped with six (5.1) output channels and the receiver, you can enjoy surround sound playback. When you try to play a disc other than Dolby Digital such as DTS CD, no sound is produced or, noise may be heard. To avoid this situation, make sure that you connect the component to the receiver’s DVD/6CH INPUT jacks through a surround processor which can decode the surround signal you want to listen to. Connecting a DVD player which can decode the surround signal itself is also acceptable.

Preparations

- Connect your DVD player to the DVD/6CH jacks of the receiver.
- Turn on all other components that will be used.
- Complete “Preparing for surround sound”.

1. Select “DVD/6CH” as the input source.
2. Select “6CH INPT” by pressing the INPUT MODE key.
3. Start playback of the DVD software.
4. Adjust the volume.

- It is not possible to adjust the volume level or sound quality (SET UP, SOUND) of the channels separately when the receiver is in the DVD/6CH mode. Adjust the volume with the controls of the DVD player.
- For the powered subwoofer, you can adjust the volume of the subwoofer using the subwoofer’s own volume control.
- ACTIVE EQ will not be available during DVD/6CH mode.

Convenient functions

Adjusting the sound

You can make further adjustments to the sound while listening to playback in the surround mode.

1. Press the SOUND key until the desired item appears in the display.

Each time you press the button, the menu changes as follows: Note that some items are not displayed in certain modes.

1. C (center speaker level adjustment)*
2. SR (right surround speaker level adjustment)*
3. SL (left surround speaker level adjustment)*
4. SW (subwoofer level adjustment)*
5. INPUT (input level adjustment - analog mode only)
6. NIGHT (midnight mode ON/OFF - Dolby Digital mode only)
7. PANORAMA (Panorama mode ON/OFF)**
8. DIMENSION (Dimension adjustment)**
9. CENTER WIDTH (Center Width adjustment)**

* The adjustment is only temporary for the current input selection. The value will return automatically to the original setup value when the power is turned on/off or when the input selection is changed.
** Pro Logic II Music mode only.

2. Use the MULTI CONTROL knob or Joystick to adjust the setting as desired.

- The adjustment item is displayed for approximately 8 seconds.
Ambience effects

Midnight mode (Dolby Digital mode only)

When watching movies at night, you might not be able to raise the volume as loud as normal. Midnight mode compresses the dynamic range of previously specified parts of the Dolby Digital sound track (like scenes with sudden increases in volume) to minimize the difference in volume between the specified and non-specified parts. This makes it easy to hear all of the sound track, even when listening at low volumes.

1. Press the SOUND key repeatedly until “NIGHT” appears on the display.
2. Use the MULTI CONTROL knob or Joystick to select the ON or OFF setting.

Panorama mode (Pro Logic II Music mode only)

When listening to music, you will be able to enjoy the “wraparound” sound effect when you adjust the panorama mode.

1. Press the SOUND key repeatedly until “PANORAMA” appears on the display.
2. Use the MULTI CONTROL knob or Joystick to select PANORAMA ON or OFF.

Dimension mode (Pro Logic II Music mode only)

When listening to music with certain recordings, you will also be able to achieve a suitable balance from all the speakers by adjusting the dimension mode.

1. Press the SOUND key repeatedly until “DIMENSION” appears on the display.
2. Use the MULTI CONTROL knob or Joystick to adjust the soundfield towards the rear or the front.

Center Width mode (Pro Logic II Music mode only)

Center width adjustment allows you to enjoy an enhanced sound when listening to music through center image from only center speaker, or left and right speakers or various combinations adjustments.

1. Press the SOUND key repeatedly until “CENTER WIDTH” appears on the display.
2. Use the MULTI CONTROL knob or Joystick to adjust the left-center-right output.

**Notes:**
- Midnight mode cannot be selected if the current source is not CD/DVD, DVD/6CH or VIDEO 2.
- Panorama mode cannot be selected if the current source is CD/DVD, DVD/6CH or VIDEO 2.
- Center Width mode cannot be selected if the current source is CD/DVD, DVD/6CH or VIDEO 2.
Ambience effects

Subwoofer adjustment

It is easy to adjust the volume of the subwoofer using the remote control.

1 Press the SOUND key repeatedly until “SW” appears on the display.

2 Use MULTI CONTROL knob or keys to adjust the volume.
   • The adjustment range is –10 dB to +10 dB.

Display dimmer adjustment

The dimmer function lets you select the brightness of the receiver's display. You might find this useful if you darken your room to watch movies or listen to music.

Each time you press the DIMMER key, the display brightness changes among the three available settings. Select the brightness level you find most pleasing.

   • For the remote control, this function can be operated from the key.

96kHz LPCM playback

The receiver is compatible with the 96kHz LPCM playback. To play a 96kHz DVD, set the listen mode to “STEREO”.

• In F-AUTO input mode, the listen mode will automatically be STEREO.
• When in D-MANUAL input mode (listen mode is not STEREO), “FS 96kHz” will appear in the display and no sound can be heard from the speakers.

Press the LISTEN MODE key (the listen mode changes to the STEREO mode) to output sound from the speakers.
The remote control supplied with this receiver is also capable of controlling components from a variety of manufacturers once you register the appropriate setup codes into the remote control unit.

Low battery warning
Replace all two batteries with new ones when you notice a shortening of the distance from which the remote control will operate. After changing batteries, please re-enter the setup codes.

Registering setup codes for other components

1. **Find the setup code of the component to be registered.**
   - Refer to the setup code lists to find the setup code for the component to be registered.
   - Example: To register a DVD made by KENWOOD, you would enter “805”.

<table>
<thead>
<tr>
<th>Input</th>
<th>Component</th>
<th>Maker</th>
<th>Code</th>
<th>Key</th>
</tr>
</thead>
<tbody>
<tr>
<td>(DVD)</td>
<td>DVD player</td>
<td>KENWOOD</td>
<td>805, 808</td>
<td>DVD</td>
</tr>
</tbody>
</table>

2. **Registering components for REMOTE MODE (DVD, CBL, DSS/SAT, VCR, TV, OTHERS) keys.**
   - For DVD, CBL, DSS/SAT, VCR or TV keys;
     - Hold down the SOURCE key and press the numeric keys to enter the setup code.
     - Example: Press “805” to register a DVD player manufactured by KENWOOD.
     - If you push an invalid key, the remote control will exit the setup mode.
   - The OTHERS key enables you to operate another DVD, CBL, DSS/SAT, VCR or TV component.
     - For OTHERS key;
       - Hold down the OTHERS key and press the numeric keys to enter the setup code.
       - Example: After you have registered the KENWOOD DVD player, press “804” to register another DVD player which is manufactured by Panasonic.
       - If you push an invalid key, the remote control will exit the setup mode.
   - Press any of the REMOTE MODE (DVD, CBL, DSS/SAT, VCR, TV, OTHERS) key and then press the SOURCE key to check that the component you want to control turns on.
     - If the component does not react, and there is more than one setup code, enter another setup code and try again.
     - Example: After you have registered the KENWOOD DVD player, press “804” to register another DVD player which is manufactured by Panasonic.
     - If you push an invalid key, the remote control will exit the setup mode.
   - Repeat steps 2 to 3 to register additional components until all components have been registered.

Alternative REMOTE MODE key
This operation is optional and is convenient when you link an INPUT SELECTOR key to the REMOTE MODE key. While operating one component, the INPUT SELECTOR key functions as an alternative REMOTE MODE key to select another component.

- Example: REMOTE MODE (DVD) key can be linked to the INPUT SELECTOR (VIDEO 1) key as described below;
  - After registering the setup code, press and hold the SOURCE key, then press the REMOTE MODE (DVD) key.
  - While holding down the SOURCE key, press the INPUT SELECTOR (VIDEO 1) key.
    - Now the VIDEO 1 key will function as a DVD key which can be selected at the same time while operating a CD player.
    - Repeat step 1 to 2 to link other INPUT SELECTOR keys.

Note
Although each setup code is designed to work with a number of different models, certain codes may not work with some models. (Also, certain codes may only operate some of the functions available on a given model.)
Basic remote control operations for other components

Operating other components

This operation lets you operate the registered components. KENWOOD audio components with system control turn on and off automatically with the receiver via the system control connections.

1. Use the INPUT SELECTOR keys to select the component you desire.
   - Pressing the INPUT SELECTOR keys also changes the input selector on the receiver.
   - When you operate your registered DVD player, Cable tuner, DSS/SAT receiver, VCR or TV, go to step 2.
   - When you operate the CD player, Cassette deck, MD player, or Tuner with system control connection, go to step 3.

2. Press the SOURCE key.
   - To return to the receiver operation mode, press the RECEIVER key.

3. Press the operation keys you desire.
   - The remote control mode remains at the selected input. If you wish to operate another component, repeat step 2 or 3.

Note

Be sure to point the remote control at the remote sensor on the receiver when you want to operate KENWOOD components connected by system control cords. Otherwise, point the remote control at the component you want to operate.

Basic remote control operations for other components

CASSETTE deck, CD player & MD recorder operations

You can perform these basic operations using the keys described below when connected to KENWOOD cassette deck, CD player or MD recorder equipped with system control operations.

**Cassette deck operations’ keys**

**CD player operations’ keys**

**MD recorder operations’ keys**

---

*5228/30-36/EN 14/06/2002, 12:05 PM*
**Basic remote control operations for other components**

**Other components’ operations**

Refer to the following for the type of remote control operations available for each component.

1. Select the input source.
2. Press the keys corresponding to the operations you desire. Refer to the following sections for details.

These keys can be used to perform the basic operations of KENWOOD and other manufacturers’ components which the setup code for each component had been entered beforehand.

**TV operation keys**

**VCR operation keys**

• When pressing keys in succession, press each key firmly and be sure to wait at least 1 second before pressing the next key.
• Numeric keys function the same as the numeric keys on the original remote.

**Notes**

1. Certain codes may only operate some of the function available on a given model.
2. The above show the typical functions available for each component. Some manufacturers use different key combinations to perform similar functions. For that reason, we have programmed extra functions on some of the unused number keys to help you control your equipment.

### Resetting the Microcomputer

The microcomputer may malfunction (unit cannot be operated, or shows an erroneous display) if the power cord is unplugged while the power is ON, or due to some other external factor. If this happens, execute the following procedure to reset the microcomputer and return the unit to its normal operating condition.

- Please note that resetting the microcomputer will clear the contents of the memory and return the unit to the state it was in when it left the factory.

**Unplug the power cord from the wall outlet, then plug it back in while holding down the POWER ON/STANDBY key.**

### Amplifier

Specifications

**AUDIO section**

Rated power output during STEREO operation

- 100 watts per channel minimum RMS, both channels driven, at 8Ω from 40 Hz to 20 kHz with no more than 0.7% total harmonic distortion. (FTC)

Effective power output during SURROUND operation

- FRONT (40 – 20 kHz, 0.7% T.H.D. at 8Ω one channel driven) ............................................. 100 W + 100 W
- CENTER (40 – 20 kHz, 0.7% T.H.D. at 8Ω one channel driven) ............................................. 100 W
- SURROUND (40 – 20 kHz, 0.7% T.H.D. at 8Ω one channel driven) ............................................. 100 W + 100 W
- SUBWOOFER (80 Hz, 0.7% T.H.D. at 8Ω one channel driven) .................................................. 100 W

Total harmonic distortion .................................. 0.05% (1 kHz, 50 W, 8Ω)

Frequency response

- CD ........................................................................... 20 Hz – 70 kHz, +0 dB, -3.0 dB
- DVD/6CH INPUT .................................................. 550 mV / 47 kΩ
- TAPE REC ............................................................... 550 mV / 1 kΩ
- PRE OUT (SUBWOOFER) (VR-606) ...................... 1.5 V / 2.2 kΩ
- BASS ................................................................ ±10 dB (at 100 Hz)
- TREBLE ............................................................ ±10 dB (at 10 kHz)

Signal to noise ratio (IHF’66) ........................................ 95 dB

Input sensitivity / impedance

- CD ................................................................. 550 mV / 47 kΩ
- DVD/6CH INPUT .................................................. 550 mV / 47 kΩ
- TAPE REC ............................................................... 550 mV / 1 kΩ
- PRE OUT (SUBWOOFER) (VR-606) ...................... 1.5 V / 2.2 kΩ

Output level / impedance

- VOLUME at -30dB level ....................................... +8 dB (at 100 Hz)

**DIGITAL AUDIO section**

Sampling frequency .................................. 32 kHz, 44.1 kHz, 48 kHz, 96 kHz

Input level / impedance / wave length

- Optical .......................................................... (-15 dBm – -21 dBm), 660 nm ±30 nm
- Coaxial .............................................................. 0.5 V-p / 75 Ω

**VIDEO section**

VIDEO inputs / outputs

- VIDEO (composite) ........................................ 1 Vp-p / 75 Ω
- S VIDEO (luminance signal) ......................... 1 Vp-p / 75 Ω
- S VIDEO (chrominance signal) ...................... 0.286 Vp-p / 75 Ω

**FM tuner section**

Tuning frequency range ................................ 87.5 MHz – 108.0 MHz

Usable sensitivity (MONO) .................. 1.3 µV (75 Ω) / 13.2 dBf (75 kHz DEV., SINAD 30 dB)

50dB quieting sensitivity

STEREO ..................................................... 28 µV (75 Ω) / 40.2 dBf

Total harmonic distortion (1 kHz)

- MONO .......................................................... 0.5% (71.2 dBf input)
- STEREO ....................................................... 0.7% (71.2 dBf input)

Signal to noise ratio (1 kHz, 75 kHz DEV.)

- MONO .......................................................... 75 dB (71.2 dBf input)
- STEREO ....................................................... 68 dB (71.2 dBf input)

Stereo separation (1 kHz) ........................................................... 40 dB

Selectivity (±400 kHz) ................................................................. 70 dB

Frequency response .................................. (30 Hz – 15kHz), +0.5 dB, –3.0 dB

**AM tuner section**

Tuning frequency range

10 kHz step .................................................. 530 kHz – 1,700 kHz

Usable sensitivity (30% mod., S/N 20dB) ......... 16 µV / (800 µV/m)

Signal to noise ratio (30% mod. 1 mV input) .................. 50 dB

**GENERAL**

Power consumption .................................................. 2.2 A

AC outlet

SWITCHED .................................................. (total 150 W, 1.25 A max.)

Dimensions .................................................. W : 440 mm (17-5/16”)

H : 143 mm (5-5/8”)

D : 303 mm (11-15/16”)

Weight (Net) .................................................. 7.7 kg (17.00 lb)

---

Notes

1. KENWOOD follows a policy of continuous advancements in development. For this reason specifications may be changed without notice.
2. The full performance may not be exhibited in an extremely cold location (under a water-freezing temperature).

For your records

Record the serial number, found on the back of the unit, in the spaces designated on the warranty card, and in the space provided below. Refer to the model and serial numbers whenever you call upon your dealer for information or service on this product.
