GPS NAVIGATION SYSTEM  
**Quick Start Guide**

Kenwood Corporation

## About The Quick Start Guide

This Quick Start Guide explains the basic functions of this unit. For functions not covered in this guide, refer to the Instruction Manual (PDF file) contained in the included CD-ROM "Instruction Manual".

To refer to the Instruction Manual contained in the CD-ROM, a PC loaded with Microsoft® Windows XP/ Vista/7 or Mac OS X® 10.4 or later is required in addition to Adobe® Reader™ 7.1 or Adobe® Acrobat® 7.1 or later.

The Instruction Manual is subject to change for modification of specifications and so forth. You can download the latest version of the Instruction Manual from [www.kenwood.com/cs/ce/](http://www.kenwood.com/cs/ce/).

### NOTE

- The panels shown in this guide are examples used to provide clear explanations of the operations. For this reason, they may be different from the actual panels.
- In this manual, each model name is abbreviated as follows.
  - DNX7280BT: **DNX7**
  - DNX5280BT and DNX5580BT: **DNX5**
  - DNX4280BT: **DNX4**
- If above icons are shown, read the article applicable to the unit you use.
- In operation procedures, bracket shape indicates the key or button you should control.
  - < >: indicates the name of panel buttons.
  - [ ]: indicates the name of touch keys.

## Precautions

### ⚠ WARNING

#### To prevent injury or fire, take the following precautions:

- To prevent a short circuit, never put or leave any metallic objects (such as coins or metal tools) inside the unit.
- Do not watch or fix your eyes on the unit's display when you are driving for any extended period.
- If you experience problems during installation, consult your Kenwood dealer.

#### Precautions on using this unit

- When you purchase optional accessories, check with your Kenwood dealer to make sure that they work with your model and in your area.
- You can select language to display menus, audio file tags, etc. See **Language setup (P.68)** in the Instruction Manual.
- The Radio Data System or Radio Broadcast Data System feature won't work where the service is not supported by any broadcasting station.

#### Precautions on battery

- Keep battery out of reach of children and in original package until ready to use. Dispose of used batteries promptly. If swallowed contact physician immediately.
- Do not leave the battery near fire or under direct sunlight. A fire, explosion or excessive heat generation may result.
- Do not set the remote control in hot places such as on the dashboard.
- Danger of explosion if Lithium battery is incorrectly replaced. Replace only with the same or equivalent type.

#### Protecting the monitor

To protect the monitor from damage, do not operate the monitor using a ballpoint pen or similar tool with the sharp tip.

#### Lens fogging

When you turn on the car heater in cold weather, dew or condensation may form on the lens in the disc player of the unit. Called lens fogging, this condensation on the lens may not allow discs to play. In such a situation, remove the disc and wait for the condensation to evaporate. If the unit still does not operate normally after a while, consult your Kenwood dealer.

#### Precautions on handling discs

- Do not touch the recording surface of the disc.
- Do not stick tape etc. on the disc, or use a disc with tape stuck on it.
- Do not use disc type accessories.
- Clean from the center of the disc and move outward.
- When removing discs from this unit, pull them out horizontally.
- If the disc center hole or outside rim has burrs, use the disc only after removing the burrs with a ballpoint pen etc.
- Discs that are not round cannot be used.

- 8-cm (3 inch) discs cannot be used.
- Discs with coloring on the recording surface or discs that are dirty cannot be used.
- This unit can only play the CDs with

This unit may not correctly play discs which do not have the mark.

- You cannot play a disc that has not been finalized. (For the finalization process see your writing software, and your recorder instruction manual.)

## Acquiring GPS signals

The first time you turn on this unit, you must wait while the system acquires satellite signals for the first time. This process could take up to several minutes. Make sure your vehicle is outdoors in an open area away from tall buildings and trees for fastest acquisition. After the system acquires satellites for the first time, it will acquire satellites quickly each time thereafter.

## About the front panel **DNX7**

When removing the product from the box or installing it, the front panel may be positioned at the angle shown in (Fig. 1). This is due to the characteristics of mechanism the product is equipped with.

When the product is first powered on works properly, the front panel will automatically move into the position (initial setting angle) shown in (Fig. 2).

(Fig. 1)

(Fig. 2)

## Cleaning The Unit

If the faceplate of this unit is stained, wipe it with a dry soft cloth such as a silicon cloth. If the faceplate is stained badly, wipe the stain off with a cloth moistened with neutral cleaner, then wipe it again with a clean soft dry cloth.

- Applying spray cleaner directly to the unit may affect its mechanical parts. Wiping the faceplate with a hard cloth or using a volatile liquid such as thinner or alcohol may scratch the surface or erase screened print.

## How To Reset Your Unit

If the unit or the connected unit fails to operate properly, reset the unit.

### 1 Press the <Reset> button.

The unit returns to factory settings.

#### **DNX7**

#### **DNX5 DNX4**

#### NOTE

- Disconnect the USB device before pressing the <Reset> button. Pressing the <Reset> button with the USB device connected can damage the data stored in the USB device. For how to disconnect the USB device, see **How To Play Music (P.17)**.
- When the unit is turned on after resetting, the Initial SETUP screen appears. See **First Step (P.6)**.

## Safety Precautions and Important Information

Read this information carefully before starting to operate the Kenwood Car Navigation System and follow the instructions in this manual. Neither Kenwood nor Garmin shall be liable for problems or accidents resulting from failure to observe the instructions in this manual.

### ⚠️ WARNINGS

#### To prevent injury or fire, take the following precautions:

- To prevent a short circuit, never put or leave any metallic objects (such as coins or metal tools) inside the unit.
- Do not watch or fix your eyes on the unit's display when you are driving for any extended period.
- Mounting and wiring this product requires skills and experience. The mounting and wiring should be done by professionals.

#### Failure to avoid the following potentially hazardous situations could result in an accident or collision resulting in death or serious injury.

When navigating, carefully compare information displayed on the navigation system to all available navigation sources, including information from street signs, visual sightings, and maps. For safety, always resolve any discrepancies or questions before continuing navigation.

Always operate the vehicle in a safe manner.

Do not become distracted by the navigation system while driving, and always be fully aware of all driving conditions. Minimize the amount of time spent viewing the screen of the navigation system while driving, and use voice prompts when possible.

Do not enter destinations, change settings, or access any functions requiring prolonged use of the navigation system controls while driving. Stop your vehicle in a safe and legal manner before attempting such operations.

Keep the system volume at a low enough level to be able to hear outside noises while driving. If you can no longer hear outside noises, you may be unable to react adequately to the traffic situation. This may cause accidents.

The navigation system will not display the correct current position of the vehicle the first time it is used after purchase, or if the vehicle battery is disconnected. GPS satellite signals will soon be received, however, and the correct position will be displayed.

Be careful of the ambient temperature. Using the navigation system at extreme temperatures can lead to malfunction or damage. Also note that the unit can be damaged by strong vibration, by metal objects, or by water getting inside the unit.

### ⚠️ CAUTIONS

#### Failure to avoid the following potentially hazardous situations may result in injury or property damage.

The navigation system is designed to provide you with route suggestions. It does not reflect road closures or road conditions, weather conditions, or other factors that may affect safety or timing while driving.

Use the navigation system only as a navigational aid. Do not attempt to use the navigation system for any purpose requiring precise measurement of direction, distance, location, or topography.

The Global Positioning System (GPS) is operated by the United States government, which is solely responsible for its accuracy and maintenance. The government system is subject to changes that could affect the accuracy and performance of all GPS equipment, including the navigation system. Although the navigation system is a precision navigation device, any navigation device can be misused or misinterpreted and, therefore, become unsafe.

### IMPORTANT INFORMATION

#### Vehicle Battery Preservation

This navigation system can be used when the ignition key is turned to ON or ACC. To preserve the battery, however, it should be used with the engine running whenever possible. Using the navigation system for a long time with the engine switched off can cause the battery to run down.

## Map Data Information

One of the goals of Garmin is to provide customers with the most complete and accurate cartography that is available to us at a reasonable cost. We use a combination of governmental and private data sources, which we identify in product literature and copyright messages displayed to the consumer. Virtually all data sources contain some inaccurate or incomplete data. In some countries, complete and accurate map information is either not available or is prohibitively expensive.

## First Step

Power on the unit and perform some setup steps before using.

### **DNX7**

Press the <NAV>, <MENU>, or <TEL> button.

The unit is turned on.

#### ● To turn off the unit:

Press the <MENU> button for 1 second.

### **DNX5 DNX4**

Press the <MENU> button.

The unit is turned on.

#### ● To turn off the unit:

Press the <MENU> button for 1 second.

The "Initial setup" is only necessary when you use the unit for the first time after purchase, and when you reset the unit.

## 1 Touch the corresponding key and set the value.

### Language

Select the language used for the control screen and setting items. Default is "British English (en)" for DNX7280BT/DNX5280BT/DNX4280BT and "Russian" for DNX5580BT.

After setting, touch [Enter].

### Angle **DNX7**

Adjust the position of the monitor. Default is "0".

After setting, touch [↩].

### iPod AV Interface Use

Set the terminal which your iPod is connected to. Default is "iPod".

### Color

Set the screen and button illumination color. You can select whether to perform color scan and adjust scanning color.

After setting, touch [↩].

### EXT SW **DNX7**

Control the external devices.

After setting, touch [↩].

### Camera

Set the parameters for the camera.

After setting, touch [↩].

## 2 Touch [Finish].

### NOTE

- For details on operations of each setting, refer to the Instruction Manual.
- You can adjust the front panel button (ATT button, etc.) sensitivity of **DNX7**. For details, refer to **Panel Switch Sensitivity (P.68)** in the Instruction Manual.

- 3) If necessary, touch the arrows to view other traffic delays on your route.
- 4) Touch [Avoid].

### ● Viewing the traffic map

The traffic map shows color-coded traffic flow and delays on nearby.

### ● About traffic

#### NOTICE

- Garmin and Kenwood are not responsible for the accuracy or timeliness of the traffic information.  
With an FM traffic receiver, the navigation system can receive and use traffic information. When a traffic message is received, you can see the event on the map and change your route to avoid the incident. The FM TMC subscription activates automatically after your navigation system acquires satellite signals while receiving traffic signals from the service provider. Go to [www.garmin.com/fmtraffic](http://www.garmin.com/fmtraffic) for more information.

### ● Updating the software

To update the navigation system software, you must have a memory card, a memory card reader, and an internet connection.

#### NOTE

- The unit may restart when you insert a memory card.

- 1) Go to [www.garmin.com/Kenwood](http://www.garmin.com/Kenwood).
- 2) Find your model and select [Software Updates] > [Download].
- 3) Read and accept the terms of the Software License Agreement.
- 4) Follow the instructions on the Web site to complete the installation of the software update.

### ● Updating maps

You can purchase updated map data from Garmin or ask your Kenwood dealer or Kenwood service center for details.

- 1) Go to [www.garmin.com/Kenwood](http://www.garmin.com/Kenwood).
- 2) Select [Order Map Updates] for your Kenwood unit.
- 3) Follow the Web site instructions to update your map.

# How To Play Music

You can play audio files from music CD, disc media, USB storage device, SD card and iPod.

- ③ Touch [  ].

#### NOTE

- For detailed operation, see **Using Hands-Free Unit (P.56)** in the Instruction Manual.

# Installation Procedure

## Before Installation

Before installation of this unit, please note the following precautions.

### ⚠️ WARNINGS

- If you connect the ignition wire (red) and the battery wire (yellow) to the car chassis (ground), you may cause a short circuit, that in turn may start a fire. Always connect those wires to the power source running through the fuse box.
- Do not cut out the fuse from the ignition wire (red) and the battery wire (yellow). The power supply must be connected to the wires via the fuse.

### ⚠️ CAUTION

- Install this unit in the console of your vehicle.  
Do not touch the metal part of this unit during and shortly after the use of the unit. Metal part such as the heat sink and enclosure become hot.

### NOTES

- Mounting and wiring this product requires skills and experience. For best safety, leave the mounting and wiring work to professionals.
- Make sure to ground the unit to a negative 12V DC power supply.
- Do not install the unit in a spot exposed to direct sunlight or excessive heat or humidity. Also avoid places with too much dust or the possibility of water splashing.
- Do not use your own screws. Use only the screws provided. If you use the wrong screws, you could damage the unit.
- If the power is not turned ON ("PROTECT" is displayed), the speaker wire may have a short-circuit or touched the chassis of the vehicle and the protection function may have been activated. Therefore, the speaker wire should be checked.
- If your car's ignition does not have an ACC position, connect the ignition wires to a power source that can be turned on and off with the ignition key. If you connect the ignition wire to a power source with a constant voltage supply, such as with battery wires, the battery may be drained.

- If the console has a lid, make sure to install the unit so that the faceplate will not hit the lid when closing and opening.
- If the fuse blows, first make sure the wires aren't touching to cause a short circuit, then replace the old fuse with one with the same rating.
- Insulate unconnected wires with vinyl tape or other similar material. To prevent a short circuit, do not remove the caps on the ends of the unconnected wires or the terminals.
- Connect the speaker wires correctly to the terminals to which they correspond. The unit may be damaged or fail to work if you share the ⊖ wires or ground them to any metal part in the car.
- When only two speakers are being connected to the system, connect the connectors either to both the front output terminals or to both the rear output terminals (do not mix front and rear). For example, if you connect the ⊕ connector of the left speaker to a front output terminal, do not connect the ⊖ connector to a rear output terminal.
- After the unit is installed, check whether the brake lamps, blinkers, wipers, etc. on the car are working properly.
- Mount the unit so that the mounting angle is 30° or less.
- This unit has the cooling fan (**P.28**) to decrease the internal temperature. Do not mount the unit in a place where the cooling fan of the unit are blocked. Blocking these openings will inhibit the cooling of the internal temperature and result in malfunction.
- Do not press hard on the panel surface when installing the unit to the vehicle. Otherwise scars, damage, or failure may result.
- Make sure that all wire connections are securely made by inserting jacks until they lock completely.
- Use a commercially available conversion connector if the connector does not fit in the vehicle connector.
- Reception may drop if there are metal objects near the Bluetooth antenna.

## Installation Procedure

### Supplied accessories

First of all, make sure that all accessories are supplied with the unit.

### Unit

- 1 To prevent a short circuit, remove the key from the ignition and disconnect the  $\ominus$  terminal of the battery.

- 2 Make the proper input and output wire connections for each unit.
- 3 Connect the wire on the wiring harness.
- 4 Take Connector B on the wiring harness and connect it to the speaker connector in your vehicle.
- 5 Take Connector A on the wiring harness and connect it to the external power connector on your vehicle.
- 6 Connect the wiring harness connector to the unit.
- 7 Install the unit in your car.
- 8 Reconnect the  $\ominus$  battery.
- 9 Press the <Reset> button.
- 10 Perform the Initial Setup. See **First Step (P.6)**.

#### NOTE

- Make sure that the unit is installed securely in place. If the unit is unstable, it may malfunction (eg, the sound may skip).

### Escutcheon

Attach accessory ⑥ to the unit.

## Attaching the front panel

Hold the front panel securely so as not to drop it accidentally. Fit the panel onto the attaching plate until it is firmly locked.

### DNX5

## GPS antenna

GPS antenna is installed inside of the car. It should be installed as horizontally as possible to allow easy reception of the GPS satellite signals.

To mount the GPS antenna inside your vehicle:

- 1) Clean your dashboard or other surface.
- 2) Peel the backing off of the adhesive on the bottom of the metal plate (accessory ⑧).
- 3) Press the metal plate (accessory ⑧) down firmly on your dashboard or other mounting surface. You can bend the metal plate (accessory ⑧) to conform to a curved surface, if necessary.
- 4) Place the GPS antenna (accessory ⑦) on top of the metal plate (accessory ⑧).

- Depending on the type of car, reception of the GPS satellite signals might not be possible with an inside installation.
- The GPS antenna should be installed at a position that is spaced at least 12 inch (30 cm) from cellular phone or other transmitting antennas. Signals from the GPS satellite may be interfered with by these types of communication.
- Painting the GPS antenna with (metallic) paint may cause a drop in performance.

## Microphone unit

- 1) Check the installation position of the microphone (accessory ⑨).
- 2) Remove oil and other dirt from the installation surface.
- 3) Install the microphone.
- 4) Wire the microphone cable up to the unit with it secured at several positions using tape or other desired method.

Fix a cable with a commercial item of tape.

Peel the release coated paper of double-face adhesive tape to fix on the place shown above.

Adjust the direction of the microphone to the driver.

### NOTE

- Install the microphone as far as possible from the cell-phone.

## Removing Procedure

### Removing the hard rubber frame (escutcheon)

- 1) Engage the catch pins on the removal tool (accessory ④) and remove the two locks on the lower level.  
Lower the frame and pull it forward as shown in the figure.

### NOTE

- The frame can be removed from the top side in the same manner.

- 2) When the lower level is removed, remove the upper two locations.

## Removing the unit

- 1) Remove the hard rubber frame by referring to **step 1 in "Removing the hard rubber frame" (P.26)**.
- 2) Insert the two removal tools (accessory ④) deeply into the slots on each side, as shown.

- 3) Lower the removal tool toward the bottom, and pull out the unit halfway while pressing towards the inside.

### NOTE

- Be careful to avoid injury from the catch pins on the removal tool.

- 4) Pull the unit all the way out with your hands, being careful not to drop it.

## Connection

### Connecting wires to terminals (1)

#### ▲ WARNING for Connecting the ISO Connector

The pin arrangement for the ISO connectors depends on the type of vehicle you drive. Make sure to make the proper connections to prevent damage to the unit. The default connection for the wiring harness is described in (1) below. If the ISO connector pins are set as described in (2), make the connection as illustrated. Please be sure to reconnect the cable as shown (2) below to install this unit to the **Volkswagen** vehicles etc.

#### (1): Default setting

The red (A-7 pin) of the vehicle's ISO connector is linked with the ignition, and the yellow (A-4 pin) is connected to the constant power supply.

#### (2)

The red (A-7 pin) of the vehicle's ISO connector is connected to the constant power supply, and the yellow (A-4 pin) is linked to the ignition.

### ■ The marking of products using lasers

**CLASS 1  
LASER PRODUCT**

The label is attached to the chassis/case and says that the component uses laser beams that have been classified as Class 1. It means that the unit is utilizing laser beams that are of a weaker class. There is no danger of hazardous radiation outside the unit.

### ■ Information on Disposal of Old Electrical and Electronic Equipment and Batteries (applicable for EU countries that have adopted separate waste collection systems)

Products and batteries with the symbol (crossed-out wheeled bin) cannot be disposed as household waste. Old electrical and electronic equipment and batteries should be recycled at a facility capable of handling these items and their waste byproducts.

Contact your local authority for details in locating a recycle facility nearest to you.

Proper recycling and waste disposal will help conserve resources whilst preventing detrimental effects on our health and the environment.

Notice: The sign “Pb” below the symbol for batteries indicates that this battery contains lead.

This Product is not installed by the manufacturer of a vehicle on the production line, nor by the professional importer of a vehicle into an EU Member State.
