

# KCA-HX5M

MOTORCYCLE BLUETOOTH COMMUNICATION SYSTEM  
WITH MESH INTERCOM

## INSTRUCTION MANUAL

JVCKENWOOD Corporation

• Updated information (the latest Instruction Manual, system updates, new functions, etc.) is available from  
<<https://www.kenwood.com/cs/ce/>>.

**Take the time to read through this instruction manual.  
Familiarity with installation and operation procedures will help you  
obtain the best performance from your new Communication System.**

### For your records

Record the serial number, found on the back of the unit, in the spaces designated on the warranty card, and in the space provided below. Refer to the model and serial numbers whenever you call upon your KENWOOD dealer for information or service on the product.

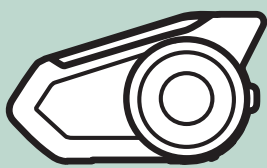

Model KCA-HX5M    Serial number \_\_\_\_\_

### US Residence Only

• Boom Microphone Holder	
• Hook and Loop Fastener for Holder	
• Rubber Pads	
• Allen Wrench	
• Speaker Port Cover	
• USB Power & Data Cable (Micro USB Type)	

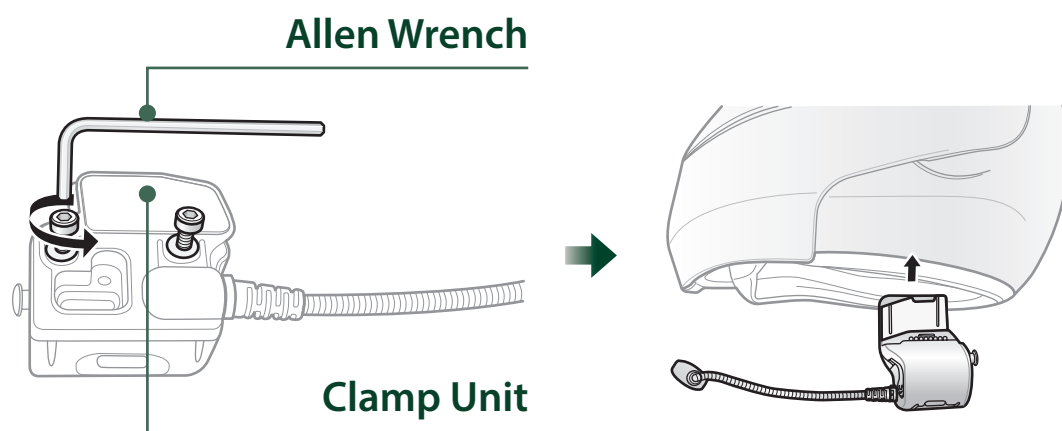

## 2. INSTALLING THE HEADSET ON YOUR HELMET

### 2.1 Helmet Installation

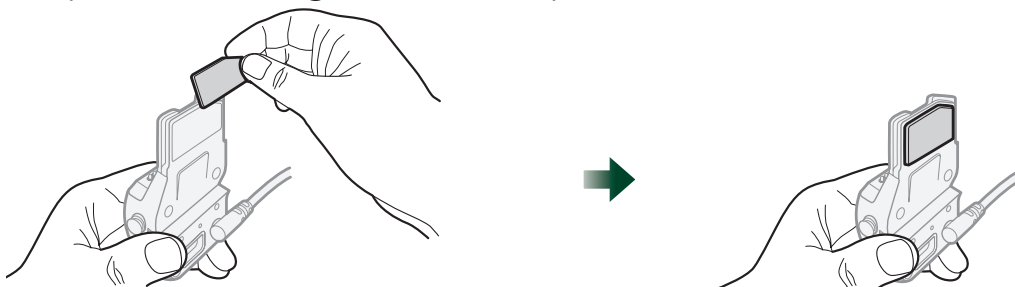

To securely install the headset on the helmet, please follow this procedure.

1. Insert the back plate of the clamp unit between the internal padding and the external shell of the helmet, and tighten the two screws.

#### NOTE

- Depending on the size and shape of your helmet, you may need to change the thickness of the rubber pad between the clamp plates using the two extra rubber pads in the box. To increase the overall thickness, attach the thinner one to the original rubber pad or replace the original rubber pad with the thicker one.

**Helmet  
Installation**

**Using the  
Glued Surface  
Mounting  
Adapter**

**Switching the  
Microphone**

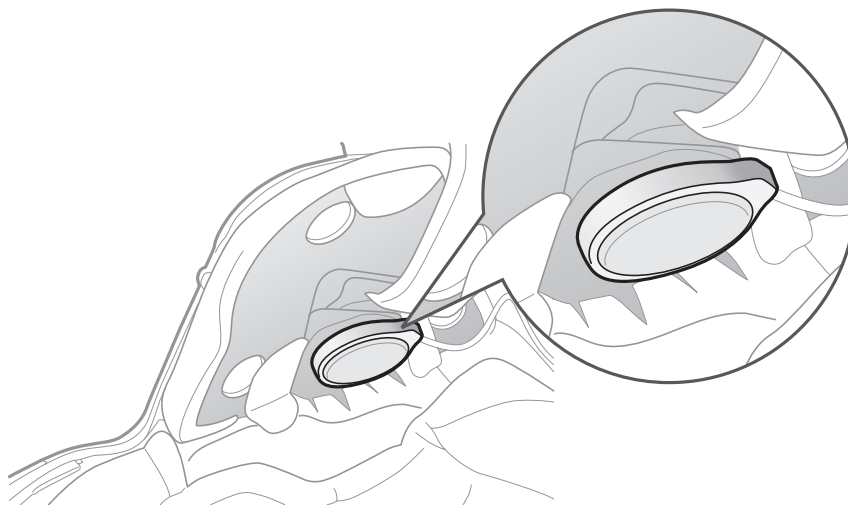

**Earbuds**

**External Mesh  
Intercom  
Antenna**

## 2. INSTALLING THE HEADSET ON YOUR HELMET

2. Place the helmet speakers along with the hook and loop fasteners, centered to your ear, in the ear pockets of the helmet. If the helmet has deep ear pockets, you can use the speaker pads to place the speakers closer to your ears.

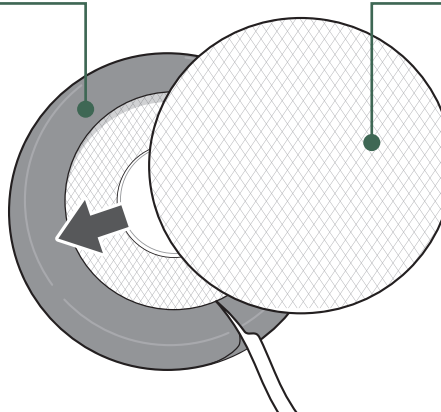

### NOTE

- The speaker with the shorter wire is for the left ear and the speaker with the longer one is for the right ear.
- To enhance the audio quality, you can make use of the foam speaker covers. Cover each speaker with the foam and attach the hook fastener at the back of the speaker. Then place the speakers in the helmet as described above. Foam covered speakers work most effectively when they are slightly touching your ears.

#### Foam Speaker Cover

#### Hook Fastener

## 2. INSTALLING THE HEADSET ON YOUR HELMET

### Helmet Installation

### Using the Glued Surface Mounting Adapter

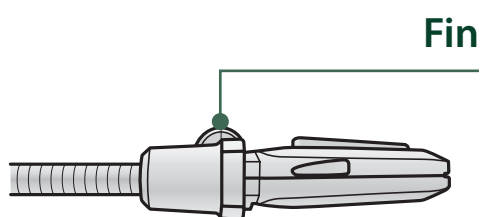

### Switching the Microphone

### Earbuds

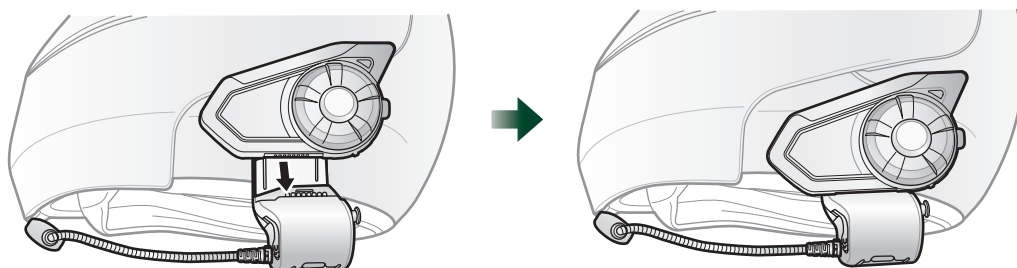

### External Mesh Intercom Antenna

#### NOTE

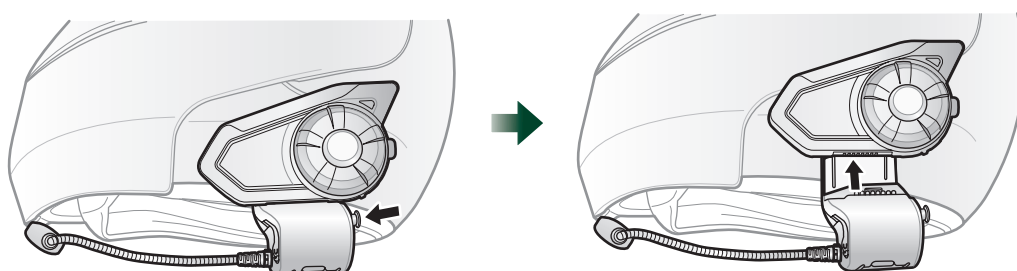

- Make sure that the microphone is located properly close to your mouth when you wear the helmet. Adjust the direction of the microphone so that the fin side of the microphone is facing outward, away from your lips.

- Attach the headset main unit to the clamp unit. Slide the main unit down onto the clamp unit until it clicks firmly into the bottom portion of the clamp unit.

To remove the main unit from the clamp unit, press the Quick Release Button to slide it off the clamp unit.

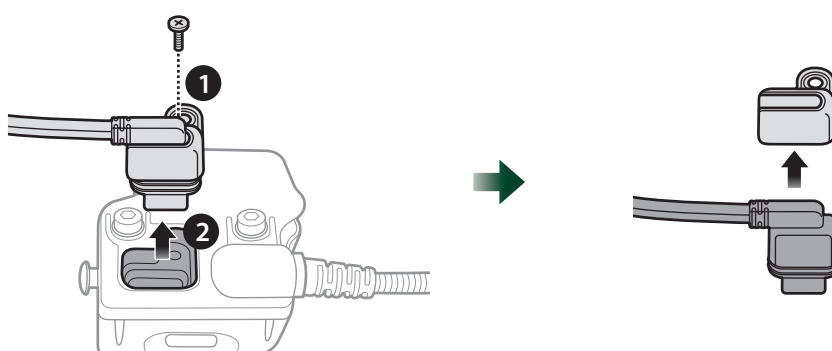

## 2. INSTALLING THE HEADSET ON YOUR HELMET

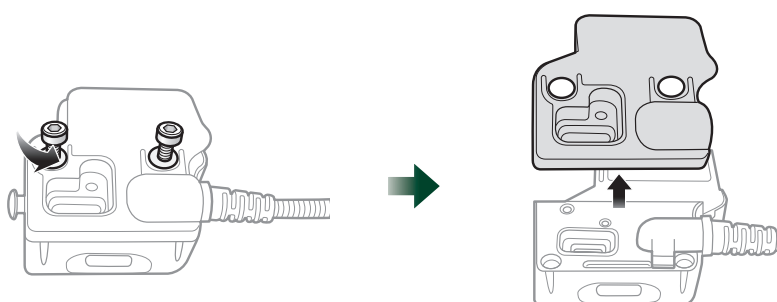

### 2.2 Using the Glued Surface Mounting Adapter

If you have any problem equipping the clamp unit on the helmet for any reason, you may use the glued surface mounting adapter to attach the clamp unit on the external surface of the helmet.

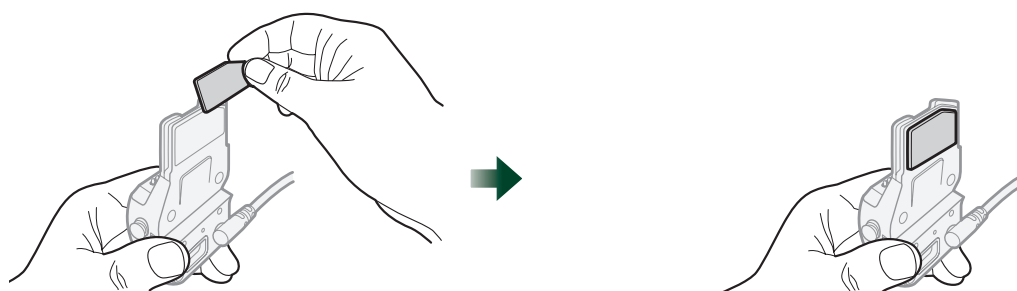

1. Remove the speaker unit.

2. Remove the back plate.

3. Remove the rubber pad and replace it with the thicker rubber pad included in the package.

4. Hook on the adapter to the clamp unit then screw in the glued external adapter to the clamp unit.

**Helmet  
Installation**

**Using the  
Glued Surface  
Mounting  
Adapter**

**Switching the  
Microphone**

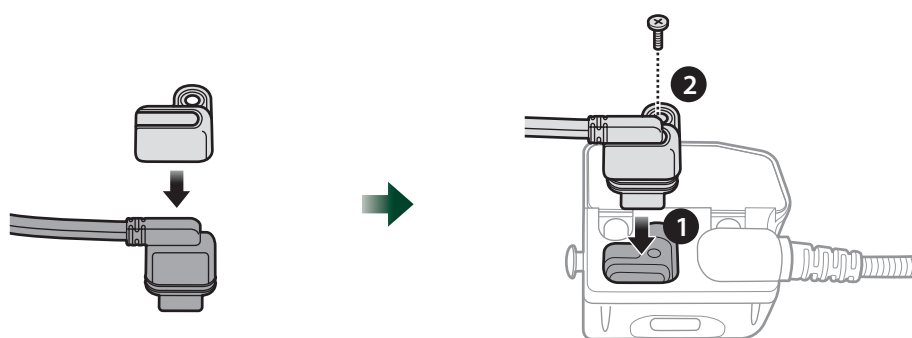

**Earbuds**

**External Mesh  
Intercom  
Antenna**

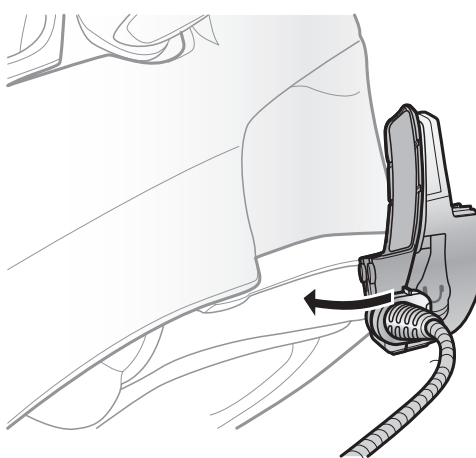

## 2. INSTALLING THE HEADSET ON YOUR HELMET

5. Reconnect the speaker cable to the speaker port.

6. Locate a proper surface on the helmet to attach the unit then clean the helmet surface location with a moistened towel and allow to dry thoroughly.

7. Peel off the cover of the adhesive tape of the adapter and attach the unit on the proper surface of your helmet.

### ⚠ Caution

- KENWOOD recommends using the clamp unit. The glued surface mounting adapter is provided for convenience, but is not the recommended mounting method. KENWOOD is not responsible for its use.

**Helmet  
Installation**

**Using the  
Glued Surface  
Mounting  
Adapter**

**Switching the  
Microphone**

**Earbuds**

**External Mesh  
Intercom  
Antenna**

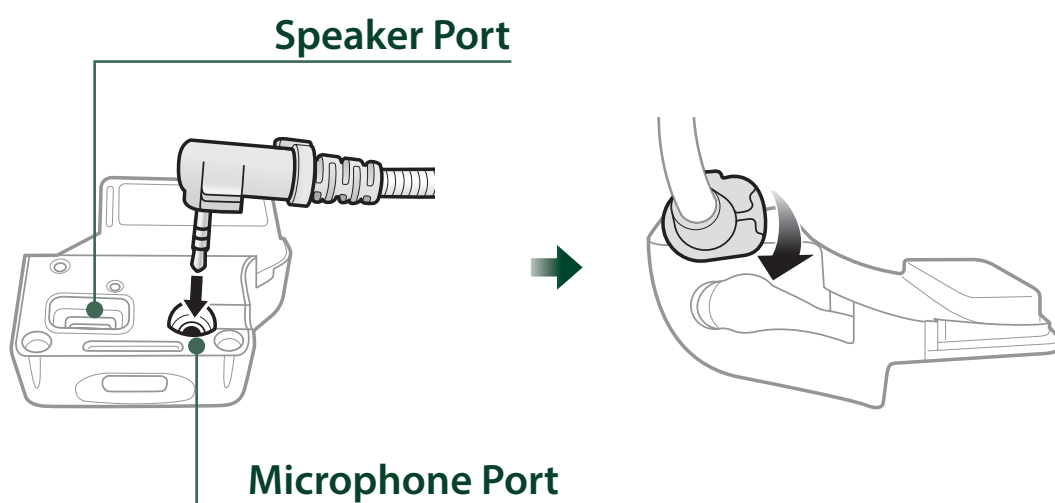

## 2. INSTALLING THE HEADSET ON YOUR HELMET

### 2.3 Switching the Microphone

If you want to use a different microphone instead of the static boom microphone, please refer to the following steps.

1. Remove the back plate of the clamp unit.
2. Connect the microphone according to your helmet type.
3. Lock the microphone to the clamp.
4. Reattach the back plate to cover the microphone and the speaker port.

**Helmet  
Installation**

**Using the  
Glued Surface  
Mounting  
Adapter**

**Switching the  
Microphone**

**Earbuds**

**External Mesh  
Intercom  
Antenna**

## 2. INSTALLING THE HEADSET ON YOUR HELMET

### Helmet Installation

### Using the Glued Surface Mounting Adapter

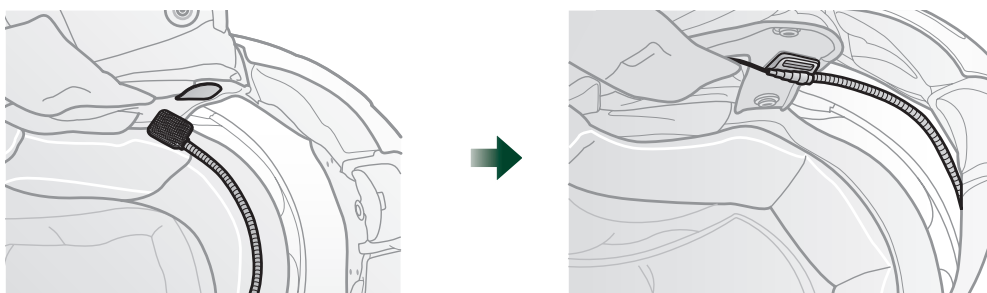

### Switching the Microphone

### Earbuds

### External Mesh Intercom Antenna

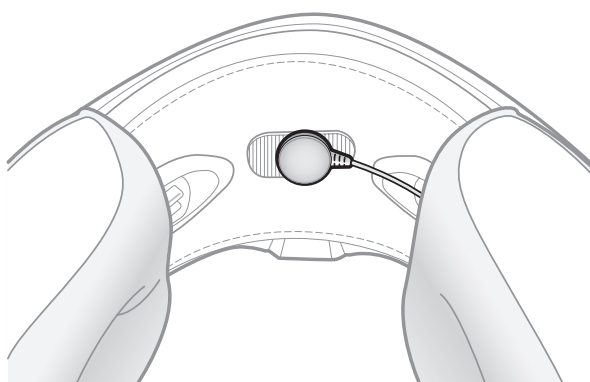

### 2.3.1 Wired Boom Microphone

When installing the included wired boom microphone, place the hook and loop fastener at the end of the boom microphone between the internal helmet cheek pad and the internal wall of the helmet shell. The boom microphone should be mounted so it is facing close to your mouth when you wear the helmet.

### 2.3.2 Wired Microphone

In case of the wired microphone, attach the enclosed hook and loop fastener for the wired microphone to the inside of the chin guard for full-face helmets. Place the wired microphone on the hook and loop fastener and connect it to the connector of the clamp unit.

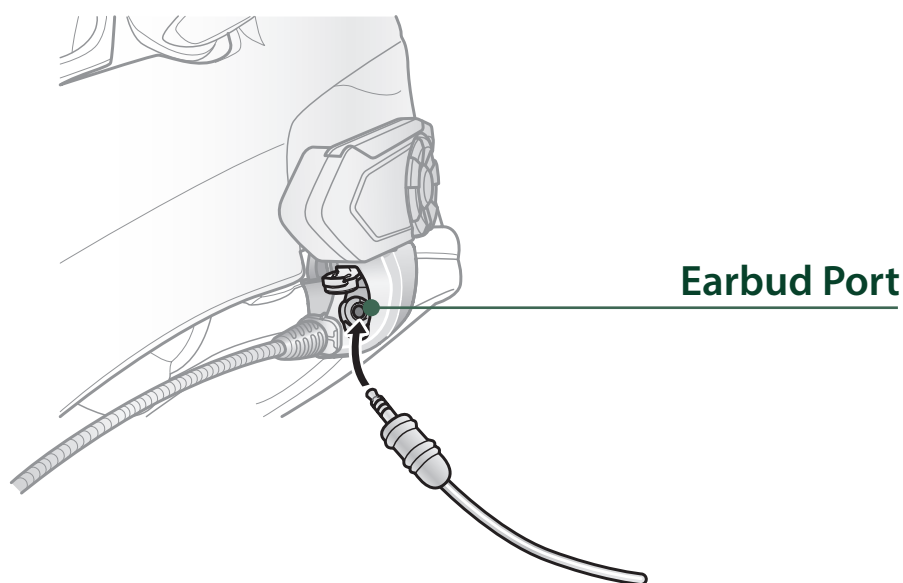

## 2. INSTALLING THE HEADSET ON YOUR HELMET

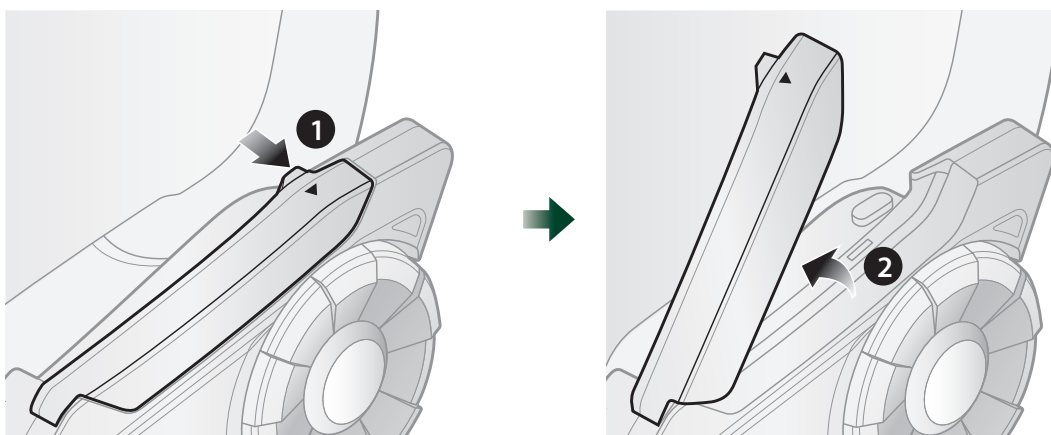

### 2.4 Earbuds

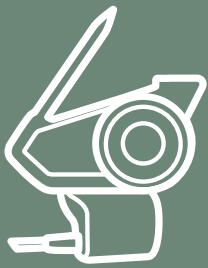

You can connect your earbuds to the clamp while having the speakers connected to the clamp. The sound of the earbuds will be active while the sound of the outer speakers becomes inactive.

### 2.5 External Mesh Intercom Antenna

Pull the **Mesh Intercom** Antenna outwards slightly to unfold it.

## 3.2 Downloadable Software

### 3.2.1 MESH Utility for KENWOOD

By simply pairing your phone with your headset, you can use the **MESH Utility for KENWOOD** for quicker and easier set up and management.

- App Features
  - Mesh Intercom, Bluetooth Intercom, Music, FM Radio, Device settings, Quick Start Guide, and User’s Guide.
- Download
  - Android: Google Play Store > ‘**MESH Utility for KENWOOD**’
  - iOS: App Store > ‘**MESH Utility for KENWOOD**’

#### NOTE

- Pairing with three or more Intercoms will disconnect the **MESH Utility for KENWOOD**. When connecting with **MESH Utility for KENWOOD**, finish pairing with the third or later Intercom.

### 3.2.2 Intercom Device Manager for KENWOOD

The **Intercom Device Manager for KENWOOD** allows you to upgrade the firmware and configure its settings directly from your PC or Apple computer. Download the **Intercom Device Manager for KENWOOD** from [www.kenwood.com/cs/ce/](http://www.kenwood.com/cs/ce/).

### 3.3 Powering On and Off

Press and hold the **Jog Dial** and **Phone Button** at the same time to turn the headset on or off.

#### Powering On

#### Powering Off

#### NOTE

- If the Voice Command setting is disabled, the “Hello” voice prompt will be heard instantly after powering on the headset. Please refer to **Section 12: “Voice Command”** for more details.

# 3. GETTING STARTED

## 3.4 Charging

### Charging the Headset

DC Power Charging & Firmware Upgrade Port

The headset will be fully charged in about 1.5 hours. (The charging time may vary depending on the charging method.)

**NOTE**

- The headset includes a **Fast Charging** feature which allows it to charge quickly over a short period of time. For example, a user can get 5 hours of talk time after charging the headset for 20 minutes.
- Any 3rd party USB charger can be used with KENWOOD products if the charger is approved by either the FCC, CE, IC or other locally approved agencies that KENWOOD accepts.
- The headset is compatible with 5 V input USB-charged devices only.

## 4. PAIRING THE HEADSET WITH OTHER BLUETOOTH DEVICES

### Mobile Phone

### Additional Mobile Phones or MP3 Player

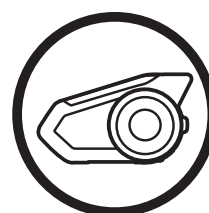

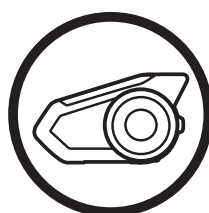

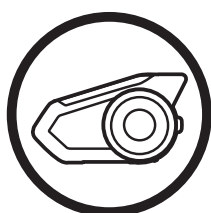

### Advanced Selective Pairing: Hands-Free or A2DP Stereo

### GPS Pairing

When using the headset with other Bluetooth devices for the first time, they'll need to be "paired". This enables them to recognize and communicate with one another whenever they're within range.

The headset can pair with multiple Bluetooth devices such as a mobile phone, GPS or MP3 player via **Mobile Phone Pairing, Second Mobile Phone Pairing and GPS Pairing**. The headset can also be paired with up to three other KENWOOD headsets.

### Pairs with up to three KENWOOD Headsets

### Also pairs with:

**Mobile Phone**

**MP3 Player**

**GPS Devices**

### NOTE

- Bluetooth Specifications: Bluetooth 2.4 GHz ~ 2.48 GHz / max output power 0.097 mW

# 4. PAIRING THE HEADSET WITH OTHER BLUETOOTH DEVICES

## 4.1 Mobile Phone

There are two ways to pair the phone.

### 4.1.1 Pairing When the KCA-HX5M is Turned Off

- 1. Press and hold the **Phone Button** and **Jog Dial** for **10 seconds** when the **KCA-HX5M** is turned off.

### Mobile Phone Pairing

Status LED	Indication
	 Alternating blue and red flashing lights indicate <b>device is now discoverable</b> .

- 2. With your mobile phone in Bluetooth-pairing mode, select the headset in the list of devices detected.
- 3. If your mobile phone asks for a PIN, enter 0000.

Smart Volume Control

# 6. STEREO MUSIC

To adjust the volume, rotate the **Jog Dial** clockwise or counterclockwise. You can also adjust the volume directly on the connected device.

## Volume Up

## Volume Down

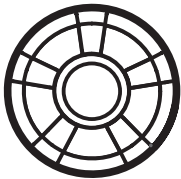

## 6.3 Music Sharing

You can start sharing music with one intercom friend using Bluetooth stereo music during a two-way intercom conversation and one participant of a Mesh. Both you and your intercom friend can remotely control music playback such as track forward and track back. If you start sharing music while Bluetooth intercom and Mesh Intercom are running at the same time, then music shared during Bluetooth intercom will take priority over music shared during Mesh Intercom. The Creator will send a request message to a headset connected during Mesh Intercom and will share music with the first participant that accepts the request.

## 6. STEREO MUSIC

### 6.4 Audio Boost (Default: Enable)

An **Audio Boost** setting can be found in the settings menu, accessible through **Intercom Device Manager for KENWOOD** or **MESH Utility for KENWOOD**.

Enabling **Audio Boost** increases the maximum volume limit. Disabling **Audio Boost** reduces the maximum volume limit while delivering more balanced sound.

### 6.5 Smart Volume Control (Default: Disable)

A **Smart Volume Control** setting can be found in the settings menu, accessible through **Intercom Device Manager for KENWOOD** or **MESH Utility for KENWOOD**.

Enabling **Smart Volume Control** automatically changes the level of the speaker volume based on the level of the environment noise. You can enable it by setting the sensitivity to low, medium or high.

## 7. MESH INTERCOM

### 7.1 What is Mesh Intercom?

Toggling Open Mesh/Group Mesh

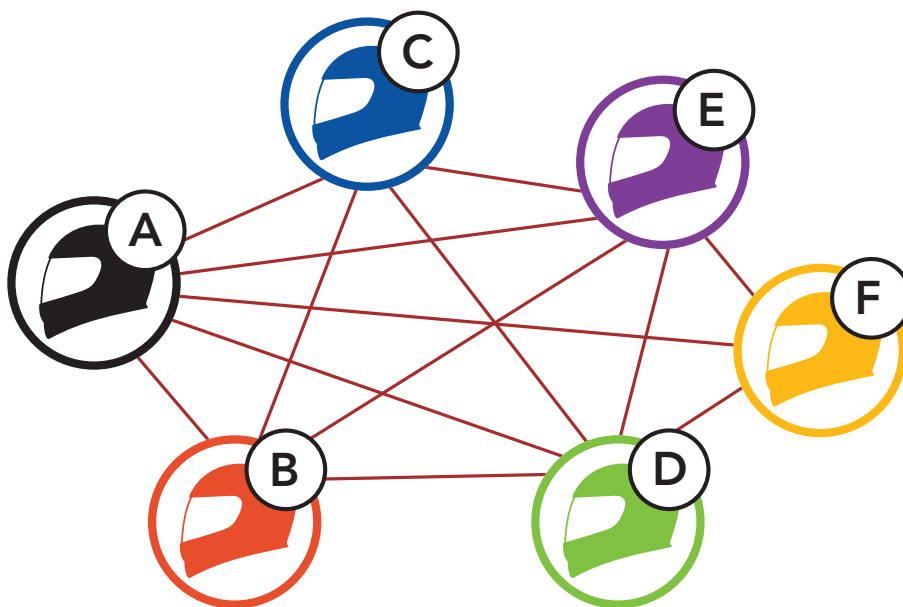

Enable/Disable Mic

**Mesh Intercom™** a dynamic communication system created by Sena that provides instant and effortless bike-to-bike communication without a pre-grouping process. **Mesh Intercom** allows riders to connect and communicate with nearby users without the need to pair each headset together.

The working distance between each **KCA-HX5M\*** in **Mesh Intercom** can be up to 2 km (1.2 miles) in open terrain. In open terrain, the **Mesh** can be extended up to 8 km (5 miles) between a minimum of six users. Within the same channel in **Open Mesh™** or the same private group in **Group Mesh™**, six users can talk at the same time and enjoy the optimal quality for their conversation.

\* Compatible with Sena Mesh model Open Mesh and Group Mesh (e.g. 30K)

#### Mesh Intercom

#### NOTE

- **Open Mesh** and **Group Mesh** cannot communicate with the **Public Mode** and **Private Mode** of the previous modes of the Sena Mesh model. In case of no communication, **the Sena headset should be upgraded to the latest firmware.**

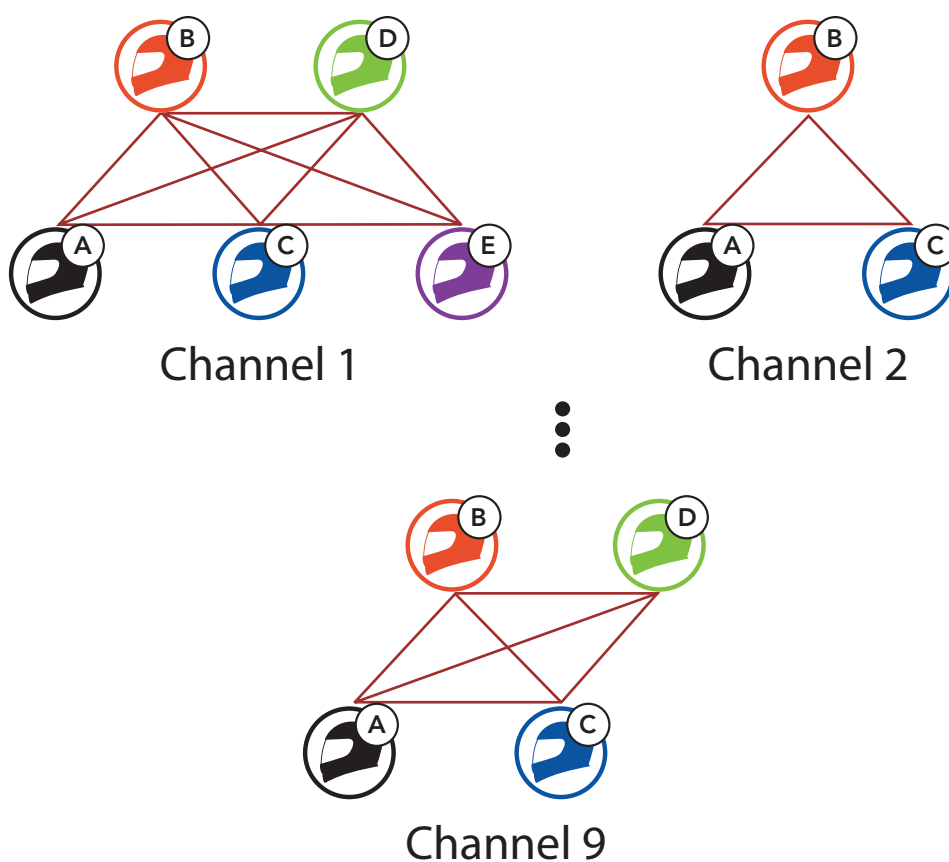

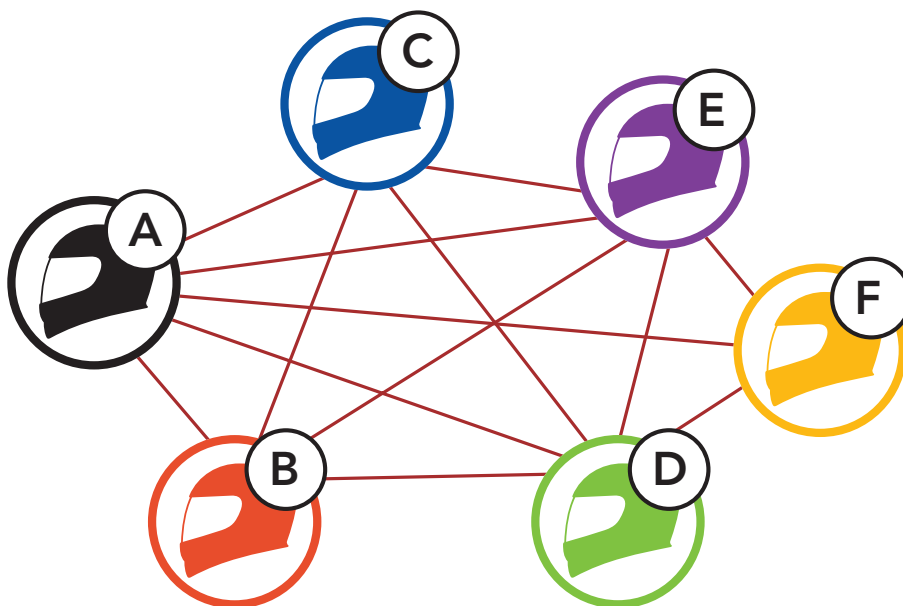

## 7. MESH INTERCOM

### 7.1.1 Open Mesh

**Open Mesh** is an open group intercom function. Users can freely communicate with each other in the same **Open Mesh** channel and select which channel (1-9) to use through the headset.

It can connect with a virtually unlimited number of users in each channel.

**What is Mesh Intercom?**

**Starting Mesh Intercom**

**What is Mesh Intercom?**

**Starting Mesh Intercom**

**Using the Mesh in Open Mesh**

**Using Mesh in Group Mesh**

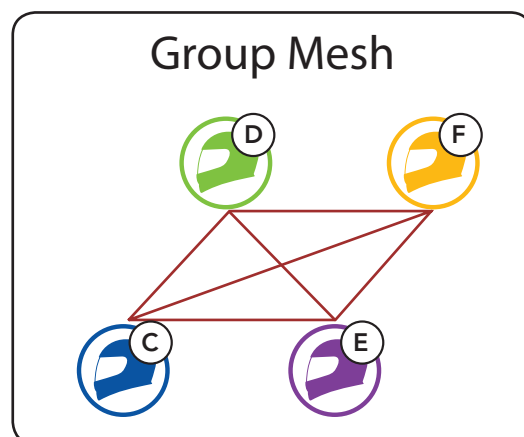

**Reset Mesh**

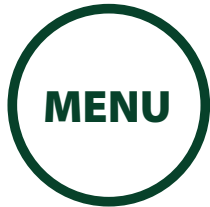

**Toggling Open Mesh/Group Mesh**

**Enable/Disable Mic**

**Group Mesh** is a closed group intercom function that allows users to join, leave, or rejoin a group intercom conversation without pairing each headset. Users can freely communicate with each other in the same private group in **Group Mesh**.

For closed intercom conversations using **Mesh Intercom**, a **Group Mesh** needs to be created by the users. When users create a private group in **Group Mesh** by **Mesh Grouping**, the headset automatically switches from **Open Mesh** to **Group Mesh**. Up to 24 users can all be connected in each private group.

# 7. MESH INTERCOM

## 7.2 Starting Mesh Intercom

When **Mesh Intercom** is enabled, the **KCA-HX5M\*** will automatically connect to nearby **KCA-HX5M\*** users and allow them to talk to each other by pressing the **Mesh Intercom Button**.

\* Compatible with Sena Mesh model Open Mesh and Group Mesh (e.g. 30K)

### 8.6 Mesh Intercom Conference with Bluetooth Intercom Participant

Users can use the existing Bluetooth intercom and **Mesh Intercom** function at the same time. In this case, it is recommended to communicate with other KENWOOD/Sena headsets via Bluetooth intercom connection and use **Mesh Intercom** between KCA-HX5M headsets. A user who is in **Open Mesh** or **Group Mesh** when using **Mesh Intercom** is able to include up to 3 of their Bluetooth intercom friends. You can start a Two-Way Intercom conversation with one of your three Intercom Friends to include them in the Mesh. Please refer to **Section 8.2: “Two-Way Intercom”** for more details. Or, you can use “Group Intercom” to include all of your Bluetooth intercom friends in the Mesh. Please refer to **Section 8.5: “Group Intercom”** for more details.

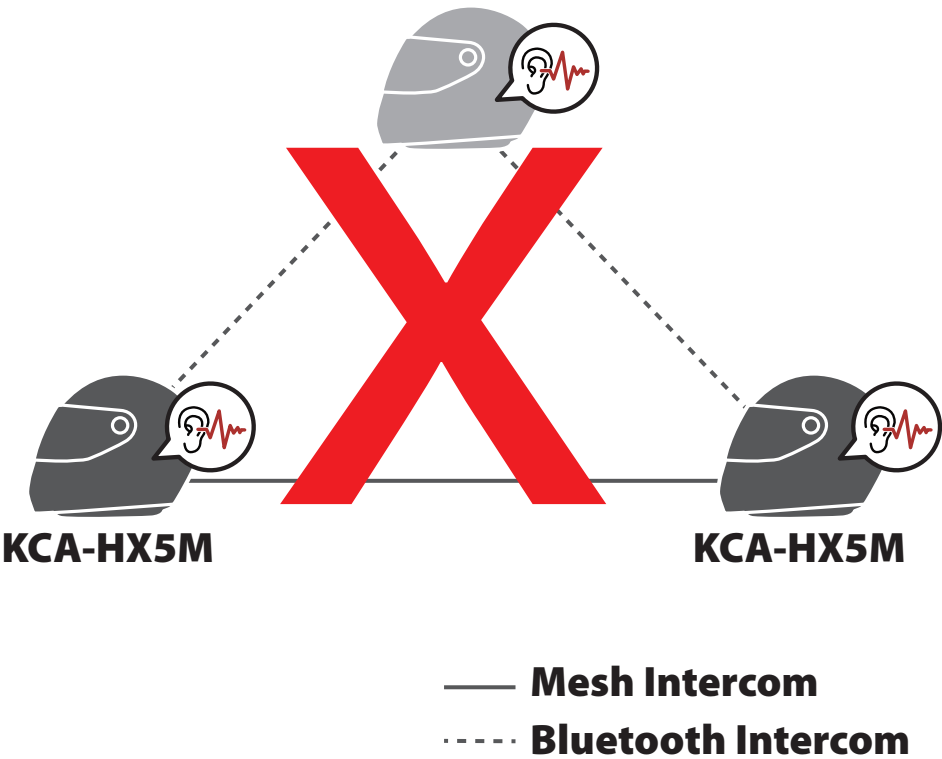

# 8. BLUETOOTH INTERCOM SETUP

NOTE

- The audio quality will be reduced if a **KCA-HX5M** connects to 2 or more Bluetooth intercom friends while in **Open Mesh** or **Group Mesh** when using **Mesh Intercom**.
- If a closed loop is created, as shown below, each user will experience severe noise issues. KENWOOD/Sena recommends that a closed loop not be created.

### 8.7 Universal Intercom

**Universal Intercom** allows you to have intercom conversations with users of non-KENWOOD/Sena Bluetooth headsets. You can pair your headset with only one non-KENWOOD/Sena headset at a time. The intercom distance depends on the performance of the Bluetooth headset to which it's connected. When a non-KENWOOD/Sena Bluetooth headset is paired with the KENWOOD/Sena headset, if another Bluetooth device is paired via **Second Mobile Phone Pairing**, it will be disconnected.

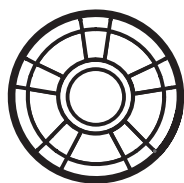

## 8. BLUETOOTH INTERCOM SETUP

1. Execute **Universal Intercom** in the **Headset Configuration Menu**.

### Access Universal Intercom in the Configuration Menu

Access config. Menu

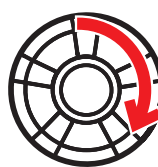

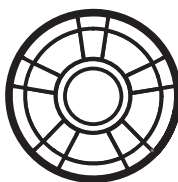

HOLD

## 8. BLUETOOTH INTERCOM SETUP

### 8.8 VOX Intercom (Default: Disable)

The **VOX Intercom** setting can be found in the settings menu, accessible through **Intercom Device Manager for KENWOOD** or **MESH Utility for KENWOOD**.

If **VOX Intercom** is enabled, you can initiate an intercom conversation with the last connected intercom friend by voice. When you want to start intercom, say a word such as **“Hello”** loudly or blow air into the microphone. If you start an intercom conversation by voice, the intercom terminates automatically when you and your intercom friend remain silent for 20 seconds. However, if you manually start an intercom conversation by tapping the **Jog Dial**, you have to terminate the intercom conversation manually.

However, if you start the intercom by voice and end it manually by tapping the **Jog Dial**, you will not be able to start intercom by voice temporarily. In this case, you have to tap the **Jog Dial** to restart the intercom. This is to prevent repeated unintentional intercom connections by strong wind noise. After rebooting the headset, you can start the intercom by voice again.

## 8. BLUETOOTH INTERCOM SETUP

### 8.9 Intercom VOX Sensitivity (Default: 3)

The **Intercom VOX Sensitivity** setting can be found in the settings menu, accessible through **Intercom Device Manager for KENWOOD** or **MESH Utility for KENWOOD**.

The sensitivity can be adjusted depending on your riding environment. Level 5 is the highest sensitivity setting and 1 is the lowest.

### 8.10 HD Intercom (Default: Enable)

The **HD Intercom** setting can be found in the settings menu, accessible through **Intercom Device Manager for KENWOOD** or **MESH Utility for KENWOOD**.

**HD Intercom** enhances the two-way intercom audio from normal quality to HD quality. **HD Intercom** will become temporarily disabled when you enter into a multi-way intercom. If this feature is disabled, the two-way intercom audio will change to normal quality.

**NOTE**

- The intercom distance of HD Intercom is relatively shorter than that of normal intercom.

### 8.11 Advanced Noise Control™ (Default: Enable)

The **Advanced Noise Control** setting can be found in the settings menu, accessible through **Intercom Device Manager for KENWOOD** or **MESH Utility for KENWOOD**.

If **Advanced Noise Control** is enabled, background noise is reduced during intercom conversations.

If **Advanced Noise Control** is disabled, the background noise is mixed with your voice while using the intercom.

## 9. AUDIO MULTITASKING

Audio Multitasking allows you to have an intercom conversation while simultaneously listening to music, FM radio, or GPS instructions. The overlaid audio is played in the background with reduced volume whenever there is an intercom conversation and will return to normal volume once the conversation is finished. The Audio Multitasking feature can be configured through the **Intercom-Audio Overlay Sensitivity** and the **Audio Overlay Volume Management** settings.

### 9.1 Audio Multitasking Settings

The Mesh Intercom Audio Multitasking feature is always on. The **Bluetooth Intercom Audio Multitasking (Default: Disabled)** setting can be found in the settings menu, accessible through the **Intercom Device Manager for KENWOOD** or the **MESH Utility for KENWOOD**.

#### NOTE

1. **Bluetooth Intercom Audio Multitasking** will be activated during two-way intercom conversations with a headset that also supports this feature.
2. HD Intercom will become disabled temporarily when **Bluetooth Intercom Audio Multitasking** is enabled.
3. For **Bluetooth Intercom Audio Multitasking** to work properly, you need to power the headset off and on. Please restart the headset.
4. Some GPS devices may not support this feature.

Audio Overlay  
Volume  
Management

## 9. AUDIO MULTITASKING

### 9.2 Intercom-Audio Overlay Sensitivity (Default: 3)

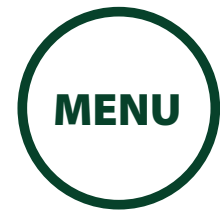

The **Intercom-Audio Overlay Sensitivity** setting can be found in the settings menu, accessible through **Intercom Device Manager for KENWOOD** or **MESH Utility for KENWOOD**. The music, FM radio and GPS volume will be lowered to play in the background if you talk over the intercom while the overlaid audio is playing. You can adjust the intercom sensitivity to activate this background audio mode. Level 1 has the lowest sensitivity and level 5 has the highest sensitivity.

**NOTE**

- If your voice is not louder than the sensitivity of the selected level, the overlaid audio will not be lowered.

### 9.3 Audio Overlay Volume Management (Default: Disable)

The **Audio Overlay Volume Management** setting can be found in the settings menu, accessible through **Intercom Device Manager for KENWOOD** or **MESH Utility for KENWOOD**. The music, FM radio and GPS overlaid audio reduces in volume whenever there is an ongoing intercom conversation. If **Audio Overlay Volume Management** is enabled, the volume level of the overlaid audio will not be reduced during intercom conversation.

# 10. USING THE FM RADIO

## 10.1 FM Radio On/Off

To turn on or shut off the FM radio, press the **Phone Button** for **1 second** until you hear a double beep.

## 10.2 Seek and Save Radio Stations

The **“Seek”** feature searches for radio stations.

- 1. Rotate while pressing the **Jog Dial** clockwise or counterclockwise to search for radio stations.

### Seek Stations Forward

### Seek Stations Backward

- 2. To save the current station, press and hold the **Jog Dial** for **1 seconds** until you hear the voice prompt, **“Preset (#)”**.

### Enter Preset Selection Mode

## 10.3 Scan and Save Radio Stations

The **“Scan”** function automatically searches for radio stations, starting with the current station’s frequency, then up from there.

- 1. Double tap the **Phone Button** to scan for stations.

### Scan and Save Radio Stations (START SCANNING)

- 2. The tuner pauses at each station it finds for **8 seconds** before moving to the next.
- 3. To save the current station, tap the **Phone Button**. The station will be saved as the next preset number.

### Save the Current Station

- 4. To stop scanning, double tap the **Phone Button**.

## 10.4 Temporary Station Preset

The **Temporary Preset** feature automatically finds and saves the nearest 10 radio stations without changing your existing preset stations.

- 1. Tap the **Phone Button** three times to automatically find and save 10 stations.

### Temporary Stations

- 2. The temporary preset stations will be cleared when the headset reboots.

## 10.5 Navigating Preset Stations

Using the methods above, up to 10 radio stations can be stored. Tap the **Phone Button** to navigate through the saved stations.

### Navigate through Preset Stations

#### NOTE

- You can use the **Intercom Device Manager for KENWOOD** or the **MESH Utility for KENWOOD** to save the preset stations.

## 10.6 Region Selection

You can select the proper FM frequency range for your location from the **Intercom Device Manager for KENWOOD** or the **MESH Utility for KENWOOD**. Using the region setting, you can optimize the seek function to avoid unnecessary frequency ranges.

Region	Frequency range	Step
Worldwide	76.0 – 108.0 MHz	± 100 kHz
North America, South America and Australia	87.5 – 107.9 MHz	± 200 kHz
Asia and Europe	87.5 – 108.0 MHz	± 100 kHz
Japan	76.0 – 95.0 MHz	± 100 kHz

Guide

## 10. USING THE FM RADIO

### 10.7 Radio Data System (RDS) Alternative Frequency (AF) Setting (Default: Disable)

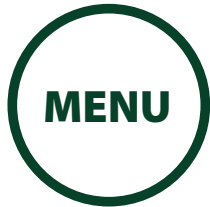

The **RDS AF** setting can be found in the settings menu, accessible through **Intercom Device Manager for KENWOOD** or **MESH Utility for KENWOOD**.

When radio station signals get too weak for a good reception, with **RDS AF** enabled, the radio receiver re-tunes to a station with better reception. If **RDS AF** is disabled, you'll have to find stronger stations manually.

### 10.8 FM Station Guide (Default: Enable)

The **Station Guide** setting can be found in the settings menu, accessible through **Intercom Device Manager for KENWOOD** or **MESH Utility for KENWOOD**.

When **FM Station Guide** is enabled, FM station frequencies are given by voice prompts as you select preset stations. When **FM Station Guide** is disabled, the voice prompts on FM station frequencies will not be given as you select preset stations.

# 11. AMBIENT MODE

You can hear the ambient sound outside of your helmet by activating the **Ambient Mode**. To activate the **Ambient Mode**, press the **Ambient Mode Button** twice which is placed on the bottom of the clamp unit. To deactivate the **Ambient Mode**, press the **Ambient Mode Button** twice again.

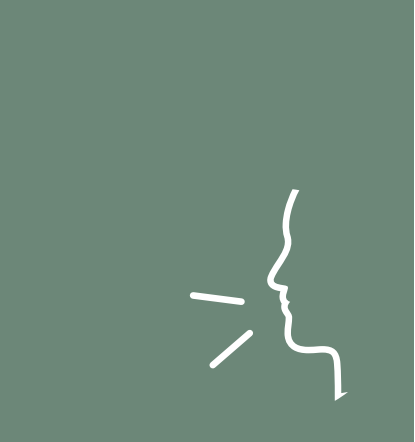

## Ambient Mode

START/STOP

### NOTE

- The **Ambient Mode** has higher priority than mobile phone, so you cannot listen to music, or have an intercom conversation if the **Ambient Mode** is activated.

Voice  
Command  
Setting

## 12. VOICE COMMAND

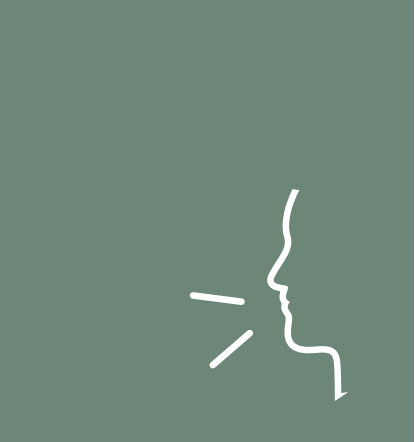

The voice command of the headset allows you to operate certain operations by simply using your voice. You can control the headset completely handsfree using the voice recognition. The voice command function works only with English commands.

### Start Voice Command

Speak a voice command from the table below:

Mode Status	Function	Voice Command
Standby / Intercom	Start/End each Intercom	“Intercom [one]/ [two]/ [three]”
	End all intercoms	“End intercom”
	Call last intercom	“Last intercom”
	Group intercom	“Group intercom”
	Intercom pairing	“Pairing intercom”
	Cancelling operations	“Cancel”

# 12. VOICE COMMAND

## Voice Command Setting

Mode Status	Function	Voice Command
Standby / Music / FM Radio	Play/Pause music	“Music” or “Stereo”
	Turn on/off FM radio	“FM radio”
	Check battery	“Check battery”
	Speed dialing	“Speed dial [one]/ [two]/ [three]”
	Redial the last call	“Redial”
	Check connected devices	“Connected devices”
	Configuration menus	“Configuration”
Music / FM Radio	Next track (music) / next preset (FM radio)	“Next”
	Previous track (music) / previous preset (FM radio)	“Previous”
	Stop music / FM radio	“Stop”
Standby / Mesh Intercom	Mesh intercom On/Off	“Mesh intercom”
	End the Bluetooth and Mesh intercom	“End intercom”

## Voice Command Setting

### NOTE

- Voice command performance may vary based on the environmental conditions including riding speed, helmet type and ambient noise. To improve the performance, minimize wind noise on the microphone by using a large microphone sponge and closing the visor.
- To activate the voice command during intercom conversation, tap the **Ambient Mode Button** once.

## 12.1 Voice Command Setting (Default: Enable)

A **Voice Command** setting can be found in the settings menu, accessible through **Intercom Device Manager for KENWOOD** or **MESH Utility for KENWOOD**.

When **Voice Command** is enabled, you can use your voice to give a command the headset operate certain operations completely handsfree. If **Voice Command** is disabled, you will need to operate all of the functions using the buttons on the headset.

# 13. GENERAL SETTINGS

## 13.1 Function Priority

The headset prioritizes connected devices in the following order:

- (highest)

Ambient Mode
- Mobile phone
- Voice command mode
- Mesh Intercom / Bluetooth Intercom
- Music sharing via Bluetooth stereo
- FM radio
- Stereo music by audio cable
- (lowest)

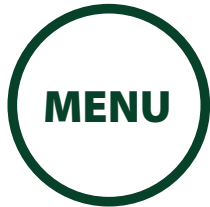

Bluetooth stereo music

A lower-priority function gets interrupted by a higher-priority function. For example, stereo music will be interrupted by an **Intercom Conversation**; an **Intercom Conversation** will be interrupted by an incoming mobile phone call.

## 13.2 Firmware Upgrades

The headset supports firmware upgrades. You can upgrade the firmware using the **Intercom Device Manager for KENWOOD**. Please visit [www.kenwood.com/cs/ce/](http://www.kenwood.com/cs/ce/) to check for the latest software downloads.

**Click Here to Visit**  
**[www.kenwood.com/cs/ce/](http://www.kenwood.com/cs/ce/)**

- Function Priority
- Firmware Upgrades
- Voice Prompts
- Sidetone
- Delete All Bluetooth Pairing Information
- Pairing with the Remote Control

## 13. GENERAL SETTINGS

### 13.3 Voice Prompts (Default: Enable)

A **Voice prompt** setting can be found in the settings menu, accessible through **Intercom Device Manager for KENWOOD** or **MESH Utility for KENWOOD**.

If **Voice prompt** is enabled, you can hear **Voice prompts** for different kinds of features. If **Voice prompt** is disabled, **Voice prompts** are silenced except for those in the Configuration Menu, battery level indication, speed dial, and FM radio functions.

### 13.4 Sidetone (Default: Disable)

A **Sidetone** setting can be found in the settings menu, accessible through **Intercom Device Manager for KENWOOD** or **MESH Utility for KENWOOD**.

**Sidetone** is the sound of your own voice as picked up by your headset’s microphone and reproduced in your own ear, by your own speaker. It helps you to naturally speak at the correct level according to varying helmet noise conditions. If this feature is enabled, you can hear what you are speaking during an intercom conversation or a phone call.

# 13. GENERAL SETTINGS

## 13.5 Delete All Bluetooth Pairing Information

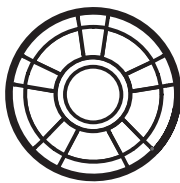

A **Delete All Bluetooth Pairing Information** setting can be found in the **Headset Configuration Menu**.

Tap the **Phone Button** when in this menu to **Delete All Bluetooth Pairing Information** stored in the headset.

- Function Priority
- Firmware Upgrades
- Voice Prompts
- Sidetone
- Delete All Bluetooth Pairing Information
- Pairing with the Remote Control

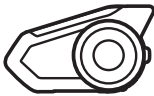

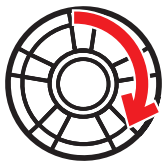

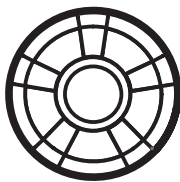

### Access Delete All Pairings in the Configuration Menu

#### Access config. Menu

“Configuration menu”

#### NAVIGATE FORWARD

“Delete all pairings”

#### EXECUTE

# 13. GENERAL SETTINGS

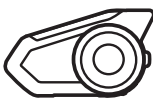

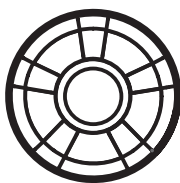

## 13.6 Pairing with the Remote Control

You can remotely control the headset using Sena Remote Control devices (sold separately).

- 1. Turn on the headset and the Remote Control device.
- 2. Execute **Remote Control Pairing** in the **Headset Configuration Menu**.

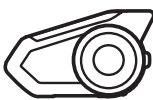

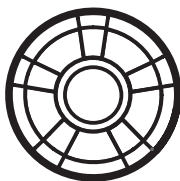

### Access Remote Control Pairing in the Configuration Menu

#### Access config. Menu

“Configuration menu”

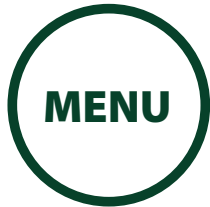

#### NAVIGATE FORWARD

“Remote control pairing”

#### EXECUTE

- Function Priority
- Firmware Upgrades
- Voice Prompts
- Sidetone
- Delete All Bluetooth Pairing Information
- Pairing with the Remote Control

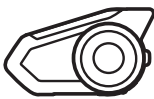

## 13. GENERAL SETTINGS

- 3. Enter pairing mode in the Remote Control device.  
The headset will automatically connect with the Remote Control device in pairing mode. You will hear a voice prompt, **“Remote control connected”**, when they are successfully paired.

### Enter Pairing Mode

#### Remote control

Enter Pairing Mode on Remote Control.

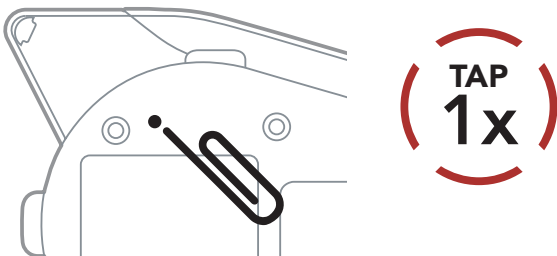

*“Remote control connected”*

# 14. APPENDIX

## 14.1 Fault Reset

- When the headset is not working properly, you can easily reset the unit:
1. Locate the pinhole reset button below on the back of the main unit.
  2. Gently insert a paperclip into the hole and tap the **Fault Reset Button** with light pressure.

3. The headset will shut down.

### NOTE

- Fault Reset will not restore the headset to factory default settings.

# 14. APPENDIX

## 14.2 Factory Reset

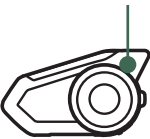

To erase all of your settings and start fresh, the headset can be restored to factory default settings using the **Factory Reset** feature.

### FACTORY RESET

HOLD  
10s

*“Factory Reset”*

Status LED	Indication
	<div></div> <div>Solid red</div>

TAP  
1x

within 5 s

*“Headset reset, good-bye”*

#### NOTE

- If you press the **Phone Button** or don't press the **Jog Dial** within **5 seconds**, the reset attempt is canceled and the headset returns to standby mode. You will hear a voice prompt saying **“Canceled”**.

# 14. APPENDIX

## 14.3 Specifications

### Bluetooth section

- Technology: Bluetooth Ver.4.1
- Profile:
  - HSP (Headset Profile)
  - HFP (Hands Free Profile)
  - A2DP (Advanced Audio Distribution Profile)
  - AVRCP (Audio/Video Remote Control Profile)

### Intercom section

- Working Distance\*:
  - Bluetooth Intercom: up to 2.0 km (1.2 miles) in open terrain
  - Mesh Intercom: up to 2.0 km (1.2 miles) in open terrain
  - \* Approximate straight line-of-sight distance. It may be shorter depending on the topography or weather.
- Supports up:
  - Bluetooth Intercom: 4 riders
  - Group Mesh: 24 riders
  - Open Mesh: unlimited

### Audio section

- Noise Cancellation: Advanced Noise Control™
- FM Radio:
  - Radio frequency specifications: 76 – 108 MHz
  - 10 preset station memory

### General

- Talk time:
  - Bluetooth intercom: 13 hours
  - Mesh intercom: 8 hours
- Operating Temperature: -10 – +55°C (14 – 131°F)
- Dimensions (W × H × D)
  - Main module: 102 × 56 × 27 mm (4.0 × 2.2 × 1.1 in)
  - Speaker Driver Unit: 40 mm – thickness 6.5 mm
- Weight:
  - Main module: 61 g (2.15 oz)
- Battery:
  - Charging time: 1.5 hours
  - Type: Lithium Polymer Battery

Specifications are subject to change without prior notice.
